Big Farms Make Big Flu Rob Wallace, 2016-06-30 The first collection to explore infectious disease, agriculture, economics, and the nature of science together Thanks to breakthroughs in production and food science, agribusiness has been able to devise new ways to grow more food and get it more places more quickly. There is no shortage of news items on hundreds of thousands of hybrid poultry—each animal genetically identical to the next—packed together in megabarns, grown out in a matter of months, then slaughtered, processed and shipped to the other side of the globe. Less well known are the deadly pathogens mutating in, and emerging out of, these specialized agro-environments. In fact, many of the most dangerous new diseases in humans can be traced back to such food systems, among them Campylobacter, Nipah virus, Q fever, hepatitis E, and a variety of novel influenza variants. Agribusiness has known for decades that packing thousands of birds or livestock together results in a monoculture that selects for such disease. But market economics doesn't punish the companies for growing Big Flu—it punishes animals, the environment, consumers, and contract farmers. Alongside growing profits, diseases are permitted to emerge, evolve, and spread with little check. “That is,” writes evolutionary biologist Rob Wallace, “it pays to produce a pathogen that could kill a billion people.” In Big Farms Make Big Flu, a collection of dispatches by turns harrowing and thought-provoking, Wallace

tracks the ways influenza and other pathogens emerge from an agriculture controlled by multinational corporations. Wallace details, with a precise and radical wit, the latest in the science of agricultural epidemiology, while at the same time juxtaposing ghastly phenomena such as attempts at producing featherless chickens, microbial time travel, and neoliberal Ebola. Wallace also offers sensible alternatives to lethal agribusiness. Some, such as farming cooperatives, integrated pathogen management, and mixed crop-livestock systems, are already in practice off the agribusiness grid. While many books cover facets of food or outbreaks, Wallace's collection appears the first to explore infectious disease, agriculture, economics and the nature of science together. *Big Farms Make Big Flu* integrates the political economies of disease and science to derive a new understanding of the evolution of infections. Highly capitalized agriculture may be farming pathogens as much as chickens or corn.

Sadhguru, More Than a Life Arundhati Subramaniam, 2010 'The thirst to be boundless is not created by you; it is just life longing for itself.' —Sadhguru This is the extraordinary story of Sadhguru—a young agnostic who turned yogi, a wild motorcyclist who turned mystic, a sceptic who turned spiritual guide. Pulsating with his razor-sharp intelligence, bracing wit and modern-day vocabulary, the book empowers you to explore your spiritual self and could well change your life. It seeks to re-create the life journey of a man who combines rationality with mysticism, irreverence with compassion, ancient wisdom with a provocatively contemporary outlook and a deep knowledge of the self with a contagious love of life. Described as 'a profound mystic, visionary humanitarian and prominent spiritual leader of our times', he is equally at home in a satsangh in rural Tamil Nadu as at the World Economic Forum in Davos. In his early years, Jaggi Vasudev (or Sadhguru as he is now known) was a chronic truant, a boisterous prankster, and later a lover of motorbikes and fast cars. It is evident that the same urgency, passion and vitality echo in his spiritual pursuits to this day, from his creation of the

historic Dhyanalinga—the mission of three lifetimes—to his approach as a guru. In Sadhguru's view, faith and reason, spirituality and science, the sacred and the material, cannot be divided into easy binaries. He sees people as 'spiritual beings dabbling with the material rather than the reverse', and liberation as the fundamental longing in every form of life. Truth for him is a living experience instead of a destination, a conclusion, or a matter of metaphysical speculation. The possibility of self-realization, he strongly believes, is available to all. Drawing upon extended conversations with Sadhguru, interviews with Isha colleagues and fellow meditators, poet Arundhathi Subramaniam presents an evocative portrait of a contemporary mystic and guru—a man who seems to pack the intensity and adventure of several lifetimes into a single one.

Notes from the Hyena's Belly Nega Mezlekia, 2015-04-07 In this acclaimed memoir, Mezlekia recalls his boyhood in the arid city of Jijiga, Ethiopia, and his journey to manhood during the 1970s and 1980s. He traces his personal evolution from child to soldier—forced at the age of eighteen to join a guerrilla army. And he describes the hardships that consumed Ethiopia after the fall of Emperor Haile Selassie and the rise to power of the communist junta, in whose terror thousands of Ethiopians died. Part autobiography and part social history, *Notes from the Hyena's Belly* offers an unforgettable portrait of Ethiopia, and of Africa, during the defining and turbulent years of the last century.

The Sixth Station Linda Stasi, 2013-12-01 Some say Demiel ben Yusef is the world's most dangerous terrorist, personally responsible for bombings and riots that have claimed the lives of thousands. Others insist he is a man of peace, a miracle worker, and possibly even the Son of God. His trial in New York City for crimes against humanity attracts scores of protestors, as well as media and religious leaders from around the world. Cynical reporter Alessandra Russo heads to the UN hoping for a piece of the action, but soon becomes entangled in controversy and suspicion when ben Yusef singles her out for attention among all other reporters. As Alessandra begins digging into ben Yusef's past, she is already in more danger than she knows—and when she is falsely accused of murder during her investigation, she is forced to flee New York. On the run from unknown enemies, Alessandra finds herself on the trail of a global conspiracy and a story that could shake the world to its foundations. Is Demiel ben Yusef the Second Coming or the Antichrist? The truth may lie in the secret history of the Holy Family, a group of Templars who defied the church, and a mysterious relic stained with the sacred blood of Christ Himself.

The Euro Crisis in the Media Robert G. Picard, 2015-07-28 The Euro Crisis produced the most significant challenge to European integration in 60 years testing the structures and powers of the European Union and the Eurozone and threatening the common currency. This book explores how the financial and political crisis was portrayed in the European press and the implications of that coverage on public understanding of the developments, their causes, responsibilities for addressing the crisis, the roles and effectiveness of European institutions, and the implications for European integration and identity. It addresses factors that shaped news and analysis, the roles of European leaders, and the extent to which national and pan-European debates over the crisis occurred. In doing so, it provides a clear and readable explanation of what the portrayals tell us about Europe and European integration in the early twenty-first century.

Yakuza Moon Shoko Tendo, 2010-07-15 *Yakuza Moon* is the shocking, yet intensely moving memoir of 37-year-old Shoko Tendo, who grew up the daughter of a yakuza boss. Tendo lived her life in luxury until the age of six, when her father was sent to prison, and her family fell into terrible debt. Bullied by classmates who called her the yakuza girl, and terrorized at home by a father who became a drunken, violent monster after his release from prison, Tendo rebelled. A regular visitor to nightclubs at the age of 12, she soon became a drug addict and a member of a girl gang. By the age of 15 she found herself sentenced to eight months in a juvenile detention center. Adulthood brought big bucks and glamour when Tendo started working as a bar hostess during Japan's booming bubble economy of the nineteen- eighties. But among her many rich and loyal patrons there were also abusive clients, one of

whom beat her so badly that her face was left permanently scarred. When her mother died, Tendo plunged into such a deep depression that she tried to commit suicide twice. Tendo takes us through the bad times with warmth and candor, and gives a moving and inspiring account of how she overcame a lifetime of discrimination and hardship. Getting tattooed, from the base of her neck to the tips of her toes, with a design centered on a geisha with a dagger in her mouth, was an act that empowered her to start making changes in her life. She quit her job as a hostess. On her last day at the bar she looked up at the full moon, a sight she never forgot. The moon became a symbol of her struggle to become whole, and the title of the book she wrote as an epitaph for herself and her family.
