The Silk Roads Peter Frankopan, 2016-02-16 INTERNATIONAL BESTSELLER • Far more than a history of the Silk Roads, this book is truly a revelatory new history of the world, promising to destabilize notions of where we come from and where we are headed next. A rare book that makes you question your assumptions about the world.” —The Wall Street Journal From the Middle East and its political instability to China and its economic rise, the vast region stretching eastward from the Balkans across the steppe and South Asia has been thrust into the global spotlight in recent years. Frankopan teaches us that to understand what is at stake for the cities and nations built on these intricate trade routes, we must first understand their astounding pasts. Frankopan realigns our understanding of the world, pointing us eastward. It was on the Silk Roads that East and West first encountered each other through trade and conquest, leading to the spread of ideas, cultures and religions. From the rise and fall of empires to the spread of Buddhism and the advent of Christianity and Islam, right up to the great wars of the twentieth century—this book shows how the fate of the West has always been inextricably linked to the East. Also available: *The New Silk Roads*, a timely exploration of the dramatic and profound changes our world is undergoing right now—as seen from the perspective of the rising powers of the East.

Tourism, Cultural Heritage and Urban Regeneration Nicholas Wise, Takamitsu Jimura, 2020-04-01 Urban regeneration is often regarded as the process of renewal or redevelopment of spaces and places. There is a need to look at tourism and urban regeneration with a particular focus on cultural heritage. Cultural heritage consists of tangible heritage (such as historic buildings) and intangible heritage (such as events). The wider need and impact for such work is that places plan for change to keep up with the shifts in demand in the global economy in order for places to maintain a competitive advantage. Moreover, places need to keep up with the pace of global change or they risk stagnation and decline as increased competition is resulting in increased opportunities and choice for consumers. Each chapter in this book explores a specific form of cultural heritage that is driving change in urban spaces. Intended for a wide readership, the book will appeal to students of urban studies, human geography, heritage studies and international tourism management, as well as experts conducting research in and across these areas.
