Many of the photos are published for the first time, and although they're old, they are sharp and packed with detail. Old Hong Kong Photos and The Tales They Tell, Volume 2 David Bellis,2018-12-01 David puts more of his favourite old Hong Kong photos under the magnifying glass, revealing the photos' secrets, and uncovering their hidden stories. Flying Italian miners (p. 107), disembodied feet (p. 13), and the most beautiful woman you'll never see (p. 17) are just a few of the surprises in store for you.

Old Hong Kong Photos and The Tales They Tell, Volume 4 David Bellis,2020-12-01 Revisit old Hong Kong through this book's collection of rare photos, many of them over 100 years old. Then join David to explore the photos' details, and so discover their hidden stories: the women who toiled up the Peak's slopes each day, carrying heavy loads of bricks and coal on their shoulders, buried treasure still waiting to be found, Kowloon's vanishing hills, and many more. David runs the award-winning local history website Gwulo, home to over 25,000 photos of old Hong Kong.

HONG KONG x 24 x 365 David Clarke,2006-12-01 This in-between phase, without major dramas, where history was only with a small 'h', is the subject of this locally orientated micro-historical analysis of one of the world's great cities - which had so lost self-confidence in this period that it started promoting itself as 'Asia's World City', but which might yet prove to be a city that changes China (and therefore the world). Specifying this time, through a collection of colour photographs taken during a randomly chosen twelve-month period, David Clarke presents a year in the life of the city in which he has lived for the last two decades. An antidote to the tourist picture-postcard view of Hong Kong which is so often propagated to locals and visitors alike, these images and their accompanying text are produced from a proximity which enables both a critical engagement with the city and a celebration of its uniqueness. Personal in its perspective, this extended photo essay invites you to join a fabricated journey through the real space of Hong Kong, looking awry at scenes too often photographed before, and looking anew at scenes too often overlooked.

Cole,2019-07-23 This bibliography of reference works from Chinese, Japanese and Western language sources covers: the 1911 Revolution; the Republic of China (1912-1949); the People's Republic of China (1949 onwards); post-1911 Hong Kong and Macau; and post-1911 overseas Chinese. Filled with helpful checklists, charts, and suggestions for further reading, this practical, comprehensive, and multidisciplinary guide takes readers through the entire case-writing process, including skills for writing both teaching cases and research cases. This edition includes new discussions of students as case writers, and how to interpret and respond to reviews, as well as updated and expanded material on video, multimedia and Internet cases.

Chinese and Japanese Films on the Second World War King-fai Tam,Timothy Y. Tsu,Sandra Wilson,2014-10-24 This book examines representations of the Second World War in postwar Chinese and Japanese cinema. Drawing on a wide range of scholarly disciplines, and analysing a wide range of films, it demonstrates the potential of war movies for understanding contemporary China and Japan. It shows how the war is remembered in both countries, including the demonisation of Japanese soldiers in postwar socialist-era Chinese movies, and the pervasive sense of victimhood in Japanese memories of the war. However, it also shows how some Chinese directors were experimenting with alternative interpretations of the war from as early as the 1950s, and how, despite the resurgence of nationalism in Japan since the 1980s, the production of Japanese movies critical of the war has continued.

Multimodal Communication May Wong,2019-04-29 This book draws on visual data, ranging from advertisements to postage stamps to digital personal photography, to offer a complex interpretation of the different social functions realised by these texts as semiotic artefacts. Framed within the media environment of the city of Hong Kong, the study demonstrates the importance of social context to meaning making and social semiotic multimodal analysis. This book will be of interest to readers in the arts, humanities and social sciences, particularly within the fields of semiotics, visual studies, design studies, media and cultural studies, anthropology and sociology.

Reclaimed Land David Clarke,2002-10-01 Between the end of 1994 and the beginning of 2000 - the last five years of the previous millenium - David Clarke took at least one black-and-white photo every day as he created a unique 'photo diary'. Drawing on this extensive visual archive, Reclaimed Land: Hong Kong in Transition offers a personal and critical perspective on the life of one of the world's most vibrant cities during a time of great change and self-questioning. This innovatively conceived book presents an analysis in deeply considered words and imaginative images of five years of Hong Kong's history whose exact mid-point - midnight on 30 June 1997 - saw the end of British colonial rule and the establishment of the Hong Kong Special Administrative Region of the People's Republic of China. Instead of focussing on the much-documented ceremonial events surrounding the handover itself, however, Reclaimed Land examines a longer term process of physical and cultural transformation of which the events of mid-1997 were but one part. This is an extraordinary and original way of telling the story of those years, and of examining the forces and phenomena behind that story. It can be enjoyed for its photography, considered as an excitingly different way of recording history, and read as a profound reflection on a city foreseeing and then experiencing an historical transformation.

Analysis of Multi-Temporal Remote Sensing Images Lorenzo Bruzzone,Paul Smits,2002-07-12 The development of effective methodologies for the analysis of multi-temporal data is one of the most important and challenging issues that the remote sensing community will face in the next few years. The relevance and timeliness of this issue are directly related to the ever-increasing quantity of multi-temporal data provided by the numerous remote sensing satellites that orbit our planet. The synergistic use of multi-temporal remote sensing data and advanced analysis methodologies results in the possibility of solving complex problems related to the monitoring of the Earth's surface and atmosphere. This book brings together the methodological aspects of multi-temporal remote sensing image analysis, real applications and end-user requirements, presenting the state of the art in this field and contributing to the definition of common research priorities. Researchers and graduate students in the fields of remote sensing, image analysis, and environmental monitoring will appreciate the interdisciplinary approach thanks to the articles written by experts from different scientific communities. Remote Sensing and Image Interpretation Thomas Lillesand,Ralph W. Kiefer,Jonathan Chipman,2015-02-18 Remote Sensing and Image Interpretation, 7th Edition is designed to be primarily used in two ways: as a textbook in the introductory courses in remote sensing and image interpretation, and as a reference for the burgeoning number of practitioners who use geospatial information and analysis in their work. Because of the wide range of academic and professional settings in which this book might be used, we have made the discussion “discipline neutral.” In short, anyone involved in geospatial data acquisition and analysis should find this book to be a valuable text and reference.

Soil and Culture Edward R. Landa,Christian Feller,2010-01-28 SOIL: beneath our feet / food and fiber / ashes to ashes, dust to dust / dirt!Soil has been called the final frontier of environmental research. The critical role of soil in biogeochemical processes is tied to its properties and place-porous, structured, and spatially variable, it serves as a conduit, buffer, and transformer of water, solutes and gases. Yet what is complex, life-giving, and sacred to some, is ordinary, even ugly, to others. This is the enigma that is soil. Soil and Culture explores the perception of soil in ancient, traditional, and modern societies. It looks at the visual arts (painting, textiles, sculpture, architecture, film, comics and stamps), prose & poetry, religion, philosophy, anthropology, archaeology, wine production, health & diet, and disease & warfare. Soil and Culture explores high culture and popular culture-from the paintings of Hieronymus Bosch to the films of Steve McQueen. It looks at ancient societies and contemporary artists. Contributors from a variety of disciplines delve into the mind of Carl Jung and the bellies of soil eaters, and explore Chinese paintings, African mud cloths, Mayan rituals, Japanese films, French comic strips, and Russian poetry.
