Odoo Docker: Practical Tricks to Create Your Custom Odoo Docker Image Akhmad Daniel Sembiring, So, you have reached at a point to implement Odoo

not in the default standard way.. Where your Odoo implementation has required that many instances running in parallel and can't be handled with a single or two servers anymore.. And the decision is to utilize Docker, as it can be scaled and managed easily as the client request increased dramatically. Then. This book is for you.. Docker will reduce the complexity of implementing a software system that requires many supporting subsystems, libraries, external program, where sometimes a small difference of minor version or setting can cause the whole system failed to work. Docker will solve the 'it works in my laptop' problem we commonly face while working with developers. I will teach you how to start creating your custom Odoo Docker Image, begins with running the official one that we got from Odoo, then tweak it to suit your needs and start generating your custom image. Direct to the point, not that much theory. Then I will also teach you how to integrate your custom image to a GitHub repository (Gitlab works as well), so that every commit to the repository will automatically create a new image version.. Or, when you need to pull the repository on every docker container restart.. Or, when you need to clone the repository on every docker container restart.. I will teach you all of those practical things step by step, no need for any prior knowledge of Docker, just a little bit of Linux standard commands. Please also check my other course on how to manage the docker containers in Kubernetes environment to achieve the autoscaling and zero downtime for our Odoo instances. Hope you find this course useful for your daily jobs.

Nondestructive Testing in Composite Materials Carosena Meola, 2020-12-04 In this era of technological progress and given the need for welfare and safety, everything that is manufactured and maintained must comply with such needs. We would all like to live in a safe house that will not collapse on us. We would all like to walk on a safe road and never see a chasm open in front of us. We would all like to cross a bridge and reach the other side safely. We all would like to feel safe and secure when taking a plane, ship, train, or using any equipment. All this may be possible with the adoption of adequate manufacturing processes, with non-destructive inspection of final parts and monitoring during the in-service life of components. Above all, maintenance should be imperative. This requires effective non-destructive testing techniques and procedures. This Special Issue is a collection of some of the latest research in these

areas, aiming to highlight new ideas and ways to deal with challenging issues worldwide. Different types of materials and structures are considered, different non-destructive testing techniques are employed with new approaches for data treatment proposed as well as numerical simulations. This can serve as food for thought for the community involved in the inspection of materials and structures as well as condition monitoring.

Preaching to a Multi-generational Assembly Andrew-Carl Wisdom, 2004 With the acceleration of technological change, new and distinct generations are created faster than before. Generational boundaries become more fluid. Multiple age groups have different generational mindsets, distinct worldviews, and varied spiritual needs. How, then, do preachers speak to congregations that comprise four to five separate generations? *Preaching to a Multi-generational Assembly* addresses how to effectively and credibly preach to all generations at the same time. In *Preaching to a Multi-generational Assembly* Andrew Cal Wisdom offers a credible, new homiletic model to make Catholic preaching more exciting, accessible, and effective for both the assembly and preacher by making it more generationally relevant. He reflects upon the current state of preaching through Catholic and Protestant voices. He argues from communication theory that generation is a subculture like ethnicity and race and should be seriously considered in homiletic preparation. He applies contemporary marketing segmentation theory to preaching in proposing a qualified generational segmentation of the Sunday assembly. Finally, he combines both theories to demonstrate both the opportunity and viability of intergenerational preaching in a Catholic context. Chapters are *Why Effective Preaching Is a Priority: The Problem, - *The Genesis of the Catholic Homily, - *Intergenerational Preaching as a Sacred Dance Between Culture, Language, and Meaning, - *What the Preacher Can Learn from the Marketer, - *The Catholic Sacramental Imagination: A Generational Bridge, - *Does It Work? The Mechanics of Intergenerational Preaching, - and *So What. - Includes tales, graphs, and a conclusion with practical suggestions on how to become an effective and credible intergenerational preacher.
