On Becoming Baby Wise Gary Ezzo, Robert Bucknam, 2006 The infant management concepts presented in this book have found favor with over two million parents and twice as many contented babies. On Becoming Babywise brings hope to the tired and bewildered parents looking for an alternative to sleepless nights and fussy babies. The Babywise Parent Directed Feeding concept has enough structure to bring security and order to your baby's world, yet enough flexibility to give mom freedom to respond to any need at any time. It teaches parents how to lovingly guide their baby's day rather than be guided or enslaved to the infant's unknown needs. The information contained within On Becoming Babywise is loaded with success. Comprehensive breast-feeding follow-up surveys spanning three countries, of mothers using the PDF method verify that as a result of the PDF concepts, 88% breast-feed, compared to the national average of only 54% (from the National Center for Health Statistics). Of these breast-feeding mothers, 80% of them breast-feed exclusively without a formula complement. And while 70% of our mothers are still breast-feeding after six months, the national average encourage to follow demand feeding without any guidelines is only 20%. The mean average time of breast-feeding for PDF moms is 33 1/2 weeks, well above the national average. Over 50% of PDF mothers extend their breast-feeding toward and well into the first year. Added to these statistics is another critical factor. The average breast-fed PDF baby sleeps continuously through night seven to eight hours between weeks seven and nine. Healthy sleep in infants is analogous to healthy growth and development. Find out for yourself why a world of parents and pediatricians utilize the concepts found in On Becoming Babywise.

The Second Twelve Months of Life Frank Caplan, Theresa Caplan, 1982-10 Your baby's second year is a wondrous and challenging experience for parents and child as your baby reaches out physically and emotionally for the world beyond mommy and daddy -- to friends, to toys, to sights, sounds, thoughts and words. In these twelve months you will see your baby communicating, identifying, differentiating, recognizing and remembering. Your baby will probably begin to walk alone, run and jump, play simple instructive games, imitate your actions, sing and dance to music, and increasingly demonstrate a desire to do it myself. By the end of this milestone year, your baby will show an expanding range of emotions and ability to express them, show off for an audience, probably talk several dozen words and be able to give as well as receive love.
