Hopping On The Clouds

Jumping Through Clouds Jane Melbourne,2003-04 Jumping through clouds is prohibited because it's like driving through fog the skydiver doesn't know where he is and can't see where he's going. Jumping Through Clouds is reserved for families of victims. Or so it seemed to one victim's mother when her son died of injuries suffered on his first day of instruction. Blinded by grief, blocked from knowing what had happened by conflicting accounts of the accident, she didn't know where she was. Nor where her search for information would take her. A true story. A memoir both personal and political. The book to read before you or someone you love tries skydiving.

Nest of Stones wa Makokha,2010-11-01 Wanjohi wa Makokhas Nest of Stones is the second book of poems, since the publication of Sitawa Namwalies Cut off my Tongue (Storymoja: 2009), devoted in principal to the moment of the 2007-2008 Kenyan Crisis. The crisis is locally known as the Post-Election Violence (PEV). The book collects over sixty pieces of his recent verse chosen on the basis of artistic merit and social relevance. The poems focus sharply on the tumultuous period between the General Elections of 2007 and August 4th Referendum of 2010. Some of the poems relate to events drawn out of earlier moments in Kenyan history but are invoked as contexts of the recent discord. Wa Makokhas interesting narratives are written in the form of lyrical folk verse. The verses are poignant vignettes, out of experiences of different communities and regions of Kenya, serving as repositories of the memory of a tumultuous moment in the life of a nation. Nest of Stones derives its themes from the commonwealth of Kenyan experiences across ethnic and political divides. This idea of the interrelatedness of the peoples inhabiting the Kenyan space; is in a way, a veritable interrogation of the imagined community leitmotif most often recoursed to when analyzing the tensions of co-existence in the postcolonial world. The heart of these amazing poems lies in Kenya but their philosophy of life is universal.

Clouds and Climate A. Pier Siebesma,Sandrine Bony,Christian Jakob,Bjorn Stevens,2020-08-20 Cloud research is a rapidly developing branch of climate science that's vital to climate modelling. With new observational and simulation technologies our knowledge of clouds and their role in the warming climate is accelerating. This book provides a comprehensive overview of research on clouds and their role in our present and future climate, covering theoretical, observational, and modelling perspectives. Part I discusses clouds from three different perspectives: as particles, light and fluid. Part II describes our capability to model clouds, ranging from theoretical conceptual models to applied parameterised representations. Part III describes the interaction of clouds with the large-scale circulation in the tropics, mid-latitudes, and polar regions. Part IV describes how clouds are perturbed by aerosols, the land-surface, and global warming. Each chapter contains end-of-chapter exercises and further reading sections, making this an ideal resource for advanced students and researchers in climatology, atmospheric science, meteorology, and climate change.

Light Weight Mobile cloud Computing Environment For Mobile Application. Dr. Ashad ullah Qureshi,2022-06-01 Resource-intensive Mobile Application (RMA) execution is inhibited by mobile de- vice constrained resources, particularly CPU, RAM, storage, and battery. However, Mobile Cloud Computing (MCC) as the state-of-the-art mobile computing paradigm is aiming to augment computing capabilities of mobile devices, mitigate their resource-deficiency, and realize efficient execution of RMA. MCC solutions dominantly perform remote execution of resource-intensive RMAs' components using resources-rich Distant Immobile Cloud (DIC), particularly public cloud. Although DICs feature high availability and elastic scalability, they are characterized by high communication latency and lack of mobility. Therefore, performance gains of mobile augmentation using DIC are mitigated and RMA execution efficiency is remarkably degraded. In this study, we aim to achieve efficient execution of RMAs by proposing a lightweight MCC framework. We verify the problem significance by analyzing time and energy overheads of exploiting DICs for augmenting resource-constraint mobile devices.

3D Point Cloud Analysis Shan Liu,Min Zhang,Pranav Kadam,C.-C. Jay Kuo,2021-12-10 This book introduces the point cloud; its applications in industry, and the most frequently used datasets. It mainly focuses on three computer vision tasks -- point cloud classification, segmentation, and registration -- which are fundamental to any point cloud-based system. An overview of traditional point cloud processing methods helps readers build background knowledge quickly, while the deep learning on point clouds methods include comprehensive analysis of the breakthroughs from the past few years. Brand-new explainable machine learning methods for point cloud learning, which are lightweight and easy to train, are then thoroughly introduced. Quantitative and qualitative performance evaluations are provided. The comparison and analysis between the three types of methods are given to help readers have a deeper understanding. With the rich deep learning literature in 2D vision, a natural inclination for 3D vision researchers is to develop deep learning methods for point cloud processing. Deep learning on point clouds has gained popularity since 2017, and the number of conference papers in this area continue to increase. Unlike 2D images, point clouds do not have a specific order, which makes point cloud processing by deep learning quite challenging. In addition, due to the geometric nature of point clouds, traditional methods are still widely used in industry. Therefore, this book aims to make readers familiar with this area by providing comprehensive overview of the traditional methods and the state-of-the-art deep learning methods. A major portion of this book focuses on explainable machine learning as a different approach to deep learning. The explainable machine learning methods offer a series of advantages over traditional methods and deep learning methods. This is a main highlight and novelty of the book. By tackling three research tasks -- 3D object recognition, segmentation, and registration using our methodology -- readers will have a sense of how to solve problems in a different way and can apply the frameworks to other 3D computer vision tasks, thus give them inspiration for their own future research. Numerous experiments, analysis and comparisons on three 3D computer vision tasks (object recognition, segmentation, detection and registration) are provided so that readers can learn how to solve difficult Computer Vision problems.

High Performance Computing in Clouds Edson Borin,Lúcia Maria A. Drummond,Jean-Luc Gaudiot,Alba Melo,Maicon Melo Alves,Philippe Olivier Alexandre Navaux,2023-07-05 This book brings a thorough explanation on the path needed to use cloud computing technologies to run High-Performance Computing (HPC) applications. Besides presenting the motivation behind moving HPC applications to the cloud, it covers both essential and advanced issues on this topic such as deploying HPC applications and infrastructures, designing cloud-friendly HPC applications, and optimizing a provisioned cloud infrastructure to run this family of applications. Additionally, this book also describes the best practices to maintain and keep running HPC applications in the cloud by employing fault tolerance techniques and avoiding resource wastage. To give practical meaning to topics covered in this book, it brings some case studies where HPC applications, used in relevant scientific areas like Bioinformatics and Oil and Gas industry were moved to the cloud. Moreover, it also discusses how to train deep learning models in the cloud elucidating the key components and aspects necessary to train these models via different types of services offered by cloud providers. Despite the vast bibliography about cloud computing and HPC, to the best of our knowledge, no existing manuscript has comprehensively covered these topics and discussed the steps, methods and strategies to execute HPC applications in clouds. Therefore, we believe this title is useful for IT professionals and students and researchers interested in cutting-edge technologies, concepts, and insights focusing on the use of cloud technologies to run HPC applications.
