Current Trends in Environmental Psychology, volume I, 2nd edition Giuseppe Carrus, Eugenio De Gregorio, Frederica Caffaro, Sabine Pirchio, Lorenza Tiberio, 2023-07-18 This Research Topic is linked to the 3rd International Conference of Environmental Psychology (ICEP 2021), to be held in Siracusa, Italy, 4-9 October 2021. The ICEP is one of the most important scientific events in the global community for experienced scholars, junior researchers and professionals working in the field of Environmental Psychology across the world. Submissions to this Research Topic welcome, but are not limited to, works that have been presented (on site and virtually) at the ICEP 2021. Research Topic articles will be published immediately once accepted in the journal. This Research Topic aims to promote the scientific debate over the most recent empirical findings and theoretical advances in Environmental Psychological science, and to build evidence-based knowledge and innovative approaches to understand the relationship between humans and their socio-physical environments. It aims at hosting empirical and theoretical works that contribute at advancing our scientific knowledge on some of the most urgent challenges of contemporary human society.

*Weather, Religion and Climate Change* Sigurd Bergmann, 2020-12-13 *Weather, Religion and Climate Change* is the first in-depth exploration of the fascinating way in which the weather impacts on the fields of religion, art, culture, history, science, and architecture. In critical dialogue with meteorology and climate science, this book takes the reader beyond the limits of contemporary thinking about the Anthropocene and explores whether a deeper awareness of weather might impact on the relationship between nature and self. Drawing on a wide range of examples, including paintings by J.M.W. Turner, medieval sacred architecture, and Aristotle's classical *Meteorologica*, Bergmann examines a geographically and historically wide range of cultural practices, religious practices, and worldviews in which weather appears as a central, sacred force of life. He also examines the history of scientific meteorology and its ambivalent commodification today, as well as medieval weather witchery and biblical perceptions of weather as a kind of barometer of God's love. Overall, this volume explores the notion that a new awareness of weather and its atmospheres can serve as a deep cultural and spiritual driving force that can overcome the limits of the Anthropocene and open a new path to the Ecocene, the age of nature. Drawing on methodologies from religious studies, cultural studies, art history and architecture, philosophy, environmental ethics and aesthetics, history, and theology, this book will be of great interest to all those concerned with studying the environment from a transdisciplinary perspective on weather and wisdom.

*AKASHVANI* All India Radio (AIR), New Delhi, 1978-11-12 *Akashvani* (English) is a programme journal of ALL INDIA RADIO, it was formerly known as The Indian Listener. *More than 'Nature'* LIT Verlag,2022-07-07 The Arctic is often associated with pristine wilderness, natural resources, and climate change. Yet settlements and infrastructure, which have received less attention, play a significant role in Arctic environments. Extractive industries, military activities, and scientific undertakings have driven the expansion of infrastructures. This book presents current research on Northern towns and Arctic and Subarctic infrastructure. It examines historical developments, the shaping of environments, sustainability, future planning, and associated living conditions, mainly from a social science perspective. Doris Friedrich is a Senior Fellow at the Arctic Institute and a PhD student at the University of Vienna, focusing on Arctic human-environment relations. Markus Hirnsperger holds an MA and PhD in Social and Cultural Anthropology and Slavic Studies. His research interests include history and nationalism. Stefan Bauer works as storage manager at the Weltmuseum Wien. His research (MA) focused on Indigenous minorities in Russia (culture, economy, and politics).

*Weather: Spaces, Mobilities and Affects* Kaya Barry,Maria Borovnik,Tim Edensor,2020-12-17 This book delves into the everyday spaces, diverse mobilities and affective potency of weather. It presents cutting-edge research into the multiplicity of weather phenomena and analyses the lived experiences of humans in conjunction with contemporary issues, notably climate change. The book considers how everyday experiences of weather in the mundane lives of people are linked to broader changes in weather patterns and climate change. Heat, dust, ice, snow, precipitation, sunlight, clouds, tides and fog are states of weather that impact on the ways in which humans become intertwined with landscapes. Our experiences with weather are diverse and ever-changing, and engaging with weather entangles humans with mobilities, materials and landscapes. This book thus explores affective and sensory resonances, drawing upon a variety of theoretical, empirical and creative material to investigate how weather is perceived in different social and cultural contexts. Key themes focus on the mobilities generated by weather, the affective and sensual potency of weather, and the diverse cultural forms and practices that exemplify how weather is historically, geographically and artistically represented. Offering a social and cultural understanding of weather events, this book contributes to a growing literature on weather across various disciplines, including human geography and cultural geography, and will thus appeal to students and scholars of geography, sociology, humanities, cultural studies and the arts.

**Human Ecology** Markus Nauser, Dieter Steiner, 2002-11-01 We face an environmental catastrophe of global proportions. The ecological rationality of modern society, and of science in particular, is in question. Science still responds to crises at the level of technocratic expertise, and still treats society as an adaptive system. By bringing together a number of integrative approaches to the human-environment problem, Human Ecology shapes a more radical, fundamental agenda for change. The book creates a framework for a cohesive discourse, for a new human ecology. From the notion that the individual person is an agent mediating between society and environment, the individual contributors recognize that the environmental crisis is really a crisis of society - manifesting itself in an increasing fragmentation of lives in general and knowledge in particular. Arguing for environmentally sustainable lifestyles, the book envisages a new kind of consciousness and a new environment.

*Drifting on Alien Winds* Michael Carroll, 2011-02-15 Ever since the Montgolfier's hot air balloon carried a chicken, a goat, and a duck into the Parisian skies, scientists have dreamed of contraptions to explore the atmosphere. With the advent of the space age, new airborne inventions were needed. From the Soviet Venus balloons to the advanced studies of blimps and airplanes for the atmospheres of Mars and Titan, *Drifting on Alien Winds* surveys the many creative and often wacky ideas for exploring alien skies. Through historical photographs and stunning original paintings by the author, readers also explore the weather on planets and moons, from the simmering acid-laden winds of Venus to liquid methane-soaked skies of Titan.

**Science with Storytelling** Jane Stenson, Sherry Norfolk, Lynette J. Ford, 2016-11-28 This book is about the intersection of storytelling and science. Recognizing that humans are hard-wired for narrative, this collection of new essays integrates the two in a special way to teach science in the K-6 classroom. As science education changes its focus to concepts that bridge various disciplines, along with science and engineering practices, storytelling offers opportunities to enhance the science classroom. Lesson plans are provided, each presenting a story, its alignment with science (Next Generation Science Standards), language arts (Common Core State Standards) and theater arts standards (National Core Arts Standards). Instructional plans include a rationale, preparation, activities and assessment.

**Eric Sloane's Weather Book** Eric Sloane,2005-10-28 Amateur weather forecasters (which includes just about everyone) will find this volume an informative and entertaining account of the why and how of the weather. — The Nation In simple language, Eric Sloane explains the whys and wherefores of weather and weather forecasting — and does it in a style that's universally appealing. With humor and common sense shining through in a book that's also lively and informative, Sloane shows readers how to predict the weather by reading such natural phenomena as winds, skies, and animal sounds. This beautifully illustrated and practical treasure trove of climate lore will enlighten outdoorsmen, farmers, sailors, and anyone else who has ever wondered what a large halo around the moon means, why birds sit it out before a storm, and whether or not to take an umbrella when leaving the house.

**Aurora** Neil Bone,2007-06-05 This new book addresses a gap in the literature, offering an explanation of the aurora's causes, how the occurrence of major events may now be predicted, and how amateur observers can go about recording displays. This is the first serious book about aurora written for practical but non-professional observers. It provides a concise accessible description of the various auroral forms and how to record them, illustrated with color images of recent displays. It contains details of 'Space Weather' forecasting websites, how to interpret and use the information given on these, and how to anticipate auroral activity.
