*The Great American Education-Industrial Complex* Anthony G. Picciano, Joel Spring, 2013-05-07 The Great American Education-Industrial Complex examines the structure and nature of national networks and enterprises that seek to influence public education policy in accord with their own goals and

objectives. In the past twenty years, significant changes have taken place in the way various interest groups seek to influence policies and practices in public education in the United States. No longer left to the experience and knowledge of educators, American education has become as much the domain of private organizations, corporate entities, and political agents who see it as a market for their ideas, technologies, and ultimately profits. Picciano and Spring posit that educational technology is the vehicle whereby these separate movements, organizations, and individuals have become integrated in a powerful common entity, and detail how the educational-industrial complex has grown and strengthened its position of influence. This timely, carefully documented, well argued book brings together Picciano's perspective and expertise in the field of technology and policy issues and Spring's in the history and politics of education in a unique critical analysis of the education-industrial complex and its implications for the future.

Hangman: A Journey To Redemption Michael Harper II, 2015-04-30 In our own minds, we believe that we are perfect. The reality is: we are. Until we make that one tainted decision against wisdom that moves us from perfection to imperfection. This applies to all of us. Most of us are familiar with the story of that one angel who got in trouble for doing something bad, right? But what about the angel that gets in trouble for doing something good? You've been there; your good intentions were mistaken for something totally contrary to what you set out to do? Well, you are not alone. Angels make

mistakes too.

A Hangman's Diary Franz Schmidt, 2015-02-03 From 1573 to 1617, Master Franz Schmidt was the executioner for the towns of Bamberg and Nuremberg. During that span, he personally executed more than 350 people while keeping a journal throughout his career. A Hangman's Diary is not only a collection of detailed writings by Schmidt about his work, but also an account of criminal procedure in Germany during the Middle Ages. With analysis and explanation, editor Albrecht Keller and translators C. Calvert and A. W. Gruner have put together a masterful tome that sets the scene of execution day and puts you in Master Franz Schmidt's shoes as he does his duty for his country. Originally published more than eighty years ago, A Hangman's Diary gives a year-by-year breakdown on all of Master Schmidt's executions, which include hangings, beheadings, and other methods of murder, as well as explanations of each crime and the reason for the punishment. An incredible classic, A Hangman's Diary is more than a history lesson; it shows the true anarchy that inhabited our world only a few hundred years ago. Skyhorse Publishing, as well as our Arcade imprint, are proud to publish a broad range of books for readers interested in history--books about World War II, the Third Reich, Hitler and his henchmen, the JFK assassination, conspiracies, the American Civil War, the American Revolution, gladiators, Vikings, ancient Rome, medieval times, the old West, and much more. While not every title we publish

becomes a New York Times bestseller or a national bestseller, we are committed to books on subjects that are sometimes overlooked and to authors whose work might not otherwise find a home.

Tapestry in Action Howard Lewis Ship, 2004-03-01 The creator of Tapestry details how to use this new framework's components to create rich web-based GUIs using links, images, and HTML forms. The challenges of web application development are discussed, such as managing server-side state properly, application localization, and maintaining synchronization between the client web browser and the application server. At the same time, the benefits of a clean separation between presentation logic and business logic and how well Tapestry succeeds in keeping these two concerns apart are identified. Written for new Tapestry users and even developers new to creating web applications in general, this guide includes extensive notes on development gotchas, including common Tapestry errors and how to fix them. Advanced techniques are covered as well, including creating entirely new components, integration with traditional servlet and JSP applications, and creation of client-side JavaScript. Finally, a complete J2EE application, the Virtual Library, is presented and analyzed in detail.

Hangman Daniel Cole, 2018-07-24 A detective with no one to trust A killer with nothing to lose Detective Emily Baxter is still reeling from the Ragdoll case, and from the disappearance of her friend William "Wolf" Fawkes. Despite

her reluctance to jump into another gruesome case, she's summoned to a meeting of a new FBI/CIA/UK law enforcement task force in New York. There, she is presented with photographs of the latest copycat murder: a body contorted into a familiar pose, strung up from the Brooklyn Bridge, the word "BAIT" carved deep into its chest. As the media pressure intensifies, Baxter is ordered to assist with the investigation and attend the scene of another murder, again with a victim inscribed with a word—"PUPPET." The murders continue to grow in spectacle and depravity on both sides of the Atlantic, and the team helplessly plays catch-up. Baxter must shake off the grief and fear that have paralyzed her for the last year so she can stop another terrible killer before it's too late.
