**Google Maps Hacks** Rich Gibson, Schuyler

Erle, 2006-01-17 Want to find every pizza place within a 15-mile radius? Where the dog parks are in a new town? The most central meeting place for your class, club or group of friends? The cheapest gas stations on a day-to-day basis? The location of convicted sex offenders in an area to which you may be considering moving? The applications, serendipitous and serious, seem to be infinite, as

developers find ever more creative ways to add to and customize the satellite images and underlying API of Google Maps. Written by Schuyler Erle and Rich Gibson, authors of the popular Mapping Hacks, Google Maps Hacks shares dozens of tricks for combining the capabilities of Google Maps with your own datasets. Such diverse information as apartment listings, crime reporting or flight routes can be integrated with Google's satellite imagery in creative ways, to yield new and useful applications. The authors begin with a complete introduction to the standard features of Google Maps. The adventure continues with 60 useful and interesting mapping projects that demonstrate ways developers have added their own features to the maps. After that's given you ideas of your own, you learn to apply the techniques and tools to add your own data to customize and manipulate Google Maps. Even Google seems to be tacitly blessing what might be seen as unauthorized use, but maybe they just know a good thing when they see one. With the tricks and techniques you'll learn from Google Maps Hacks, you'll be able to adapt Google's satellite map feature to create interactive maps for personal and commercial applications for businesses ranging from real estate to package delivery to home services, transportation and more. Includes a foreword by Google Maps tech leads, Jens and Lars Rasmussen.

*Painting the Web* Shelley Powers, 2008-05-01 Do you think that only professionals with expensive tools and years of experience can work with web graphics? This guide tosses that notion into the trash bin. *Painting the Web* is the first comprehensive book on web graphics to come along in years, and author Shelley Powers demonstrates how readers of any level can take advantage of the graphics and animation capabilities built into today's powerful browsers. She covers GIFs, JPEGs, and PNGs, raster and vector graphics, CSS, Ajax effects, the canvas objects, SVG, geographical applications, and more -- everything that designers (and non-designers) use to literally paint the Web. More importantly, Shelley's own love of web graphics shines through in every example. Not only can you master the many different techniques, you also can have fun doing

it. Topics in Painting the Web include: GIF, JPEG, PNG, lossy versus lossless compression, color management, and optimization Photo workflow, from camera to web page, including a review of photo editors, workflow tools, and RAW photo utilities Tricks for best displaying your photos online Non-photographic raster images (icons and logos), with step-by-step tutorials for creating popular Web 2.0 effects like reflection, shiny buttons, inlays, and shadows Vector graphics An SVG tutorial, with examples of all the major components Tips and tricks for using CSS Interactive effects with Ajax such as accordions and fades The canvas object implemented in most browsers Geographical applications such as Google Maps and Yahoo Maps, with programming and non-programming examples Visual effects such as forms and data displays in table or graphics Web design for the non-designer Graphics are not essential to the web experience, but they do make the difference between a site that's functional and one that's lively, compelling, and exciting. Whether you want to spruce up a website, use photos to annotate your stories, create hot graphics, or provide compelling displays for your data, this is the book for you.
