Strategy and Communication for Innovation Nicole Pfeffermann,Tim Minshall,Letizia Mortara,2014-01-09 The innovation economy sets new standards for global business and requires efficient innovation management to plan, execute and evaluate innovation activities, establish innovation capability and coordinate resources and capacities for innovation on an intra- and inter-organizational level. Communication has become a critical factor underpinning successful innovation. As a new communication field, innovation communication facilitates the successful launches of new products and services, the establishment of stakeholder relationships, and the strengthening of corporate reputation in the long-run. Consequently, firms today need to develop a strong portfolio of communication tools as an integral part of their strategic innovation management activities. This new edition mainly concentrates on emerging approaches and methods for integrating communication as part of strategic innovation management. A key theme is the provision of an integrated perspective to bridge the gap between innovation management and communication management at both strategic and operational levels. This book makes an important contribution to this evolving academic domain by providing multiple perspectives on the latest research on innovation communication and strategic open innovation. It also provides guidance for managers seeking to understand the diverse ways by which they can leverage communication to support successful innovation.

Advanced Data Acquisition and Intelligent Data Processing Vladimir Haasz,Kurosh Madani,2022-09-01 DAQ and data processing is a basic part of all automated production systems, diagnostic systems, watching over quality of production, energy distribution, transport control or in various other areas. Demands on the speed, accuracy and reliability increase in general. It is possible to achieve not only using superior (but also more expensive) hardware, but also applying advanced data acquisition and intelligent data processing. It deals e.g. optimal data fusion of a number of sensors, new stochastic methods for accuracy increasing, new algorithms for acceleration of data processing, etc. These are the grounds for publishing this book. Advanced Data Acquisition and Intelligent Data Processing offers 10 up-to-date examples of different applications of advanced data acquisition and intelligent data processing used in monitoring, measuring and diagnostics systems. The book arose based on the most interesting papers from this area published at IDAACS?2013 conference. However, the individual chapters include not only designed solution in wider context but also relevant theoretical parts, achieved results and possible future ways. Technical topics discussed in this book include: • advanced methods of data acquisition in application that are not routine;• measured data fusion using up-to-date advanced data processing;• nonlinear dynamical systems identification;• multidimensional image processing. Advanced Data Acquisition and Intelligent Data Processing is ideal for personnel of firms deals with advanced instrumentation, energy consumption monitoring, environment monitoring, non-destructive diagnostics robotics, etc., as well as academic staff and postgraduate students in electrical, control and computer engineering. Content: 1. Introduction; 2. Waveform acquisition with resolutions exceeding those of the ADC employed; 3. Different Disaggregation Algorithms in Non-Intrusive Home Energy Monitoring Systems; 4. Design and testing of an electronic nose system sensitive to the aroma of truffles; 5. DAQ System for Ultrasonic Transducer Evaluation under Spread Spectrum Excitation; 6. Optimal Data Fusion in Decentralized Stochastic Unknown Input Observers; 7. Odor Classification by Neural Networks; 8. ANFIS Based Approach for Improved Multisensors Signal Processing; 9. Neuro-Fuzzy Sensor's Linearization Based FPGA; 10. Interpolation Method of Nonlinear Dynamical Systems Identification Based on Volterra Model in Frequency Domain ; 11. Training Cellular Automata for Hyperspectral Image Segmentation

Places of Invention Arthur P. Molella,Anna Karvellas,2015-06-30 The companion book to an upcoming museum exhibition of the same name, Places of Invention seeks to answer timely questions about the nature of invention and innovation: What is it about some places that sparks invention and innovation? Is it simply being at the right place at the right time, or is it more than that? How does “place”—whether physical, social, or cultural—support, constrain, and shape innovation? Why does invention flourish in one spot but struggle in another, even very similar location? In short: Why there? Why then? Places of Invention frames current and historic conversation on the relationship between place and creativity, citing extensive scholarship in the area and two decades of investigation and study from the National Museum of American History’s Lemelson Center for the Study of Invention and Innovation. The book is built around six place case studies: Hartford, CT, late 1800s; Hollywood, CA, 1930s; Medical Alley, MN, 1950s; Bronx, NY, 1970s; Silicon Valley, CA, 1970s–1980s; and Fort Collins, CO, 2010s. Interspersed with these case studies are dispatches from three “learning labs” detailing Smithsonian Affiliate museums’ work using Places of Invention as a model for documenting local invention and innovation. Written by exhibition curators, each part of the book focuses on the central thesis that invention is everywhere and fueled by unique combinations of creative people, ready resources, and inspiring surroundings. Like the locations it explores, Places of Invention shows how the history of invention can be a transformative lens for understanding local history and cultivating creativity on scales of place ranging from the personal to the national and beyond.

Apps rEvolution Erika Olimpiew,Vivek Srinivasan,2013-10-21 Apps are like valets, expected to serve people whenever and wherever they are, on whatever device they have. They represent the future of how

enterprises interact with customers, employees, partners and machines, as we increasingly access the Internet and control our world from the palms of our hands. From a technology perspective, the apps revolution is redefining how applications are created, distributed and consumed. It is upending the traditional client-server, browser-centric web model and breaking up monolithic applications. The revolution can be viewed through five lenses: apps experience, apps everywhere, apps DNA, apps platforms and apps economy. Business people and consumers will want to read about the value this revolution is ushering in as our enterprises continue to embrace the consumerization of IT. The apps economy is worth billions today and growing; this economy did not exist five years ago. Learn how context, new modes of interaction such as eye gaze and haptics, connected things, application programming interfaces, DIY development, and an outside-in approach to IT are driving the revolution. Simply put, the Apps rEvolution is about business change – creating new experiences, inventing new products and services, and redefining customer service while improving productivity and efficiency.

CrowdRising Lorinda R. Rowledge, 2019-07-05 Open innovation enabled through crowdsourcing is one of the hottest topics in management strategy today. Particularly striking – and of vital importance to the world – are the pioneering efforts to apply crowdsourcing technology and open innovation to solve social, environmental, and economic sustainability challenges. CrowdRising sets out these challenges as context and then highlights the experiences of leaders and early adopters, identifies implementation guidelines, critical success factors and lessons learned, and finally projects where the field is going in the future. With a strong focus on the applications of crowdsourcing for innovation, engagement, and market intelligence, the book profiles the initiatives of companies, NGOs, and technology providers using crowdsourcing to develop these solutions to global problems. It addresses the key challenges impacting organizations: 1) identifying more sustainable ways to design, distribute, transport, recycle, and repurpose products; and 2) discovering and implementing the systems needed to transform global economic growth, drive human prosperity, and replenish the planet's resources.

Make, Learn, Succeed Mark Gura, 2016-06-06 In order to adequately prepare students for success in their lifetimes, our schools need to be transformed into environments that encourage students to evolve and develop as creative individuals. Educators are challenged to establish an instructional practice that will encourage and support the development of student creativity as well as meet curricular goals and assessments. In this book, author Mark Gura shows that yes, creativity can be developed and—with the variety of technology resources currently available—doing so is not only possible, but practical and effective. Through examples and practical approaches the book guides educators in:

- weaving Maker, STEAM, Robotics, and Gaming into Instruction
- encouraging motivation, entrepreneurship, curiosity, and play
- teaching creativity across the curriculum
- finding technology tools and resources to support student creativity

Mobile Health Sasan Adibi, 2015-02-18 This book offers a comprehensive report on the technological aspects of Mobile Health (mHealth) and discusses the main challenges and future directions in the field. It is divided into eight parts: (1) preventive and curative medicine; (2) remote health monitoring; (3) interoperability; (4) framework, architecture, and software/hardware systems; (5) cloud applications; (6) radio technologies and applications; (7) communication networks and systems; and (8) security and privacy mechanisms. The first two parts cover sensor-based and bedside systems for remotely monitoring patients' health condition, which aim at preventing the development of health problems and managing the prognosis of acute and chronic diseases. The related chapters discuss how new sensing and wireless technologies can offer accurate and cost-effective means for monitoring and evaluating behavior of individuals with dementia and psychiatric disorders, such as wandering behavior and sleep impairments. The following two parts focus on architectures and higher level systems, and on the challenges associated with their interoperability and scalability, two important aspects that stand in the way of the widespread deployment of mHealth systems. The remaining parts focus on telecommunication support systems for mHealth, including radio technologies, communication and cloud networks, and secure health-related applications and systems. All in all, the book offers a snapshot of the state-of-art in mHealth systems, and addresses the needs of a multidisciplinary audience, including engineers, computer scientists, healthcare providers, and medical professionals, working in both academia and the industry, as well as stakeholders at government agencies and non-profit organizations.

Internet of Behaviors Implementation in Organizational Contexts Carvalho, Luísa Cagica, Silveira, Clara, Reis, Leonilde, Russo, Nelson, 2023-11-01 Internet of behaviors (IoB), also known as the internet of behavior, emerged as a natural consequence of the internet of things (IoT) and artificial intelligence (AI). IoB is an area of investigation that compiles three fields of study: IoT, data analysis, and behavioral science. IoB seeks to explain the data obtained from a behavioral point of view, analyzing human interaction with technology and referring to the process by which user-controlled data is evaluated from a behavioral psychology perspective. Internet of Behaviors Implementation in Organizational Contexts explores internet of behaviors solutions that promote people's quality of life. This book explores and discusses, through innovative studies, case studies, systematic literature reviews, and reports. The content within this publication represents research encompassing the internet of behaviors, internet of things, big data, artificial intelligence, blockchain, smart cities, human-centric approach for digital technologies, ICT sustainability, and more. This vital reference source led by an editor with over two decades of experience is optimized for university professors, researchers, undergraduate and graduate level students, and business managers and professionals across several industries related to or utilizing the internet of things (IoT).

The Industries of the Future Alec Ross, 2016-02-02 The New York Times bestseller, from leading innovation expert Alec Ross, a "fascinating vision" (Forbes) of what's next for the world and how to navigate the changes the future will bring. While Alec Ross was working as Senior Advisor for Innovation to the Secretary of State, he traveled to forty-one countries, exploring the latest advances coming out of every continent. From startup hubs in Kenya to R&D labs in South Korea, Ross has seen what the future holds. In The Industries of the Future, Ross provides a "lucid and informed guide" (Financial Times) to the changes coming in the next ten years. He

examines the fields that will most shape our economic future, including robotics and artificial intelligence, cybercrime and cybersecurity, the commercialization of genomics, the next step for big data, and the impact of digital technology on money and markets. In each of these realms, Ross addresses the toughest questions: How will we have to adapt to the changing nature of work? Is the prospect of cyberwar sparking the next arms race? How can the world's rising nations hope to match Silicon Valley with their own innovation hotspots? And what can today's parents do to prepare their children for tomorrow? Ross blends storytelling and economic analysis to show how sweeping global trends are affecting the ways we live. Sharing insights from global leaders—from the founders of Google and Twitter to defense experts like David Petraeus—Ross reveals the technologies and industries that will drive the next stage of globalization. The Industries of the Future is "a riveting and mind-bending book" (New York Journal of Books), a "must read" (Wendy Kopp, Founder of Teach for America) regardless of "whether you follow these fields closely or you still think of Honda as a car rather than a robotics company" (Forbes).
