Web Geek's Guide to Google Chrome Jerri Ledford, Yvette Davis, 2009-06-09 MAKE THE MOST OF THE WORLD'S HOTTEST NEW BROWSER, GOOGLE CHROME! Finally, there's a web browser for today's Internet, and today's user: you! It's Chrome. (From Google—of course!) Now, there's a book that reveals how you can use all of Google Chrome's built-in power and speed—and extend Chrome to do even more! Jerri Ledford and Yvette Davis start with a quick, practical tour of Google Chrome's stripped-down, hot-rod interface—including its do-everything, know-everything Omnibox. You'll be using Chrome like a pro in minutes, but that's just the beginning. You won't just learn how to customize Chrome: You'll dive under the hood, tweak its code, and transform it into the browser of your dreams. Bottom line: If Google Chrome can do it, this book will help you do it smarter, faster, better! Covers all this, and more... • Improving life on the Web: what's new and different about Chrome, and why you care • Getting from Chrome newbie to power user—fast! • Browsing more safely in the Web jungle • Spit-shining Chrome: making a good-looking browser look spectacular • Optimizing your own web site to make the most of Google Chrome • Tweaking tabs, and more: customizing Chrome to your heart's content • Saving time with Google Chrome keyboard shortcuts • Troubleshooting problems with Google Chrome, step-by-step • Learning about Chromium (the foundation on which Google Chrome is built) and its components, WebKit, WebKit Core, WebKit Port, and WebKit Glue.

Mobile Deep Learning with TensorFlow Lite, ML Kit and Flutter Anubhav Singh, Rimjhim Bhadani, 2020-04-06 Learn how to deploy effective deep learning solutions on cross-platform applications built using TensorFlow Lite, ML Kit, and Flutter Key Features Work through projects covering mobile vision, style transfer, speech processing, and multimedia processing Cover interesting deep learning solutions for mobile Build your confidence in training models, performance tuning, memory optimization, and neural network deployment through every project Book Description Deep learning is rapidly becoming the most popular topic in the mobile app industry. This book introduces trending deep learning concepts and their use cases with an industrial and application-focused approach. You will cover a range of projects covering tasks such as mobile vision, facial recognition, smart artificial intelligence assistant, augmented reality, and more. With the help of eight projects, you will learn how to integrate deep learning processes into mobile platforms, iOS, and Android. This will help you to transform deep learning features into robust mobile apps efficiently. You'll get hands-on experience of selecting the right deep learning architectures and optimizing mobile deep learning models while following an application oriented-approach to deep learning on native mobile apps. We will later cover various pre-trained and custom-built deep learning model-based APIs such as machine learning (ML) Kit through Firebase. Further on, the book will take you through examples of creating custom deep learning models with TensorFlow Lite. Each project will demonstrate how to integrate deep learning libraries into your mobile apps, right from preparing the model through to deployment. By the end of this book, you'll have mastered the skills to build and deploy deep learning mobile applications on both iOS and Android. What you will learn Create your own customized chatbot by extending the functionality of Google Assistant Improve learning accuracy with the help of features available on mobile devices Perform visual recognition tasks using image processing Use augmented reality to generate captions for a camera feed Authenticate users and create a mechanism to identify rare and suspicious user interactions Develop a chess engine based on deep reinforcement learning Explore the concepts and methods involved in rolling out production-ready deep learning iOS and Android applications Who this book is for This book is for data scientists, deep learning and computer vision engineers, and natural language processing (NLP) engineers who want to build smart mobile apps using deep learning methods. You will also find this book useful if you want to improve your mobile app's user interface (UI) by harnessing the potential of

deep learning. Basic knowledge of neural networks and coding experience in Python will be beneficial to get started with this book.

Creating Google Chrome Extensions Prateek Mehta, 2016 Transform your existing web applications into Google Chrome browser extensions and create brand new extensions that improve your own browsing experience and that of your users. This book shows you how Google Chrome browser extensions are extremely useful tools for enhancing the functionality of the Google Chrome web browser. For example, you can create extensions to summarize the current page you are reading, or to save all of the images in the page you are browsing. They have access to almost all of the features provided by the Google Chrome browser, and they can encapsulate such features in the form of a bundled application providing targeted functionality to users. Extensions also run in a sandboxed environment, making them secure - which is a huge plus in the modern web! The APIs provided by the Chrome Extensions framework help you empower web applications by coupling them with amazing features provided by the Google Chrome web browser, such as bookmarks, history, tabs, actions, storage, notifications, search, and a lot more - facilitating increased productivity on the Google Chrome web browser. You will learn how to: Transform your web application ideas into Google Chrome extensions Choose the recommended components for creating your kind of extension Leverage the power of a Google Chrome browser by making use of the extensions API Showcase your existing web-development skills in a modern way by creating useful extensions.

Going Chromebook Brian Schell, 2020 In the first book, *Going Chromebook: Living in the Cloud*, we looked at Chromebooks and the various software options available for them, and we decided whether or not the cloud lifestyle was for you. If you've gotten this far, then the answer was a confident Yes! Now it's time to look into specific apps and how to use them. In this book, we look at Google's spreadsheet system, Google Sheets. Sheets competes directly with Microsoft Excel, and it is constantly being added to and improved month after month. If you need to do any calculations, record-keeping, list-making, outlining, or anything else where a spreadsheet grid is your tool of choice, then you need to

at least consider Google Sheets. This book begins by introducing you to the differences between Google Sheets and the competing online office suites. We'll also look into Google's free and paid tiers for Google Apps/G Suite, and which one works out best for your needs. Next, there's a short review chapter on how to manipulate, delete, copy, and do various file operations within the Google Drive file manager. After that, we'll go through every single command and menu, every toolbar, and all the hidden options of Google Sheets. This is the bulk of the material, and no stone (or menu) is left unturned. This includes pivot tables, conditional formatting, data validation, Slicers, embedding Google Docs and Slides, and all the other special things Sheets can do for you. Lastly, for the things that Google Sheets still just can't do natively, we will look at some of the very best third-party add-ons for Sheets, allowing you to do all sorts of wild tasks. You already know the benefits of working in the cloud-- Now it's time to learn how to get the most out of it! Note: There is a section concerning keyboard commands which applies only to Chromebooks, but the majority of the content within the book applies to Windows, Mac, and most other computers as well. If you're considering switching to Sheets, but don't have a Chromebook, you'll still find plenty here to interest you.
