Mobile Brain-Body Imaging and the Neuroscience of Art, Innovation and Creativity Jose L. Contreras-Vidal, Dario Robleto, Jesus G. Cruz-Garza, José M. Azorín, Chang S. Nam, 2019-11-15 Mobile Brain–Body Imaging and the Neuroscience of Art, Innovation and Creativity is a trans-disciplinary, collective, multimedia collaboration that critically uncovers the challenges and opportunities for transformational and innovative research and performance at the nexus of art, science and engineering. This book addresses a set of universal and timeless questions with a profound impact on the human condition: How do the creative arts and aesthetic experiences engage the brain and mind and promote innovation? How do arts–science collaborations employ aesthetics as a means of problem-solving and thereby create meaning? How can the creative arts and neuroscience advance understanding of individuality and social cognition, improve health and promote life-long learning? How are neurotechnologies changing science and artistic expression? How are the arts and citizen science innovating neuroscience studies, informal learning and outreach in the public sphere? Emerging from the 2016 and 2017 International Conferences on Mobile Brain–Body Imaging and the Neuroscience of Art, Innovation and Creativity held in Cancun, Mexico and Valencia, Spain to explore these topics, this book intertwines disciplines and investigates not only their individual products—art and data—but also something more substantive and unique; the international pool of contributors reveals something larger about humanity by revealing the state of the art in collaboration between arts and sciences and providing an investigational roadmap projected from recent advances. Mobile Brain–Body Imaging and the Neuroscience of Art, Innovation and Creativity is written for academic researchers, professionals working in industrial and clinical centers, independent researchers and artists from the performing arts, and other readers interested in understanding emergent innovations at the nexus of art, science, engineering, medicine and the humanities. The book contains language, design features (illustrations, diagrams) to develop a conversational bridge between the disciplines involved supplemented by access to video, artistic presentations and the results of a hackathon from the MoBI conferences.

Dialogues on Mobile Communication Adriana de Souza e Silva, 2016-10-04 In this book, top scholars in the field of mobile communication discuss the major issues related to the use of mobile phones in today’s society, such as the tension between private and public, youth mobile culture, creative appropriations of mobile devices, and mobile methods. Each chapter unfolds as an open dialogue between scholars and graduate students of communication. They contain an introduction by a student, followed by a short lecture and a question and answer section with the students, and a closing statement by a student that responds to the scholar’s argument. The book is a valuable resource not only for individuals interested in mobile communication, but also students and teachers willing to use the affordances of mobile media to expand the physical boundaries of classrooms and promote collaborative learning practices.

Rather than focus on specific technologies, expert authors discuss how best to utilize technology in the service of improving teaching and learning. For more than a decade, researchers and practitioners have been exploring this area of study as the growing popularity of smartphones, tablets, and other such devices, as well as the increasingly sophisticated applications for these devices, has allowed educators to accommodate and support an increasingly mobile society. This handbook provides the first authoritative account of the theory and research that underlies mobile learning, while also exemplifying models of current and future practice.

I Have No Mouth & I Must Scream Harlan Ellison,2014-04-29 Seven stunning stories of speculative fiction by the author of A Boy and His Dog. In a post-apocalyptic world, four men and one woman are all that remain of the human race, brought to near extinction by an artificial intelligence. Programmed to wage war on behalf of its creators, the AI became self-aware and turned against humanity. The five survivors are prisoners, kept alive and subjected to brutal torture by the hateful and sadistic machine in an endless cycle of violence. This story and six more groundbreaking and inventive tales that probe the depths of mortal experience prove why Grand Master of Science Fiction Harlan Ellison has earned the many accolades to his credit and remains one of the most original voices in American literature. I Have No Mouth and I Must Scream also includes “Big Sam Was My Friend,” “Eyes of Dust,” “World of the Myth,” “Lonelyache,” Hugo Award finalist “Delusion for a Dragon Slayer,” and Hugo and Nebula Award finalist “Pretty Maggie Moneyeyes.”

Wonderstruck Helen De Cruz,2024-03-26 A philosopher explores the transformative role of wonder and awe in an uncertain world Wonder and awe lie at the heart of life’s most profound questions. Wonderstruck shows how these emotions respond to our fundamental need to make sense of ourselves and everything around us, and how they enable us to engage with the world as if we are experiencing it for the first time. Drawing on the latest psychological insights on emotions, Helen De Cruz argues that wonder and awe are emotional drives that motivate us to inquire and discover new things, and that humanity has deliberately nurtured these emotions in cultural domains such as religion, science, and magic. Tracing how wonder and awe unify philosophy, the humanities, and the sciences, De Cruz provides new perspectives on figures such as Plato, Aristotle, Adam Smith, William James, Rachel Carson, Maurice Merleau-Ponty, Jean-Paul Sartre, and Abraham Heschel. Along the way, she explains how these singular emotions empower us to be open-minded, to experience joy and hope, and to be resilient in the face of personal troubles and global challenges. Taking inspiration from Descartes’s portrayal of wonder as “that sudden surprise of the soul,” this illuminating book reveals how wonder and awe are catalysts that can help us reclaim what makes life worth living and preserve the things we find wonderful and valuable in our lives.

An Elegant Puzzle Will Larson,2019-05-20 A human-centric guide to solving complex problems in engineering management, from sizing teams to handling technical debt. There’s a saying that people don’t leave companies, they leave managers. Management is a key part of any organization, yet the discipline is often self-taught and unstructured. Getting to the good solutions for complex management challenges can make the difference between fulfillment and frustration for teams—and, ultimately, between the success and failure of companies. Will Larson’s An Elegant Puzzle focuses on the particular challenges of engineering management—from sizing teams to handling technical debt to performing succession planning—and provides a path to the good solutions. Drawing from his experience at Digg, Uber, and Stripe, Larson has developed a thoughtful approach to engineering management for leaders of all levels at companies of all sizes. An Elegant Puzzle balances structured principles and human-centric thinking to help any leader create more effective and rewarding organizations for engineers to thrive in.

“Slava Ukraini!” Ilmari Kähkö,2023-12-06 “Slava Ukraini!” Strategy and the Spirit of Ukrainian Resistance tells the story of the volunteers lauded to have saved Ukraine twice. The volunteers first emerged in the spring of 2014 after the onset of the war in Donbas in a context characterized by ambiguity, state weakness, political uncertainty, and threat. They re-emerged again in February 2022 after the large-scale Russian invasion. Aimed at an interdisciplinary audience, this volume makes significant contributions to our understanding of events in Ukraine over the past decade. Based on ethnographic fieldwork with volunteer battalion fighters, the volume focuses on strategy, or the creation, control, and use of force. This framework is first applied to the volunteer militias to further the understanding of militia strategy conducted after 2014, and then to the first year and a half that followed the Russian invasion in 2022. “Slava Ukraini!” also discusses the long-term sociological impact of volunteer battalions and the war they fought in Ukraine. The Ukrainian spirit of resistance emerged first on the Maidan in November 2013, ignited the volunteer Spirit of 2014 after the Russian invasion and annexation of Crimea, and ultimately flared-up on a national scale in a manner which surprised the invading Russian forces in 2022. Yet initially the volunteers may also have exacerbated internal divisions in Ukraine. The Spirit of 2014 was also better suited to a war of movement than immobile trench warfare that left little room for heroism and aggressive soldiering. Unrealistic expectations about modern warfare led to disillusionment, and many volunteers leaving the war in 2015. The perceived stalemate and lack of Ukrainian soldiers by late 2023 raised the question of a similar dynamic witnessed in 2014 and 1914 alike.
