Tamara Ellis Smith

Freddy the Frogcaster and the Huge Hurricane Janice Dean, 2015-07-13 Freddy the Frogcaster is tracking the weather at Frog News Network when he realizes a huge hurricane is coming! Can the town of Lilypad prepare for the storm in time? Can Freddy report the weather on TV and make sure his family and friends are safe? Fox News Meteorologist Janice Dean The Weather Machine continues her beloved Freddy the Frogcaster series in this whirlwind adventure that will leave readers with lasting real-life advice on how to prepare for hurricane season.

Storm Surge Adam Sobel, 2014-10-14 Was Sandy a freak of nature, or the new normal? On October 29, 2012, Hurricane Sandy reached the shores of the northeastern United States to become one of the most destructive storms in history. But was Sandy a freak event, or should we have been better prepared for it? Was it a harbinger of things to come as the climate warms? In this fascinating and accessible work of popular science, atmospheric scientist and Columbia University professor Adam Sobel addresses these questions, combining his deep knowledge of the climate with his firsthand experience of the event itself. Sobel explains the remarkable atmospheric conditions that gave birth to Sandy and determined its path. He gives us insight into the science that led to the accurate forecasts of the storm from genesis to landfall, as well as an understanding of why our meteorological vocabulary failed our leaders in warning us about this unprecedented weather system—part hurricane, part

winter-type nor'easter, fully deserving of the title Superstorm. Storm Surge brings together the melting glaciers, the warming oceans, and a broad historical perspective to explain how our changing climate and developing coastlines are making New York and other cities more vulnerable. Engaging, informative, and timely, Sobel's book provokes us to think differently about how we can better prepare for the storms in our future.

Hurricanes Benjamin Hojem, 2010 Explains how hurricanes originate, and where and how they strike.

Hurricane Audrey Post, Cathy Cagle, 2007-04-30 This narrative re-creates Hurricane Audrey through the eyes of the survivors in a combination of suspense, family drama, and the struggle for life over death. In the midnight hours of June 27, 1957, the hurricane exploded in intensity and speed, slamming into the sleeping coast at dawn 12 hours ahead of its predicted landfall. Many unsuspecting residents woke that morning to find water already inside their homes. Their ordeal transports the reader back to 1957 with a new appreciation and understanding of how Cameron Parish residents clung to life during the category-four storm.

Hurricane Season Fernanda Melchor, 2020-10-06 The English-language debut of one of the most thrilling and accomplished young Mexican writers Winner of the Queen Sofía Spanish Institute's Translation Prize Longlisted for the National Book Award Shortlisted for the Booker Prize Winner of the Internationaler Literaturpreis New York Public Library Best Books of 2020

Chicago Public Library Best Book of 2020 *The Witch is dead*. And the discovery of her corpse has the whole village investigating the murder. As the novel unfolds in a dazzling linguistic torrent, with each unreliable narrator lingering on new details, new acts of depravity or brutality, Melchor extracts some tiny shred of humanity from these characters—innies whom most people would write off as irredeemable—forming a lasting portrait of a damned Mexican village. Like Roberto Bolano's 2666 or Faulkner's novels, *Hurricane Season* takes place in a world saturated with mythology and violence—real violence, the kind that seeps into the soil, poisoning everything around: it's a world that becomes more and more terrifying the deeper you explore it.

Hurricanes Rochelle Baltzer, 2011-09-01 Clear, easy-to-read text pairs with oversized, gripping photos to introduce readers to the basics of hurricanes. Readers will learn why they happen, where they form, and how they change land and affect communities. A simple, labeled diagram illustrates the inside of a hurricane. A Case Study chapter discusses Hurricane Katrina, while a map aids comprehension. Damage, safety methods, rescue missions, measurement, and prediction are also covered. Breaking News fact boxes appear throughout, and the book concludes with a News Flash! facts page. This compelling title will leave readers feeling more informed about the hurricanes they hear about in the news. Features include a table of contents, a glossary with phonetic spellings, and an index. Big Buddy BOOKS is an imprint of ABDO Publishing Company.

Hurricane Hits the Coast Louise Spilsbury, Richard Spilsbury, 2017-12-15 The Atlantic coast of the United States faces high winds, torrential rain, and more during hurricane season from about August to October. When these huge storms hit land, the streets may flood and buildings can be completely leveled. Seeing devastation like that on the news can leave readers with a lot of questions. This book introduces readers to how hurricanes form, why they can be so strong, and what communities do to prepare for them. Stories of recent hurricanes make these huge storms seem more real to readers and help them understand the consequences of natural disasters.

Hurricane Watch Jack Williams, Bob Sheets, 2002-02-05 The ultimate guide to the ultimate storms, Hurricane Watch is a fascinating blend of science and history from one of the world's foremost meteorologists and an award-winning science journalist. This in-depth look at these awe-inspiring acts of nature covers everything from the earliest efforts by seafarers at predicting storms to the way satellite imaging is revolutionizing hurricane forecasting. It reveals the latest information on hurricanes: their effects on ocean waves, the causes of the variable wind speeds in different parts of the storm, and the origins of the super-cooled shafts of water that vent at high altitudes. Hurricane Watch is a compelling history of man's relationship with the deadliest storms on earth. Includes: - The story of the nineteenth-century Cuban Jesuit whose success at predicting the great cyclones was considered almost mystical. - A new look at Isaac Cline, whose infamous failure to

predict the Galveston Hurricane left him obsessed with the devastating effects of storm surge. - The story of the Hurricane Hunters, including the first man ever to deliberately fly into a hurricane. - A complete account of how computer modeling has changed hurricane tracking. - A history of Project Stormfury: the only significant, organized effort to reduce the damaging strength of severe hurricanes. - A unique firsthand account of Hurricane Andrew by both authors, who were at the National Hurricane Center when Andrew struck. - A listing of the deadliest storms in history.

Mangled by a Hurricane! Miriam Aronin, 2010-01-01 On August 28, 2005, Trina Peters heard some alarming news—Hurricane Katrina was headed straight for her hometown of New Orleans, Louisiana. Though officials recommended evacuating the city, Trina and her daughter decided to stay in their home. However, the powerful hurricane caused their house to flood, and they had to climb up on their roof to stay above the rising water. Stranded on the roof in roaring winds and pouring rain, could Trina and her daughter survive the storm? Eyewitness accounts and incredible photos bring to life the experiences of ordinary people who faced catastrophic danger—and lived to tell their stories. Kids will discover the causes and characteristics of hurricanes, and learn about efforts to rebuild and prepare for future storms. Safety tips show young readers what to do in case a hurricane strikes.

Storm Chasers Trudi Strain Trueit, 2002 Explains how scientists are able to predict, measure, and follow tornadoes and hurricanes.

Hurricane Andrew Langley, 2014-07-03 What is it like to witness a hurricane? This book looks at Hurricane Sandy and other major storms, using firsthand accounts to describe events and people's experiences, providing multiple perspectives from eyewitnesses, survivors, the emergency services, scientists, and the media.--Provided by publisher.

Chasing Catastrophe Rick Leventhal, 2023-01-24 From the front lines in Iraq, Afghanistan, Libya, and other conflict zones to the base of the burning Twin Towers on 9/11 to the eye of countless hurricanes, Rick Leventhal chronicles some of the most amazing stories he's covered in his thirty-five years as a news reporter, anchor, and Senior Correspondent—with some life lessons thrown in along the way. Part memoir and part leadership manifesto, *Chasing Catastrophe* empowers those who are ready to work hard to overcome adversity and achieve their goals. In this book, Rick Leventhal shares some incredible highlights and some of the most challenging moments of a career spanning thirty-five years. Rick shares what it was like to sleep in the dirt in the Iraqi desert; to stand at the base of the Twin Towers in flames and run from the smoke cloud when they fell; to face a Category 5 hurricane; to be on scene when one of America's most cheered and respected race car drivers crashed and died; to hurry to the frozen Hudson River from Midtown after Captain Sully landed his plane on its icy surface; to separate fact from fiction on the fly and figure out what could be reported—and what couldn't; and to be in awe meeting some of the most famous people in America, only to

learn they were fans of his work.

Storm of the Century Willie Drye, 2019-08-01 In 1934, hundreds of jobless World War I veterans were sent to the remote Florida Keys to build a highway from Miami to Key West. The Roosevelt Administration was making a genuine effort to help these down-and-out vets, many of whom suffered from what is known today as post-traumatic stress disorder. But the attempt to help them turned into a tragedy. The supervisors in charge of the veterans misunderstood the danger posed by hurricanes in the low-lying Florida Keys. In late August 1935, a small, stealthy tropical storm crossed the Bahamas, causing little damage. When it entered the Straits of Florida, however, it exploded into one of the most powerful hurricanes on record. But US Weather Bureau forecasters could only guess at its exact position, and their calculations were well off the mark. The hurricane that struck the Upper Florida Keys on the evening of September 2, 1935 is still the most powerful hurricane to make landfall in the US. Supervisors waited too long to call for an evacuation train from Miami to move the vets out of harm's way. The train was slammed by the storm surge soon after it reached Islamorada. Only the 160-ton locomotive was left upright on the tracks. About 400 veterans were left unprotected in flimsy work camps. Around 260 of them were killed. This is their story, with newly discovered photos and stories of some of the heroes of the Labor Day 1935 calamity.

Hurricane Andrew Victoria Sherrow, 1998 This book looks at stories of real

people who survived this devastating natural disaster. Action oriented accounts of survivors put the reader in the center of the storm.

Superstorm Kathryn Miles, 2014

Another Kind of Hurricane Tamara Ellis Smith, 2015-07-14 In this stunning debut novel, two very different characters—a black boy who loses his home in Hurricane Katrina and a white boy in Vermont who loses his best friend in a tragic accident—come together to find healing. A hurricane, a tragic death, two boys, one marble. How they intertwine is at the heart of this beautiful, poignant book. When ten-year-old Zavion loses his home in Hurricane Katrina, he and his father are forced to flee to Baton Rouge. And when Henry, a ten-year-old boy in northern Vermont, tragically loses his best friend, Wayne, he flees to ravaged New Orleans to help with hurricane relief efforts—and to search for a marble that was in the pocket of a pair of jeans donated to the Red Cross. Rich with imagery and crackling with hope, this is the unforgettable story of how lives connect in unexpected, even magical, ways. “In Smith’s poetic hands, this poignant story barrels across the pages and into the reader’s heart, reminding us that magic can arise from the deepest tragedy.” —Kathi Appelt, Newbery Honor Award winner and two-time National Book Award Finalist

Rusty and the Hurricane Michele Dufresne, 2020-09 Rusty and his family prepare for a hurricane.

Hurricane Terry Trueman, 2012-07-24 The powerful story of a boy's fear and

courage in the face of a force of nature too huge to even imagine. Based on Hurricane Mitch's devastation of Honduras in 1998, Terry Trueman's acclaimed Hurricane is a gripping, realistic story told from the perspective of a hurricane survivor. After hours of cowering in the dark with no lights, no warmth, and the terrible noises of the rain and wind pounding on the walls, José walks out his front door and steps into a nightmare. Everything is gone. Everything except for the desperate courage of those who survived that terrifying night. But his nightmare has only begun as he and the few who are left in his small village dig for survivors, search for food and water, and try to start pulling their lives back together.

Fifteen Hurricanes That Changed the Carolinas Jay Barnes, 2022-03-16 This informative and engaging book tells the true stories of the hurricanes that had the greatest impact on North Carolina and South Carolina, from the eighteenth century to the present day. Hurricane historian Jay Barnes offers an illuminating and compelling account of the Carolinas' most recent storm disasters, Matthew and Florence, as well as thirteen other memorable hurricanes in the Tar Heel and Palmetto States, including Hazel, Hugo, Fran, and Floyd. In Barnes's hands, the examination of these powerful tropical cyclones leads to a broader view of the history of the Carolinas, revealing not only their terrifying and deadly consequences but also the perseverance of the region's people in the face of such extraordinary disasters. In recounting the rich hurricane history of the Carolinas, from the mountains to

the coast, Barnes urges readers to consider the storms to come and profiles how a warming planet and rising seas will affect future Carolina hurricanes.

The Galveston Hurricane of 1900 Charles River Charles River
Editors, 2017-01-26 *Includes pictures *Includes survivors' accounts of the hurricane *Includes a bibliography for further reading First news from Galveston just received by train which could get no closer to the bay shore than six miles where the prairie was strewn with debris and dead bodies. About 200 corpses counted from the train. Large steamship stranded two miles inland. Nothing could be seen of Galveston. Loss of life and property undoubtedly most appalling. Weather clear and bright here with gentle southeast wind. - G.L. Vaughan, Manager of Western Union in Houston, in a telegram to the Chief of the U.S. Weather Bureau on the day after the hurricane. In 2005, the world watched in horror as Hurricane Katrina decimated New Orleans, and the calamity seemed all the worse because many felt that technology had advanced far enough to prevent such tragedies, whether through advanced warning or engineering. At the same time, that tends to overlook all of the dangers posed by hurricanes and other phenomena that produce natural disasters. After all, storms and hurricanes have been wiping out coastal communities ever since the first humans built them. As bad as Hurricane Katrina was, the hurricane that struck Galveston, Texas on September 8, 1900 killed several times more people, with an estimated death toll between 6,000-12,000 people. Prior to advanced communications, few

people knew about impending hurricanes except those closest to the site, and in the days before television, or even radio, catastrophic descriptions were merely recorded on paper, limiting an understanding of the immediate impact. Stories could be published after the water receded and the dead were buried, but by then, the immediate shock had worn off and all that remained were the memories of the survivors. Thus, it was inevitable that the Category 4 hurricane wrought almost inconceivable destruction as it made landfall in Texas with winds at 145 miles per hour. It was only well into the 20th century that meteorologists began to name storms as a way of distinguishing which storm out of several they were referencing, and it seems somewhat fitting that the hurricane that traumatized Galveston was nameless. Due to the lack of technology and warning, many of the people it killed were never identified, and the nameless corpses were eventually burned in piles of bodies that could not be interred due to the soggy soil. Others were simply buried at sea. The second deadliest hurricane in American history claimed 2,500 lives, so it's altogether possible that the Galveston hurricane killed over 4 times more than the next deadliest in the U.S. To this day, it remains the country's deadliest natural disaster. The Galveston Hurricane of 1900 chronicles the story of the deadliest hurricane in American history. Along with pictures of important people, places, and events, you will learn about the Galveston Hurricane like never before, in no time at all.
