**Web Designer's Guide to Google Glass** Joe Casabona, 2014-02-28 This hands-on guide to optimizing web sites for Google Glass will show you how to take advantage of the latest advancements of this tiny screen, including watching videos and viewing forms. You'll also take a look at the Mirror API and building web-based native apps for Google Glass, and get insightful tips from an expert designer on avoiding web design pitfalls.

*Programming Google Glass* Eric Redmond, 2013 Google Glass is the new wearable computer everyone's talking about. It offers a head-mounted optical display and touch interface, and it's programmable. Kick-start your Glassware development by exploring how users can interface with Glass, developing a Glass application fast by using the Mirror API to manipulate Timeline cards and menus, tracking a Glass's geolocation, creating rich interactions by responding to user inputs, and capturing or serving user images and videos. This is the book to read for a shortcut to this brave new world. Google Glass is the next big thing in portable technology---a wearable computer with an optical head-mounted display. Programming Google Glass is your all-inclusive guidebook for crafting your own Glassware using the Mirror API. You'll start by setting up a production-ready service using Google App Engine, then provide Glass users an authorization to your Glassware. You'll learn how to handle the provided credentials, and from there you'll dive into the parts that make up the Glass interface, managing the timeline and creating cards and menu items. Next you'll create services where the user can interact with your server, such as geolocation tracking, change notifications, and custom menu options. You'll use this information to create a sophisticated application that suggests local restaurants. You'll see how to attach or detach assets, images, and video, and learn the basics of the emerging field of optical-display design. You'll see how to properly design new Glassware and update existing applications to become Glassware. Now is the best time to be an early adopter of a technology that will only become more advanced, nuanced, and ubiquitous. What You Need: You will need a Google Glass device and Java 1.6 or greater. An Android device, like a smart phone or tablet, is also helpful, but not necessary.

*Google Glass (Remember the Internet #3)* Quinn Myers, 2022-09-20 The inside account of the rise and fall of Google Glass, one of the great tech hubris stories of the 2010s. Google Glass was supposed to replace phones and PCs, becoming the peripheral that turned the internet itself into a bodily function, making the instant overlay of real-time information into a new organic language. Where did everything go wrong? Was it the unchecked hubris of Big Tech, which had become addicted to solving problems that didn't exist using grandiose solutions with prohibitive price tags? Was it a tone

deaf marketing campaign that failed to take into account the secret loathing of Silicon Valley's haughty elites? Or was it simply too early, a product before its time like the Palm Pilot or disco? Journalist Quinn Myers gets the inventors, users, developers, detractors, lovers, haters, models, and memers all on the record in this slim new entry in the Remember the Internet series. NOT AVAILABLE FOR GOOGLE GLASS. Chronicles the creation of the wearable device through a series of interviews with its developers, fans, and critics, tracking its meteoric rise and fizzling end. While the devices have been largely relegated to punchlines of jokes about tech bros, Myers argues the Google Glass legacy offers lessons on privacy, AR technology, and corporate responsibility.--Business Insider Nonfiction.

Google Glass Can Read Your Mind Jack M. Wedam,2014-05-29 Does Google Glass have the ability to identify the urges and impulses in the back of your mind? According to Dr. Jack Wedam, the neuroscience that informs the device can connect a rapid eye movement with a desire that was heretofore lodged securely in your subconscious. And, when it comes to accessing that once elusive consumer information, the flick of an eye can mean big business. In his provocative new book, Google Glass Can Read Your Mind, Dr. Wedam demystifies the visual neurology at play with the much-vaunted technology. While it may or may not have already done so, Google Glass is primed to tap into recent developments in the field of neuroscience to read what is on your mind, and sell it to marketers. What's more, you would not have the slightest hint that those thoughts were detected. While the author makes clear that there is no public record of just how much Google is availing of these capabilities, he raises probing questions about this very real potential, and what it could mean for your privacy. In his fascinating new book, Wedam fires a cautionary flare to open your eyes well before trying on a new pair of glasses.

**Google Glass and Robotics Innovator Sebastian Thrun** Marne Ventura,2014-04-01 Have you ever wished you could use technology to improve people's lives? Ever since he was a teenager, Sebastian Thrun wanted to build machines that helped people. So far, Thrun has developed robots that can be tour guides and nurses and can help save miners trapped underground. In 2004, he won a US Department of Defense contest by building a car that could drive itself. Since then, the self-driving cars he developed have been tested on more than 140,000 miles (225,308 kilometers) of road without fail! Thrun more recently developed a free website for online education and worked on Google Glass, a computer that can be worn like a pair of eyeglasses. But how did he get involved in all these cool projects? Follow his rise from a computer enthusiast to robotics innovator!

Google Glass Brian J King,2021-01-05 Google Glass was the most amazing invention in the history of humankind. Was Google trying to create the New World Order? Adam Faith is the fictional Chief Technical Officer of Google, the genius behind the Glass Project with a brilliant plan to change the world. A corporate monopoly is set against an ex-D.O.D. agent attempting to thwart Adam's secret megalomaniac scheme to dominate the consumers of the world.In the tradition of George Orwell's 1984 the dystopian novel Google Glass addresses the themes of freedom and mind control in a frighteningly direct manner. In Glass, people want to see the world in a new way, and Google gives them the vision to do just that. Glass users continue to live their everyday lives of work and play but are caught up in a conspiracy of global proportions. Google Glass is a novel about the end of the world as we know it. You will not want to put down this suspenseful science fiction thriller until the end, and I do mean the end!Destined to be a classic! -Paul T. Potter
