Cutting-Edge Technologies and Social Media Use in Higher Education Benson, Vladlena,2014-02-28 This book brings together research on the multi-faceted nature and overarching impact of social technologies on the main opportunities and challenges facing today's post-secondary classrooms, from issues of social capital formation to student support and recruitment--

Social Media Generation in Urban China Hanyun Huang,2014-01-18 Social media such as instant messaging (IM), social networking sites (SNS), blogs and microblogs are an integral part of adolescents' lives in China. Anecdotal evidence reported in the news has suggested that the increasing popularity of social media could make adolescents more vulnerable to being addicted. This exploratory study proposes the concept of "social media addiction" and examines (a) whether social media addiction exists among adolescents in urban China and, if so, who the addicts are, what their symptoms are and to what extent they are addicted; (b) whether sociopsychological traits (e.g., need for affiliation, impression management, narcissism and leisure boredom) can predict social media addiction among adolescents; (c) what gratifications are obtained by adolescents from their use of social media and whether these gratifications can predict social media addiction and (d) to what degree social media addiction influences adolescents' academic performance and social capital. This study employed quantitative questionnaire surveys among adolescents as the main research method, supplemented by qualitative pre-survey focus groups among adolescents and post-survey in-depth interviews among parents and teachers. Questionnaire surveys were conducted based on a multi-stage cluster sampling of seven middle schools in five urban Chinese cities: Beijing, Shanghai, Guangzhou, Shenzhen and Xiamen. The final sample consisted of 1,549 adolescents, of whom 90% had used social media. Using Young's classic definition of Internet addiction, 15.6% of participants were classified as social media addicts. The addicted adolescents were often self-absorbed, bored with their leisure time, and good at using manipulation through social media for impression management. Addicts experienced four major social media addiction symptoms: preoccupation, adverse consequences, alleviation of negative emotions and loss of interest in social activities. The seven social media gratifications identified in this study can be categorized into social, information and entertainment gratifications. Among these, entertainment gratifications had the most power to predict social media addiction, while information gratifications were the least likely to lead to addiction. Furthermore, these gratifications were found to be powerful mediators between the adolescents' sociopsychological traits and social media addiction. Finally, the results also indicated that social media addiction and its symptoms had a significant negative impact on adolescents' academic performance and social capital.

Social Media Strategies for Dynamic Library Service Development Tella, Adeyinka,2014-12-31 As social technologies continue to evolve, it is apparent that librarians and their clientele would benefit through participation in the digital social world. While there are benefits to implementing these technologies, many libraries also face challenges in the integration and usage of social media. Social Media Strategies for Dynamic Library Service Development discusses the integration of digital social networking into library practices. Highlighting the advantages and challenges faced by libraries in the application of social media, this publication is a critical reference source for professionals and researchers working within the fields of library and information science, as well as practitioners and executives interested in the utilization of social technologies in relation to knowledge management and organizational development.

Regulating Content on Social Media Corinne Tan,2018-03-26 How are users influenced by social media platforms when they generate content, and does this influence affect users' compliance with copyright laws? These are pressing questions in today's internet age, and *Regulating Content on Social Media* answers them by analysing how the behaviours of social media users are regulated from a copyright perspective. Corinne Tan, an internet governance specialist, compares copyright laws on selected social media platforms, namely Facebook, Pinterest, YouTube, Twitter and Wikipedia, with other regulatory factors such as the terms of service and the technological features of each platform. This comparison enables her to explore how each platform affects the role copyright laws play in securing compliance from their users. Through a case study detailing the content generative activities undertaken by a hypothetical user named Jane Doe, as well as drawing from empirical studies, the book argues that - in spite of copyright's purported regulation of certain behaviours - users are 'nudged' by the social media platforms themselves to behave in ways that may be inconsistent with copyright laws. Praise for *Regulating Content on Social Media* 'This book makes an important contribution to the field of social media and copyright. It tackles the real issue of how social media is designed to encourage users to engage in generative practices, in a sense effectively "seducing" users into practices that involve misuse or infringement of copyright, whilst simultaneously normalising such practices.' Melissa de Zwart, Dean of Law, Adelaide Law School, Australia This timely and accessible book examines the regulation of content generative activities across five popular social media platforms - Facebook, Pinterest, YouTube, Twitter and Wikipedia. Its in-depth, critical and comparative analysis of the platforms' growing efforts to align terms of service and technological features with copyright law should be of great interest to anyone studying the interplay of law and new media. Reimagining Communication in a Post-pandemic World: The Intersection of Information, Media Technology, and Psychology Runxi Zeng,Hichang Cho,Richard David Evans,Anfan Chen,2023-04-05 The COVID-19 pandemic has dramatically changed social interactions. Social distancing policies, lockdowns, and mandatory quarantines have accelerated the technological mediation of communication (e.g. AI-mediated communication, computer-mediated communication) on an unprecedented scale, willingly or otherwise. Many physical activities such as office work, education, and conferences have had to be performed in the online space through social media apps, the metaverse or specialized programs on mobile phones or laptops as part of pandemic control efforts. As a result, digitally mediated channels have become critical for information acquisition and communication across a wide spectrum of human activities such as education, social interaction, entertainment, and commercial activities. Human beings are increasingly reliant on non-human agents, including social media, Artificial Intelligence (AI) powered tools, or smartphone mobile devices for most routine activities, professional communication, and social interactions. As scientific understanding of COVID-19

improves, pandemic restrictions are gradually loosening. However, it remains to be seen whether the pandemic communication paradigm characterized by heavy technological mediation and reliance on non-human agents will also gradually decline, or will the paradigm shift become deeply entrenched with further acceleration of dependency on technological mediation and non-human agents.

e-Mental Health Davor Mucic, Donald M. Hilty, 2015-10-12 This book describes the use of telecommunication technologies to provide mental health services to individuals in communities or locations that are underserved, typically as a result of their geographic isolation or due to cultural and/or linguistic barriers. The potential of the e-Mental Health approach is demonstrated in various mental health settings by describing concrete clinical examples and applications involving novel strategies for employing technology. Further, the book presents an approach to cooperation on a global level based on the exchange of expertise and knowledge across national boundaries. The target audience includes mental health workers (clinicians and staff members), medical and nursing students, academic researchers, technology professionals and health care policy makers.

Special Library Administration, Standardization and Technological Integration Yap, Joseph M., 2015-09-30 The digital age has transformed the structure and management of libraries around the world. With an increased focus on technology and its use in library management, library professionals seek the best practices and management systems to implement in specialized library settings. Special Library Administration, Standardization and Technological Integration presents the latest scholarly research on the existing and emerging trends in special library management including technological advancements, the importance of social media outlets, and the necessary professional practices to maintain efficiency and success within a library setting. This publication is an essential reference source for academicians, researchers, librarians, and advanced level students interested in the management of special libraries in the digital age.

Influence and Behavior Analysis in Social Networks and Social Media Mehmet Kaya, Reda Alhajj, 2018-12-11 This timely book focuses on influence and behavior analysis in the broader context of social network applications and social media. Twitter accounts of telecommunications companies are analyzed. Rumor sources in finite graphs with boundary effects by message-passing algorithms are identified. The coherent, state-of-the-art collection of chapters was initially selected based on solid reviews from the IEEE/ACM International Conference on Advances in Social Networks, Analysis, and Mining (ASONAM '17). Chapters were then improved and extended substantially, and the final versions were rigorously reviewed and revised to meet the series standards. Original chapters coming from outside of the meeting round out the coverage. The result will appeal to researchers and students working in social network and social media analysis.

Stakeholder Engagement Through Economic Diplomacy Rania Al-Mashat, 2022-01-28 The global economy is currently at an unprecedented juncture. Within the development context, the year 2020 ushered in the Decade of Action for achieving the 2030 Sustainable Development Agenda. The world has embarked on this ambitious declaration while combatting the perils and far-reaching implications of the Covid-19 global pandemic, which threatens progress across all 17 of the United Nations' (UN) Sustainable Development Goals (SDGs), whilst simultaneously placing greater urgency upon their realization. Furthermore, the pandemic has underscored the disproportionate distribution of inequities and vulnerabilities where the poorest and the most vulnerable populations, and the least developed, in-crisis and land-locked developing nations have been affected the most. Fragilities and constraints of resources – both monetary and non-monetary – have in turn highlighted the indisputable role of development cooperation for collective action. To attain this collective action, a process of creating, interpreting, and negotiating meaning to sustainable development is not merely necessary but imperative.

Exploring the Role of Social Media in Health Promotion Michael Stollefson, J. Don Chaney, Beth H. Chaney, Samantha R. Paige, 2020-06-18 The use of social media in public health education/promotion has been increasing due, in part, to its ability to remove physical access and geographical barriers for users. Specifically, social media provides an outlet to increase and promote translational health communication strategies and the effective dissemination of health information and data in ways that allow users to not only utilize, but also to create and share pertinent health information. Although social media applications in public health and health promotion have yielded success in terms of generating support structures and networks for effective health behavior change, there are challenges and complications associated with use of social media that also need to be addressed (e.g., managing misinformation, ensuring compliance with privacy protection regulations). This Special Issue aims to explore social media as a translational health promotion tool by bridging principles of health education and health communication. Broadly, this Special Issue is seeking original submissions that examine: (1) the method with which social media users access, negotiate, and create health information that is both actionable and impactful for diverse audiences; (2) strategies for overcoming challenges to using social media in health promotion; and (3) best practices for designing, implementing, and/or evaluating social media campaigns and forums in public health. Special interest will be given to innovative submissions that expand and build upon traditional health education approaches with health communication theories and models. Other manuscript types of interest include relevant position papers, brief reports, and commentaries.

Exploring the Intersection of Artificial Intelligence and Journalism Santosh Kumar Biswal, Anand J. Kulkarni, 2024-02-02 This book studies the role of Artificial Intelligence (AI) in journalism. It traces the origin, growth and development of the media and communication industry in the globalized world and discusses the implications of technologies such as Augmented Reality, Virtual Reality and Extended Reality which have helped foster a communication revolution across the globe. The volume discusses technology-centric media theories in the context of AI and examines if AI has been a boon or bane for data journalism. It also looks at artificial intelligence in beat reporting, and citizen journalism, and analyses the social-cultural implications of artificial intelligence driven journalism and the ethical concerns arising from it. An important contribution, this book will be indispensable for students and researchers of media studies, communication studies, journalism, social media, technology studies, and digital humanities. It will also be useful for media

professionals.

The Oxford Handbook of Transnational Feminist Movements Rawwida Baksh,Wendy Harcourt,2015-03-25 The Oxford Handbook of Transnational Feminist Movements explores the historical, political, economic and social contexts in which transnational feminist movements have emerged and spread, and the contributions they have made to global knowledge, power and social change over the past half century. The publication of the handbook in 2015 marks the fortieth anniversary of the United Nations International Women's Year, the thirtieth anniversary of the Third World Conference on Women held in Nairobi, the twentieth anniversary of the Beijing Declaration and Platform for Action, and the fifteenth anniversaries of the Millennium Development Goals and of UN Security Council Resolution 1325 on 'women, peace and security'. The editors and contributors critically interrogate transnational feminist movements from a broad spectrum of locations in the global South and North: feminist organizations and networks at all levels (local, national, regional, global and 'glocal'); wider civil society organizations and networks; governmental and multilateral agencies; and academic and research institutions, among others. The handbook reflects candidly on what we have learned about transnational feminist movements. What are the different spaces from which transnational feminisms have operated and in what ways? How have they contributed to our understanding of the myriad formal and informal ways in which gendered power relations define and inform everyday life? To what extent have they destabilized or transformed the global hegemonic systems that constitute patriarchy? From a position of fifty years of knowledge production, activism, working with institutions, and critical reflection, the handbook recognizes that transnational feminist movements form a key epistemic community that can inspire and provide leadership in shaping political spaces and institutions at all levels, and transforming international political economy, development and peace processes. The handbook is organized into ten sections, each beginning with an introduction by the editors. The sections explore the main themes that have emerged from transnational feminist movements: knowledge, theory and praxis; organizing for change; body politics, health and well-being; human rights and human security; economic and social justice; citizenship and statebuilding; militarism and religious fundamentalisms; peace movements, UNSCR 1325 and postconflict rebuilding; feminist political ecology; and digital-age transformations and future trajectories.

The Oxford Handbook of Transnational Feminist Movements Daniel Beland,Christopher Howard,Kimberly J. Morgan,2015-02-25 The American welfare state has long been a source of political contention and academic debate. This Oxford Handbook pulls together much of our current knowledge about the origins, development, functions, and challenges of American social policy. After the Introduction, the first substantive part of the handbook offers an historical overview of U.S. social policy from the colonial era to the present. This is followed by a set of chapters on different theoretical perspectives available for understanding and explaining the development of U.S. social policy. The three following parts of the volume focus on concrete social programs for the elderly, the poor and near-poor, the disabled, and workers and families. Policy areas covered include health care, pensions, food assistance, housing, unemployment benefits, disability benefits, workers' compensation, family support, and programs for soldiers and veterans. The final part of the book focuses on some of the consequences of the U.S. welfare state for poverty, inequality, and citizenship. Many of the chapters comprising this handbook emphasize the disjointed patterns of policy making inherent to U.S. policymaking and the public-private mix of social provision in which the government helps certain groups of citizens directly (e.g., social insurance) or indirectly (e.g., tax expenditures, regulations). The contributing authors are experts from political science, sociology, history, economics, and other social sciences.

Cognition and Interaction: From Computers to Smart Objects and Autonomous Agents Amon Rapp,Maurizio Tirassa,Tom Ziemke,2019-10-10 Cognitive sciences have been involved under numerous accounts to explain how humans interact with technology, as well as to design technological instruments tailored to human needs. As technological advancements in fields like wearable and ubiquitous computing, virtual reality, robotics and artificial intelligence are presenting novel modalities for interacting with technology, there are opportunities for deepening, exploring, and even rethinking the theoretical foundations of human technology use. This volume entitled “Cognition and Interaction: From Computers to Smart Objects and Autonomous Agents” is a collection of articles on the impacts that novel 3 September Frontiers in Psychology 2019 | Cognition and Interaction interactive technologies are producing on individuals. It puts together 17 works, spanning from research on social cognition in human-robot interaction to studies on neural changes triggered by Internet use, that tackle relevant technological and theoretical issues in human-computer interaction, encouraging us to rethink how we conceptualize technology, its use and development. The volume addresses fundamental issues at different levels. The first part revolves around the biological impacts that technologies are producing on our bodies and brains. The second part focuses on the psychological level, exploring how our psychological characteristics may affect the way we use, understand and perceive technology, as well as how technology is changing our cognition. The third part addresses relevant theoretical problems, presenting reflections that aim to reframe how we conceptualize ourselves, technology and interaction itself. Finally, the last part of the volume pays attention to the factors involved in the design of technological artifacts, providing suggestions on how we can develop novel technologies closer to human needs. Overall, it appears that human-computer interaction will have to face a variety of challenges to account for the rapid changes we are witnessing in the current technology landscape.

Information Activism Cait McKinney,2020-07-17 For decades, lesbian feminists across the United States and Canada have created information to build movements and survive in a world that doesn't want them. In Information Activism Cait McKinney traces how these women developed communication networks, databases, and digital archives that formed the foundation for their work. Often learning on the fly and using everything from index cards to computers, these activists brought people and their visions of justice together to organize, store, and provide access to information. Focusing on the transition from paper to digital-based archival techniques from the 1970s to the present, McKinney shows how media technologies animate the collective and unspectacular labor that sustains social movements, including their antiracist and trans-inclusive endeavors. By bringing sexuality studies to bear on media history, McKinney demonstrates how groups with precarious access to control over information create their own innovative and resourceful techniques for generating and sharing knowledge.
