Destination Saigon Walter Mason, 2010 From the crazy heat and colour of Saigon to the quieter splendour of Hanoi, Walter Mason gives us a rare, joyous and at times hilarious insight into twenty first century Vietnam. Seduced by the beauty and charm of its people, and the sensuousness of its culture, we can almost taste the little coconut cakes cooked over a fire in a smoky Can Tho kitchen, or smell the endless supplies of fresh baguettes and croissants just out of city ovens. As colourful city cafes and bars make way for visits to out of the way shrines and temples, we take an impromptu visit to forbidden fortune tellers, and glimpse a little of the Cao Dai religion, made famous in Graham Greene's *The Quiet American*. Escaping on impulse to a far flung province, a brief imprisonment culminates in an invitation to local wedding celebrations. Travelling off the beaten track to far flung villages and lesser known towns, we cruise along the Mekong, board hopelessly overcrowded local buses or perch perilously on the back of motorbikes. Behind the scenes visits to Buddhist monasteries reveal a quieter and more transcendent world beyond the busy day trips of tourists. And in the process we begin to see the country through the eyes of its people.

Logics and Models of Concurrent Systems Krzysztof R. Apt, 2013-03-08 The cooperation test [Apt, Francez & de Roever] was originally conceived to capture the proof theoretical analogue of distributed message exchange between disjoint processes, as opposed to the interference freedom test [Owicki & Gries], being the proof theoretical analogue of concurrent communication by means of interference through jointly shared variables. Some authors ([Levin & Gries, Lamport & Schneider, Schlichting and Schneider]) stress that both forms of communication can be proof theoretically characterized using interference freedom only, since proofs for both ultimately amount to an invariance proof of a big global assertion [Ashcroft], invariance of whose parts amounts to interference freedom. Yet I feel that the characteristic nature of the cooperation test is still preserved in the analysis of these authors, because in their analysis of CSP the part dealing with interference freedom specializes to maintenance of a global invariant, the expression of which requires per process the introduction of auxiliary variables which are updated in that process only, thus preserving the concept of disjointness (as opposed to sharing), since now all variables from different processes are disjoint. The cooperation test has been applied to characterize concurrent communication as occurring in Hoare's Communicating Sequential Processes (CSP) [Hoare 2], Ichbiah's ADA [ARM], and Brinch Hansen's Distributed Processes (DP) [Brinch Hansen]. This characterization has been certified through soundness and completeness proofs [Apt 2, Gerth]. As in the interference freedom test this characterization consists of two stages, a local sequential stage and a global stage.

Discovering Computer Science Jessen Havill, 2020-10-27 Havill's problem-driven approach introduces algorithmic concepts in context and motivates students with a wide range of interests and backgrounds. -- Janet Davis, Associate Professor and Microsoft Chair of Computer Science, Whitman College This book looks really great and takes exactly the approach I think should be used for a CS 1 course. I think it really fills a need in the textbook landscape. -- Marie desJardins, Dean of the College of Organizational, Computational, and Information Sciences, Simmons University *Discovering Computer Science* is a refreshing departure from introductory programming texts, offering students a much more sincere introduction to the breadth and complexity of this ever-growing field. -- James Deverick, Senior Lecturer, The College of William and Mary This unique introduction to the science of computing guides students through broad and universal approaches to problem solving in a variety of contexts and their ultimate implementation as computer programs. -- Daniel Kaplan, DeWitt Wallace Professor, Macalester College *Discovering Computer Science: Interdisciplinary Problems, Principles, and Python Programming* is a problem-oriented introduction to computational problem solving and programming in Python, appropriate for a first course for computer science majors, a more targeted disciplinary computing course or, at a slower pace, any introductory computer science course for a general audience. Realizing that an organization around language features only resonates with a narrow audience, this textbook instead connects programming to students' prior interests using a range of authentic problems from the natural and social sciences and the digital humanities. The presentation begins with an introduction to the problem-solving process, contextualizing programming as an essential component. Then, as the book progresses, each chapter guides students through solutions to increasingly complex problems, using a spiral approach to introduce Python language features. The text also places programming in the context of fundamental computer science principles, such as abstraction, efficiency, testing, and algorithmic techniques, offering glimpses of topics that are traditionally put off until later courses. This book contains 30 well-developed independent projects that encourage students to explore questions across disciplinary boundaries, over 750 homework exercises, and 300 integrated reflection questions engage students in problem solving and active reading. The accompanying website – <https://www.discoveringcs.net> – includes more advanced content, solutions to selected exercises, sample code and data files, and pointers for further exploration.

An Introduction to Python and Computer Programming Yue Zhang, 2015-07-08 This book introduces Python programming language and fundamental concepts in algorithms and computing. Its target audience includes students and engineers with little or no background in programming, who need to master a practical programming language and learn the basic thinking in computer science/programming. The main contents come from lecture notes for engineering students from all disciplines, and has received high ratings. Its materials and ordering have been adjusted repeatedly according to classroom reception. Compared to alternative textbooks in the market, this book introduces the underlying Python implementation of number, string, list, tuple, dict, function, class, instance and module objects in a consistent and easy-to-understand way, making assignment, function definition, function call, mutability and binding environments understandable inside-out. By giving the abstraction of implementation mechanisms, this book builds a solid understanding of the Python programming language.

Do Young People Know ASEAN? Eric C Thompson, 2016-05-18 In 2007, a survey - the first of its kind - was carried out to gauge young people's awareness of and attitudes towards ASEAN, following the decision by ASEAN heads of state and government to accelerate the date for accomplishing an integrated ASEAN Community by 2015. Views and attitudes from university undergraduates in the ten ASEAN member states who participated in the survey indicated a nascent sense of identification as citizens of the region as well as their priorities for important aspects of regional integration. An update to the 2007 survey was carried out in 2014-15 among the same target population but with an expanded scope of twenty-two universities and institutes of higher learning across the ten member states. In the updated survey we found that there are more ASEAN-positive attitudes region-wide, but there are also increases in ASEAN-ambivalent attitudes at country-level in some ASEAN members. Young people's priorities for important aspects of regional integration have also shifted away from economic cooperation to tourism and development cooperation. New questions in the latest survey also allow us to demonstrate the descriptive vocabulary and cognitive maps students hold for the region and its nations. This book details the key findings of the updated survey compared to the earlier survey. These include nation-by-nation results and a summary of region-wide trends, as well as what they suggest for the prospects of ASEAN integration beyond 2015. These are assessed in a chapter providing broad recommendations for policymakers and educators in the ASEAN member states.
