**Mobile Learning** John Traxler, Agnes Kukulska-Hulme,2015-11-06 Mobile Learning: The Next Generation documents the most innovative projects in context-aware mobile learning in order to develop a richer theoretical understanding of learning in modern mobile-connected societies. Context-aware mobile learning takes advantage of cell phone, mobile, and pervasive personal technologies to design learning experiences that exploit the richness of both indoor and outdoor environments. These technologies detect a learner's presence in a particular place, the learner's history in that place or in relation to other people and objects nearby, and adapt learning experiences accordingly, enabling and encouraging learners to use personal and social technologies to capture aspects of the environment as learning resources, and to share their reactions to them.

**Quantum Physics for Absolute Beginners** Tony Goldsmith,2018-03-14 Quantum Physics is the biggest mystery in science today, but its clues do not have to remain with the scientists alone. If you have always been absolutely baffled by anything related to Quantum Physics then this book is for you. My writing mission is to engage with a new audience that has no previous knowledge of science, and I go to great lengths to make sure that everybody can fully understand my explanations. The first half of the book lists all of the facts behind Quantum Physics and I will also encourage you to participate in the scientific process. Unfortunately, Quantum Physics has a reputation for being difficult. The first thing I will do is show that this claim is false. In this book nothing is too hard to understand. I am confident that a careful reader will be able to comprehend all of the explanations given. However, like the rest of the science community you will still have problems understanding the implications of what you will learn and that is why so many people remain fascinated by this subject.

*Digital Food Cultures* Deborah Lupton, Zeena Feldman,2020-02-25 This book explores the interrelations between food, technology and knowledge-sharing practices in producing digital food cultures. Digital Food Cultures adopts an innovative approach to examine representations and practices related to food across a variety of digital media: blogs and vlogs (video blogs), Facebook, Instagram, YouTube, technology developers' promotional media, online discussion forums and self-tracking apps and devices. The book emphasises the diversity of food cultures available on the internet and other digital media, from those celebrating unrestrained indulgence in food to those advocating very specialised diets requiring intense commitment and focus. While most of the digital media and devices discussed in the book are available and used by people across the world, the authors offer valuable insights into how these global technologies are incorporated into everyday lives in very specific geographical contexts. This book offers a novel contribution to the rapidly emerging area of digital food studies and provides a framework for understanding contemporary practices related to food production and consumption internationally.

**Teaching and Mobile Learning** Flavia Santoian, Corrado Petrucco, Alessandro Ciasullo, Daniele Agostini,2022-01-31 Teaching and Mobile Learning: Interactive Educational Design is a groundbreaking book which shows how to design innovative educational mobile learning environments to instructional designers, curriculum developers, and learning professionals. The book aims to solicit teachers, educators, and practitioners to adapt their teaching with the help of educational digital models related to mobile technologies. Mobile learning is a revolution in concepts like space, sound production, and learning to get more and more customized in always-connected and ever-changing educational mobile learning environments. Researchers and academicians can be trained in cognition processes in learning management of mixed reality and virtual bodies. Mixed reality mobile technologies are becoming tools for education and training in mixed reality mobile learning. Readers of this book will understand how user and device innovative interactions are borderline with attention deficit disorder, digital amnesia, and information overload. The book develops educational knowledge on how to manage mobile technology and specific learning disorders to monitor the use of smartphones and technology tools and to empower their role in learning enhancement processes.
