Genius Bruce Whitfield, 2023-03-01 South Africa and its fraught political economy provide a fascinating case study into how it takes a particular brand of genius to thrive in a difficult domestic environment and to take the ideas and the businesses that deliver them from local to global. Genius tells the stories of some of the extraordinary individuals, companies and industries whose ideas, products and raw materials solve problems and add value across the globe. Greatness comes from acting on purpose, and there is a generation of South Africans solving problems for the future. Learn how Pratley beat Armstrong to the moon, how a former Eskom quantity surveyor capitalised on Britain's obsession with meerkats to create the UK's most visible price comparison website, how to take a Mediterranean-style food concept to the Mediterranean, and how a device designed to beat diamond smuggling made it from the set of a popular US hospital drama into emergency rooms and pathology labs across the US. Genius examines what it takes to thrive in an increasingly complex, fast-paced and divisive global environment. These are lessons for anyone looking to succeed anywhere against the odds.

Retire Downtown Kyle Ezell, 2009-01-01 Are you a Ruppie? More and more people are trending toward living downtown. Author Kyle Ezell demonstrates how empty nesters can live out their golden years full of fun and independence in the midst of the city. Ruppies--Retired Urban People--are cropping up all over the country. The populations of city downtowns are exploding nationwide. Also known as active retirees, Ruppies are quickly becoming a big part of that population. Downtown living can help them stay active both physically and mentally while keeping them entertained in the process. After all, there's always a live theater or jazz band playing right around the corner. Author and noted city planner Kyle Ezell has assembled information on living downtown, shopping, eating at exciting new restaurants, getting around, staying active, downsizing to one car, volunteering, keeping faith alive, and much, much more into Retire Downtown. Retire Downtown lists the top 20 cities for Ruppies across the nation, with a wealth of facts on each area and a breakdown of each environment. Learning how to locate the right downtown neighborhood in which to live, and discovering art galleries, cool hangouts, coffee shops, and farmers' markets, as well as the unique and trendy ethnic shops, are all exciting parts of Ezell's book--a must-have for every up-and-coming active retiree!

Innovative Strategy Making in Higher Education Mario Martinez, Mimi Wolverton, 2009-03-01 The purpose of this book is to offer higher education leaders, scholars, consultants, and observers a full range of strategy tools that can be applied to the higher education industry. This is accomplished by a) introducing new concepts and tools to give a comprehensive view of strategy making in higher education, beyond strategic planning, b) demonstrating the value of the concepts and tools through description and application for different types of institutions (universities, community colleges, for-profit colleges, etc.) and at different levels within institutions (institutional, college, department, etc.), and c) providing guidance on the appropriate uses of the various tools. The last point is especially important, as applying business-like principles to higher education often receives heavy criticism. The book helps readers decipher the appropriate uses of different strategy tools to the higher education industry, but the book also points out dangers and weaknesses. All of this is done within today's context of political, economic, demographic, and global realities.

Urban Mobility and the Smartphone Anne Aguilera, Virginie Boutueil, 2018-11-02 Urban Mobility and the Smartphone: Transportation, Travel Behavior and Public Policy provides a global synthesis of the transformation of urban mobility by the smartphone, clarifying the definitions of new concepts and objects in mobility studies, accounting for the changes in transportation and travel behavior triggered by the spread of the smartphone, and discussing the implications of these changes for policy-making and research. Urban mobility is approached here as a system of actors: the perspectives of individual behavior (including lifestyles), the supply of mobility services (including actors, business models), and public policy-making are considered. The book is based on an extensive review of the academic literature as well as systematic observation of the development of smartphone-based mobility services around the world. In addition, case studies provide practical illustrations of the ongoing transformation of mobility services influenced by the dissemination of smartphones. The book not only consolidates existing research, but also picks up on weak signals that help researchers and practitioners anticipate future changes in urban mobility systems. Key Features • Synthesizes existing research into one reference, providing researchers and policy-makers with a clear and complete understanding of the changes triggered by the spread of the smartphone. • Analyzes numerous case studies throughout developed and developing countries providing practical illustrations of the influence of the smartphone on travel behavior, transportation systems, and policy-making. • Provides insights for researchers and practitioners looking to engage with the smart cities and smart mobility discourse. Sustainable Mobility in a Fast-Changing World Nancy Vandycke, José M. Viegas, 2022-10-11 Our world is changing fast. Countries' transport

systems, which have long been shaped by project-by-project considerations, must help achieve higher-level goals for the well-being of mankind, as embodied by the UN's Sustainable Development Goals and the Paris Climate Agreement. New forces impose greater effectiveness in the way public choices are made, such as making better use of data and technologies, adopting a more inclusive and participatory approach to decision making, and addressing social concerns about equity. Transport practitioners and country decision-makers have been looking for structured and coherent guidance about ways to adjust to these new dynamics and change the trajectory of transport system. This book examines the rationale for and details an innovative approach for public decision-making to expedite the pace to sustainable mobility.

Paratransit in African Cities Roger Behrens, Dorothy McCormick, David Mfinanga, 2015-09-07 Public transport systems in contemporary Sub-Saharan African cities are heavily reliant upon paratransit services. These services are defined as informal transportation which operates between the public and individual private spheres. In Africa paratransit is characterized by low quality of vehicles and chaotic management but it also provides cheap, accessible and flexible transport solutions for the urban poor. It is typically poorly regulated and operates as a set of informal businesses. A common result of weak public sector regulation and a fare strategy in which owners claim a fixed daily revenue target and drivers who keep the variable balance as income, is destructive competition and poor quality of service. There is an incontrovertible case for improving the quality, reliability and coverage of public transport systems, and some city governments have attempted to do so by initiating reform projects that envisage the phased replacement of paratransit operations with formalised bus rapid transit systems. In this book the authors argue that there are, however, path dependencies and constraints that limit the possible extent of public transport system reform. Paratransit operations also have some inherent advantages with respect to demand responsiveness and service innovation. Attempts to eradicate paratransit may be neither pragmatic nor strategic. Two future scenarios are likely: hybrid systems comprised of both paratransit and formally planned modes; and systems improved by

upgrades and strengthened regulation of existing paratransit services. The business strategies and aspirations of incumbent paratransit operators in three case cities – Cape Town, Dar es Salaam and Nairobi – are discussed, as well as their attitudes towards emerging public transport reform projects. International experiences of hybrid system regulation and paratransit business development are reviewed in order to explore policy options. The authors contend that policies recognising paratransit operators, and seeking contextually appropriate complementarity with formalised planned services, will produce greater benefits than policies ignoring their continued existence.
