Shripada Bandyopadhyaya

Dynamics of Political Process B. Satapathy, 1990
Hill Politics in North-east India Shibani Kinkar Chaube, 1999 The author traces, chronologically, the advent of British influence in this region (eighteenth century), the establishment of British power in 1826, and its import and consequences on the post-independent political situation. This revised edition carries a chapter on post-reorganisation in the northeast, commenting on the situation as contemporary as the recently concluded elections in Manipur.

Democracy David Beetham, 2012-12-01 As the U.S. strives to establish democracy in Iraq and contemplates its own democratic system in the wake of a series of controversial presidential elections, David Beetham offers new insights into democracy. He looks at real examples such as the role of the citizen and how large corporations affect democracy as well as contemplating the future of democracy in the developed and developing worlds.

Indian Music Through the Ages Shripada Bandyopadhyaya, 1985

Is Democracy Possible? John Burnheim, 2006 In *Is Democracy Possible?* John Burnheim presents bold and original proposals for the working of a new democracy. In particular he provides a radical reinterpretation of the concept and mechanics of representation and a structure that is designed to avoid concentrations of power and powertrading at any level. Among other points, he argues that we must abandon mass voting in favour of statistical representation. For the second edition of this

important work, Burnheim reflects upon the impact of the book and upon his current thoughts on the primary issues he raised when it was first published in 1985. Despite a generation of dramatic historical change and intense theoretical interest in issues of global democratisation since then, the problems raised remain unsolved. *Is Democracy Possible?* remains a distinctive and provocative discussion of the possibilities for the democratic reorganisation of modern society. 'Is Democracy Possible? should ... be widely read. It is a clear and freshly written statement of an unconventional and provocative thesis which will stimulate the jaded and annoy the complacent.'

Vernon Bogdabor, Times Literary Supplement

Driving Democracy Pippa Norris, 2008-08-01

Proposals for power-sharing constitutions remain controversial, as highlighted by current debates in Iraq, Afghanistan, Nepal, and Sudan. This book updates and refines the theory of consociationalism, taking account of the flood of contemporary innovations in power-sharing institutions that have occurred worldwide. The book classifies and compares four types of political institutions: the electoral system, parliamentary or presidential executives, unitary or federal states, and the structure and independence of the mass media. The study tests the potential advantages and disadvantages of each of these institutions for democratic governance. Cross-national time-series data concerning trends in democracy are analyzed for all countries worldwide since the early 1970s. Chapters are enriched by comparing detailed case studies. The

mixed-method research design illuminates the underlying causal mechanisms by examining historical developments and processes of institutional change within particular nations and regions. The conclusion draws together the results and the practical lessons for policymakers.
