GP Ice Race Ferdinand Porsche, Jr.,Vinzenz Greger,2020-10-08 \* The GP Ice Race 2020: the participants, the cars, the men of action\* Exclusive background stories about the races, interviews with drivers and promoters\* Published and curated by Ferdinand Porsche Junior\* Marvelous coffee-table book with top photos by top photographers\* The perfect present for car and Porsche lovers!It's cool, man! Winter sport meets motor sport at the GP Ice Race. In the summer they're drawn to the racetracks, in winter they go to Scandinavia: during the cold season, there are spectacular races on frozen lakes and icy tracks. In 2019 Ferdinand Porsche revived the old tradition of ice races and with his pal Vinzenz Greger he brought back the GP Ice Race to Zell am See in Austria, the home of the Porsche family. For two days amateurs, professional racing drivers, teams and manufacturers of different classes meet there for racing competitions - facing the extreme conditions of an icy track at the old airport. Spectacular pictures of motor races on the icy track.Motorsport belongs to Zell am See

like passes to the mountains, says Ferdinand Porsche, great-grandson of the Porsche patriarch of the same name. Apparently Ferdinand Porsche junior does not just share the great name, but also the motor sport genes of his ancestors. So the GP Ice Race unites a varied mix of participants, that should please all motorsport enthusiasts. Among others, participants are supercars, modern classic cars and classic cars, vehicles with combustion and electric engines. The two organizers even planned the traditional Skijoring, where courageous skiers, connected by a tow line, are pulled by a car. This racing weekend is a special experience of freedom, driving skills, sporting precision and speed - a must for motor racing enthusiasts! Text in English and German.

*The Greatest Racing Driver* Angus Dougall, 2013-11-27 Who has been the world's greatest driver, and how do you prove it? With an eye for detail and a flair for storytelling, this book explores motor

racing's rich history in pursuit of the best driver the world has ever seen. Most enthusiasts have a strongly held opinion as to racing's finest driver over the century of the motor car. By putting aside bias and personal opinion, this book's exhaustively researched, results-based analysis provides a definitive answer through clear and logical evaluation. These carefully considered, significant statistics, when merged together, reveal with incisive objectivity motor sport's greatest driver as well as the qualities that define greatness. Contentious? Possibly. Thought-provoking? Definitely. Author Angus Dougall captures many aspects of the motor racing world with a selection of revealing anecdotes on the highlights of racing's biggest stars, together with stories that bring to life people, places, insider's opinions of drivers, circuits, constructors, politics, insights, and comments on many of the drivers. For readers wishing to peruse the actual detail, there is a vast array of appendices displaying extensive race results lists, charts on driver performance, and car analysis. Motor racing fans, climb on board and hold on for an intriguing ride to the pinnacle of greatness.

**The Law of the Sea** Laura Pineschi, Tullio Treves, 2021-09-27 The United Nations Convention on

the Law of the Sea of 10 December 1982 entered into force on 16 November 1994. Since this date a single binding instrument has regulated the rights and duties of States at sea and regarding the sea. New concepts, such as the exclusive economic zone, archipelagic waters, transit passage through straits, and the International Seabed Area, are now fully recognized. The fifteen member States of the European Union are a significant sample for analyzing the practice of States, or at least that of the Western industrialized States, as regards the law of the sea. They include major and small maritime powers, coastal and land-locked States, States with coasts on the Atlantic Ocean and States with coasts on semi-enclosed seas such as the Baltic and the Mediterranean, States with and without involvement in deep seabed mining and States with different interests as regards fisheries. The fact that they all belong to the European Union is a very important common feature, which amply justifies the choice made to study them together. The book's aim is to give, through essays prepared by well-known specialists, a detailed survey of the attitudes and practice concerning the law of the sea of the member States of the European Union and of the European Community as such. The common

positions of the member States and the results of their coordinated action also emerge from these essays. The fact that the member States and the European Community are now actively engaged in the process of becoming parties to the Law of the Sea Convention is certainly a major contribution to the consolidation of the Convention as a universal instrument, or at least as an instrument widely ratified by States of all continents and economic and political interests.

Cities, Networks, and Global Environmental Governance Sofie Bouteligier, 2013 As a result of global dynamics—the increasing interconnection of people and places—innovations in global environmental governance have altered the role of cities in shaping the future of the planet. This book is a timely study of the importance of these social transformations in our increasingly global and increasingly urban world. Through analysis of transnational municipal networks, such as Metropolis and the C40 Cities Climate Leadership Group, Sofie Bouteligier's innovative study examines theories of the network society and global cities from a global ecology perspective. Through direct observation and interviews and using two types of city networks that have been treated separately in the literature,

she discovers the structure and logic pertaining to office networks of environmental non-governmental organizations and environmental consultancy firms. In doing so she incisively demonstrates the ways in which cities fulfill the role of strategic sites of global environmental governance, concentrating knowledge, infrastructure, and institutions vital to the function of transnational actors.
