World Literature, Cosmopolitanism, Globality Gesine Müller,Mariano Siskind,2019-10-21 From today's vantage point it can be denied that the confidence in the abilities of globalism, mobility, and cosmopolitanism to illuminate cultural signification processes of our time has been severely shaken. In the face of this crisis, a key concept of this globalizing optimism as World Literature has been for the past twenty years necessarily is in the need of a comprehensive revision. World Literature, Cosmopolitanism, Globality: Beyond, Against, Post, Otherwise offers a wide range of contributions approaching the blind spots of the globally oriented Humanities for phenomena that in one way or another have gone beyond the discourses, aesthetics, and political positions of liberal cosmopolitanism and neoliberal globalization. Departing basically (but not exclusively) from different examples of Latin American literatures and cultures in globalized contexts, this volume provides innovative insights into critical readings of World Literature and its related conceptualizations. A timely book that embraces highly innovative perspectives, it will be a mustread for all scholars involved in the field of the global dimensions of literature.

Archaeology in Latin America Benjamin Alberti,Gustavo G. Politis,2005-08-16 This pioneering and comprehensive survey is the first overview of current themes in Latin American archaeology written solely by academics native to the region, and it makes their collected expertise available to an English-speaking audience for the first time. The contributors cover the most significant issues in the archaeology of Latin America, such as the domestication of camelids, the emergence of urban society in Mesoamerica, the frontier of the Inca empire, and the relatively little known archaeology of the Amazon basin. This book draws together key areas of research in Latin American archaeological thought into a coherent whole; no other volume on this area has ever dealt with such a diverse range of subjects, and some of the countries examined have never before been the subject of a regional study.

Sacred Journeys Alan Morinis,1992-10-26 This interdisciplinary collection is a new landmark in the study of the world's pilgrimage traditions. Experts from many disciplines approach the subject from a variety of perspectives that are designed to lead to the understanding of pilgrimage in general. Specific case studies represent most of the major religious traditions of the world. Anthropologists, historians, sociologists, social psychologists, and students of religion will find that these theoretical and case studies suggest new areas for further research. Alan Morinis presents a many faceted examination of sacred journeys in India, Southeast Asia, the Pacific, West Asia, Africa, North America, and the Caribbean. The introduction provides a framework for the case studies which follow. In-depth accounts of patterns of pilgrimage ranging from Hindu practices to a comparison of Catholic and Baptist pilgrimage in Haiti and Trinidad, to a narration of a Maori sacred journey, provide valuable comparative information. Pilgrimage is viewed in relation to methodological issues, and an analysis is offered showing how pilgrimage and tourism are related. Victor Turner's foreword and Colin Turnbull's postscript lend authoritative weight to this increasingly significant field of study.

Building with Bamboo Gernot Minke,2022-11-21 Traditionally a building material of the warmer climate zones, bamboo is becoming increasingly popular amongst architects in the northern hemisphere; bamboo has several advantages – it is very stable, of low weight, and highly elastic, in addition to being readily available as well as renewable. The applications of bamboo in architecture have diversified considerably, so that today, even structures with large spans – such as bridges – are built with this material. Renowned universities such as the ETH Zurich or the SUTD in Singapore have conducted research on engineered bamboo which will further expand its use. The third edition of this manual provides a systematic overview of the applications and processing methods of this renewable material. Recent inspiring bamboo buildings have been added.

The Community in Rural America Kenneth P. Wilkinson,2023-03-15 The Community in Rural America, by Kenneth P. Wilkinson, is a foundational theoretical work that both defines the interactional approach to the study of the community in rural areas and frames its application to encourage and promote rural community development. Recognized for its detailed theoretical construction and logic for understanding human interactions, this book has been widely adopted and used by researchers, extension faculty, and community development practitioners for over thirty years. Presenting Wilkinson's groundbreaking work in its original form, with a new foreword aimed at clarifying several key concepts in interactional theory, this edition of The Community in Rural America will appeal to new students of the community as well as established scholars in the field.

Color and Cognition in Mesoamerica Robert E. MacLaury,1997-01-01 More than 100 indigenous languages are spoken in Mexico and Central America. Each language partitions the color spectrum according to a pattern that is unique in some way. But every local system of color categories also shares characteristics with the systems of other Mesoamerican languages and of languages elsewhere in the world. This book presents the results of the Mesoamerican Color Survey, which Robert E. MacLaury conducted in 1978-1981. Drawn from interviews with 900 speakers of some 116 Mesoamerican languages, the book provides a sweeping overview of the organization and semantics of color categorization in modern Mesoamerica. Extensive analysis and MacLaury's use of vantage theory reveal complex and often surprising interrelationships among the ways languages categorize colors. His findings offer valuable cross-cultural data for all students of Mesoamerica. They will also be of interest to all linguists and cognitive scientists working on theories of categorization more generally.

The Amenity Migrants Laurence A. G. Moss,2006 This book describes and analyses the challenges and opportunities of amenity migration to mountain areas and its management, and offers related recommendations. The book's chapters cover the subject through case studies at international, regional and local levels, along with overarching themes such as environmental sustainability and equity, mountain recreation users, housing, and spiritual motivation. Crucial issues addressed are the relationship of amenity migration to tourism and migration motivated by economic gain. Part I (chapters 1-3) describes and analyses key aspects of the amenity migration phenomenon that arch across specific place experiences, while chapters 4-20 are organized geographically, covering amenity migration in the Americas (part II), in Europe (part III), and in the Asia Pacific region (part IV). Chapter 21 concludes by bringing all the information together and focusing on the future of amenity-led migration. The book has a subject index.
