Breaking the HEC-RAS Code Christopher Goodell, 2014-10-31 One of the most powerful, yet relatively unknown features available in HEC-RAS is the HECRASController. TheHECRASController API has a wealth of procedures which allow a programmer to manipulate HEC-RAS externally by setting input data, retrieving input or output data, and performing common functions such as opening and closing HEC-RAS, changing plans, running HEC-RAS, and plotting output. HECRASController applications are seemingly endless. Not only can the retrieval and post-processing of output be automated, but with the HECRASController, real-time modeling and probabilistic experiments like Monte Carlo are possible. If you have HEC-RAS on your computer, you already have the HECRASController! *Breaking the HEC-RAS Code* explains how the HECRASController works, provides example applications of the HECRASController, and catalogs the vast array of programming procedures (with explanations and examples on how to use them) embedded in the HECRASController. This is a must-have book for all HEC-RAS users. Professionals: Give yourself an edge for the next proposal and do something groundbreaking with HEC-RAS. Students: Make yourself marketable by adding the skills offered in this book.

2010 B.C. R K Baessler,2011-04-13 2010 BC The Chonicles of Courage is a book about Fantosaurs. Have you ever heard of a Hectorectoroptimus or a Monitorial Lizardosaur? How about an Elephanticus or even a Bald-faced Hominid? Maybe you think that these creatures never existed. Now they will they not only exist - they will become a part of your family. Find a comfortable chair and travel with these lovable Fantosaurs on their courageous adventures in Ameritor where they journey to such places as the Sea of No See, the Ocean of Motion, the Forest of Future Past and the Freedom River. Now let's go see what Hec is up to in the Pecant Grove.

Fisherman's Wharf Breakwater Monitoring Study, San Francisco, California Jonathan W. Lott,1994 A field monitoring study of the Fisherman's Wharf breakwater was conducted as part of the Monitoring Completed Coastal Projects (MCCP) program. The Corps project referred to as the 'Fisherman's Wharf breakwater' in this report consists of a combination of three discrete reinforced concrete sheet-pile structures. The main detached breakwater is an impermeable vertical wall structure with additional support provided by batter piles. The other two structural elements are similar, except that they have openings to allow the passage of tidal flows. The breakwater is located on the north-facing waterfront of the city of San Francisco, California, adjacent to the world-famous Fisherman's Wharf small-craft harbor, bordered by Aquatic Park, Municipal pier, Hyde Street pier, and Pier 45. The site is subject to both local waves from fetches within San Francisco Bay and ocean-generated waves which penetrate to the site via the Golden Gate. The breakwater was designed primarily to attenuate the damaging

short-period waves that are largest from the north to northeast directions. The breakwater also provides protection for the historic ships berthed at Hyde Street pier and allows for expansion and improvement of the commercial fishing berthing facilities. Concurrent requirements were to prevent increases in harbor oscillations (surge) and to permit sufficient tidal circulation to avoid degradation of water quality. Aquatic park, Coastal structures, Baffled breakwater, Current measurements, Coastal structure design.

Consumer Knowledge and Financial Decisions Douglas J. Lamdin, 2011-11-23 There has been an increasing recognition that financial knowledge (i.e., literacy) is lacking across the population. Moreover, there is recognition that this lack of knowledge poses real problems as credit, mortgages, health insurance, retirement benefits, and savings and investment decisions become increasingly complex. *Financial Decisions Across the Lifespan* brings together the work of scholars from various disciplines (family and consumer sciences, economics, law, finance, sociology, and public policy) to provide a broad range of perspectives on financial knowledge, financial decisions, and policies. For consistency across the volume each chapter follows a similar format: (1) what individuals know or need to know (2) how what they know or need to know affects financial decisions and outcomes (3) ways in which policies or programs or financial innovations can enhance their knowledge, or decisions, or outcomes. Contributors will provide both new and existing research to create a valuable picture of the state of financial literacy and how it can be improved.

Windows Vista Tips and Tricks in Easy Steps Stuart Yarnold, 2007 Windows Vista can be extremely frustrating at times. Often, it will simply refuse to do simple tasks, or do things that it wasn't asked to do. *Windows Vista Tips and Tricks in Easy Steps* takes all the most common problems that users experience and addresses them in one easy-to-understand reference source. Want to get rid of those irritating Balloon Tips? Go back to 640 x 480 resolution, even though Microsoft officially eliminated that option? Speed up the Start menu? Shut down in one click instead of several? It's all here, as well as how to hide web-browsing tracks, turn off that cool AutoComplete feature (that remembers credit card numbers and will spit them out to whoever requests them), and keep passwords safe. The book also shows how to optimize the performance of a PC.
