**The Routledge International Handbook of Public Sociology** Leslie Hossfeld,E. Brooke Kelly,Cassius Hossfeld,2021-07-21 This book brings together the work of public sociologists from across the globe to illuminate possibilities for the practice of public sociology and the potential for international exchange in the field. In addition to sections devoted to the history, theory, methodology and possible future of public sociology, it offers a series of concrete case studies of public sociology practice from experienced scholars and practitioners, addressing core themes including the role of students in public sociology, the production of knowledge by communities and the sharing of knowledge with a view to having an influence on policy. Presenting research that is truly global in scope, The Routledge International Handbook of Public Sociology provides readers with the opportunity to consider the possibilities that exist for international collaboration in their work and reflect on future directions. As such, it will appeal to scholars across the social sciences with interests in research with public impact.

**Advancing Human Development** Frances Stewart,Gustav Ranis,Emma Samman,2018 Human Development is a prime goal of many development strategies. This book explains what Human Development is, and how it emerged from previous development methods. By exploring developments over the last forty years, it explains what makes for success and failure, and how progress has been made across the globe.

**The Impact of Macroeconomic Policies on Poverty and Income Distribution** Luiz A. Pereira da Silva,Fran ois Bourguignon,Maurizio Bussolo,2008-06-19 A companion to the bestseller, The Impact of Economic Policies on Poverty and Income Distribution, this title deals with theoretical challenges and cutting-edge macro-micro linkage models. The authors compare the predictive and analytical power of various macro-micro linkage techniques using the traditional RHG approach as a benchmark to evaluate standard policies, such as a typical stabilization package and a typical structural reform policy.

**Ethical Patient Care** Mathy D. Mezey,Christine K. Cassel,Melissa M. Bottrell,Kathryn Hyer,Judith L. Howe,Terry T. Fulmer,2003-04-29 The delivery of good medical care often involves professionals from various disciplines working together. Interdisciplinary health care teams can be especially valuable in managing patients with complex medical and social needs, such as older persons in hospital, community, or home settings. Such teams, however, can also complicate or even create problems because of their diverse views and responsibilities. Ethical Patient Care: A Casebook for Geriatric

Health Care Teams is designed to teach effective and responsible group decision making to clinicians working in teams to treat older patients. The editors use the case study method to present ethical dilemmas that team members encounter in the management of geriatric patients. Patients with multiple chronic conditions so often require the care of more than one medical specialist, and in the introductory chapters the editors suggest ways to resolve conflicts among patients, health care professionals, and the institutions that support them, including hospitals, HMOs, insurance companies, and the government. The book is then divided into four sections, each dealing with one angle of the team-care picture. The first section treats the diverse ethical imperatives of various professionals, conflicts among disciplinary approaches, and varying attitudes toward end-of-life- decision making. Section two focuses on the patient and covers patient confidentiality, family decisionmaking and interaction with the healthcare team, issues of patient and team nonadherence to the care plan, and elder abuse and neglect. Section three examines the emerging difficulties of decentralized health care in settings such as hospitals, nursing homes, and the home, including clinician accountability and how ethical dilemmas differ across settings. Section four discusses the problems arising from the increasing responsibility of clinicians to manage costs and serve the interests of hospitals and insurers. Ethical Patient Care is a valuable resource for bioethicists, gerontologists, and the physicians, nurses, social workers, and therapists who care for aging persons.

CSL '89 Egon Börger, Hans Kleine Büning, 1990-07-10 This volume contains the revised versions of 28 papers presented at the third workshop on Computer Science Logic held in Kaiserslautern, FRG, October 2-6, 1989. These proceedings cover a wide range of topics both from theoretical and applied areas of computer science. More specifically, the papers deal with problems arising at the border of logic and computer science, e.g. in complexity, data base theory, logic programming, artificial intelligence, and temporal logic. The volume should be of interest to all logicians and computer scientists working in the above field.

*Challenges to Mdg Achievement in Low Income Countries: Lessons from Ghana and Honduras* Maurizio Bussolo, 2007 Abstract: This paper summarizes the policy lessons from applications of the Maquette for MDG Simulations (MAMS) model to two low income countries: Ghana and Honduras. Results show that costs of MDGs achievement could reach 10-13 percent of GDP by 2015, although, given the observed low productivity in the provision of social services, significant savings may be realized by improving efficiency. Sources of financing also matter: foreign aid inflows can

reduce international competitiveness through real exchange appreciation, while domestic financing can crowd out the private sector and slow poverty reduction. Spending a large share of a fixed budget on growth-enhancing infrastructure may mean sacrificing some human development, even if higher growth is usually associated with lower costs of social services. The pursuit of MDGs increases demand for skills: while this encourages higher educational attainments, in the short term this could lead to increased income inequality and a lower poverty elasticity of growth.

**Innovative Approaches to Tourism and Leisure** Vicky Katsoni,Kathy Velandar,2017-12-29 This book examines the many ways in which innovative technologies represent a powerful development tool for the tourism and leisure sector and presents novel strategies based on these technologies that foster sustainable tourism management and promote sustainable destinations. The aim is to elucidate the ways in which ICTs can be used to create a high-quality experience for citizens and visitors while ensuring the wise, ecologically sound management of human and natural resources. Attention is also focused on the globalized environment in which these advances are occurring, and on the impacts of broader social, economic, and political forces in transforming our understanding of tourism in the era of online devices. The book is based on the proceedings of the Fourth International Conference of the International Association of Cultural and Digital Tourism (IACuDiT) and is edited in collaboration with IACuDiT. It will have broad appeal to professionals from academia, industry, government, and other organizations who wish to learn about the latest perspectives in the fields of tourism, travel, hospitality, culture and heritage, leisure, and sports within the context of a knowledge society and smart economy.

**Multiple Objective and Goal Programming** Tadeusz Trzaskalik,Jerzy Michnik,2002-01-11 The book is dedicated to multi-objective methods in decision

making. The first part which is devoted to theoretical aspects, covers a broad range of multi-objective methods such as multiple linear programming, vector optimisation, fuzzy goal programming, data envelopment analysis, game theory, and dynamic programming. The reader who is interested in practical applications, will find in the remaining parts a variety of approaches applied in numerous fields including production planning, logistics, marketing, and finance.

**Towards Human Development** Giovanni Andrea Cornia, Frances Stewart, 2014-04-17 Human Development is widely recognised as the overriding goal of development, yet its realization is challenged by growing inequality, macro-economic fluctuations, and recurrent financial crises. This edited collection reflects on the work of Richard Jolly and includes contributions from leading scholars of development, all of whom have worked with Richard Jolly at varying points in his distinguished career. The volume advances thinking in the area of Human Development by discussing the evolution of its conceptualization and the policy implications, and the achievements in related key areas such as education, social protection, and employment. It juxtaposes these theoretical and (at times) real life improvements with disturbing developments in terms of growing inequality and macro-economic instability. It documents the growing income inequality which has characterized both developing and developed countries. It shows that there has been a decline in some countries and identifies the policies adopted in these exceptional cases. It also shows also where and how public expenditure on Human Development in developing countries has been affected by the 2008 financial crisis and presents a new framework for a pro-growth pro-Human Development macro-economics, including suggestions for the countercyclical regulation of financial flows. The book also argues that a series of disruptive factors are nudging the innovation trajectory in new potentially pro-poor and pro-Human Development directions, especially if policies speed-up the diffusion of new efficient appropriate technologies in low and middle income economies.

*School Leader Internship* Gary E. Martin, Arnold B. Danzig, William F. Wright, Richard A. Flanary, 2013-10-02 School leadership internships are the bridge between classroom teachers and first-time leadership positions. Research shows that quality internships are equally as important as the graduate programs themselves in establishing leadership practices that improve teaching, learning, and school conditions. This book was written as a stand-alone graduate textbook and serves as a guide and support for creating and managing quality school leader internship programs. It provides step-by-step guidance for interns, their supervisors, and their faculty on how to initiate an internship and evaluate interns' work. In this updated third edition, the

authors have aligned the internship to the revised ISLLC standards, making this book critical for the over 500 leadership preparation programs nationwide and the thousands of school districts that support leadership candidates.

*Roger's Textbook of Pediatric Intensive Care* Donald H. Shaffner, John J. McCloskey, Elizabeth A. Hunt, Robert C. Tasker, 2023-08-14 Long recognized as the leading text in this dynamic field, Rogers' Textbook of Pediatric Intensive Care provides comprehensive, clear explanations of both the principles underlying pediatric critical care disease and trauma as well as how these principles are applied. Led by Drs. Donald H. Shaffner, John J. McCloskey, Elizabeth A. Hunt, and Robert C. Tasker, along with a team of 27 section editors as well as more than 250 expert global contributors, the fully revised Sixth Edition brings you completely up to date on today's understanding, treatments, technologies, and outcomes regarding critical illness in children.

*Wetlands and Water Framework Directive* Stefan Ignar, Mateusz Grygoruk, 2015-01-14 This book compares the lessons learned from a wetland-perspective approach to the changing climate and the requirements of the Water Framework Directive (WFD) with regard to environmental conservation. Examples from Germany and Poland are discussed due to the efficiency of their respective implementations of water conservation policies. Although the general scientific interest in specific issues such as wetlands, climate change, nature conservation and the WFD enjoy a well established position in international environmental research, these four elements are rarely considered together due to the complexity of the processes, biased scenarios of global change and subjective policy background. Major challenges involved in carrying out environmental conservation actions that assess the potential impacts of climate change and management plans on water bodies are identified. The results of this approach are addressed to practitioners in the field of adaptive management in a wetlands context.
