**National and State Symbols** Akila Sivakumar,2018-03-22 What is common between a royal Bengal tiger, a lotus, a mango, and the Ashok Chakra? All of these are symbols linked to the Indian identity and heritage. If you have ever had a chance to see the majestic royal Bengal tiger, you must have admired its grace, power, and strength. For these very qualities, it has been chosen as the national animal of India. A colourful peacock dancing in the rain looks breathtakingly beautiful. Do you know that this pretty creature is the national bird of India? Our country has many such symbols that are part of our culture and heritage. Most of these are related to the environment and biodiversity of India. This book discusses their conservation status and the efforts being made to protect them. It also carries the all-important message that nature is integral to our national identity.

**Ananda Math** Bankim Chandra Chattopadhyay,1998 One of the most popular Indian novels of all ages, 'Ananda Math' was translated innumerable times into Indian and English languages. Five editions were published in Bengali and Hindi during the author's lifetime, the first in 1882. The novel has the backdrop of the 18th century famine in Bengal, infamous as Chhiyattorer Manvantar (famine of 76th Bengali year, 1276), to narrate the saga of armed uprising of the ascetics and their disciples against the pillaging East India Company rulers. The uprising is historically known as 'Santan Vidroha', the ascetics being the children of Goddess Jagadambe. The saga of 'Ananda Math' is thrilling and best epitomised in the patriotic mass-puller song 'Bande Mataram' ('Hail thee, O My Motherland'). The song is still a mantra that stirs imagination of millions of Hindus. The ascetics robbed the tormentors of people — the British rulers and the greedy zamindars — distributed the looted wealth to poverty-stricken people but kept nothing for themselves. Their targets were mostly the Company armoury and supplies. They had a highly organised setup, spread throughout Bengal. It was also India's first battle for freedom, and not the Sipahi Vidroha of 1857.

**Reverence, Resistance and Politics of Seeing the Indian National Flag** Sadan Jha,2015 Studies the politics that make the tricolour flag possibly the most revered of the symbols and icons associated with nationalism in twentieth-century India.

Reverence, Resistance and Politics of Seeing the Indian National Flag Sadan Jha,2016-01-08 This book studies the politics that make the tricolour flag possibly the most revered of the symbols, icons and markers associated with nation and nationalism in twentieth-century India. The emphasis on the flag as a visual symbol aims to question certain dominant assumptions about visibility. Anchored on Mahatma Gandhi's 'believing eye', this study reveals specificities of visual experience in the South Asian milieu. The account begins with a survey of the pre-colonial period, focuses on colonial lives of the flag, and then moves ahead to explain the contemporary dynamics of seeing the flag in India. The Flag Satyagraha of Jubbulpore and Nagpur in 1922–23, the adoption of the Congress Flag in 1931, the resolution for the future flag in the Constituent Assembly of India in 1947, the history of the colour saffron, and the codes governing the flag, as well as legal cases, are all explored in depth in this book.

*National Symbols in Modern Iran* Menahem Merhavy,2019-12-03 Now more than ever the role of icons and monuments in shaping a national identity is a subject of vital importance to scholars of both nationalism and memory studies. While the nation-state undoubtedly has a powerful influence on a society's cultural memory, it cannot necessarily control the ways in which icons are perceived. Once created, national symbols and perceptions of them take on a life of their own. Taking an innovative approach to the study of Iranian nationalism, Merhavy examines the way symbols from Iran's past have played an important role in the struggles between political, religious, and ideological movements over legitimacy in the last five decades. Using a rich variety of primary sources, he traces the process by which these symbols have been appropriated, rejected, and reinterpreted by the Pahlavi state, the Islamic opposition, and finally, the Islamic Republic. In doing so, this volume contributes to our understanding of cultural symbols that survive political upheavals, dramatic and significant as they may be. It also contributes to the growing body of literature that challenges the state centered perspective of much research on modern Iran by exposing the ever growing importance of civil society in the Iranian public sphere from the second half of the twentieth century onward.

Flags, Color, and the Legal Narrative Anne Wagner,Sarah Marusek,2021-05-24 On behalf of Professor Hugh Brady, Director and Senior Fellow, The Flag Research Center at the University of Texas School of Law, *Flags, Color, and the Legal Narrative: Public Memory, Identity, and Critique* (Springer 2021) has been selected as the recipient of our Gherardi Davis Prize is presented for a significant contribution to vexillological research for the year 2021. This work was selected because of its breadth and depth in examining flags as meaningful transmitters of significant symbolic information concerning the origins, culture, self-image, and values of a society. We believe it represents a signal achievement in the study of flags that sets a new standard for research in the field. The Flag Research Center, founded in 1962, is dedicated to furthering knowledge and advancing understanding of the human need to create and use symbols to express political, cultural, and social ideals through flags and flag-related material culture. The book deals with the identification of “identity” based on culturally specific color codes and images that conceal assumptions about members of a people comprising a nation, or a people within a nation. Flags narrate constructions of belonging that become tethered to negotiations for power and resistance over time and throughout a people's history. Bennet (2005) defines identity as “the imagined sameness of a person or social group at all times and in all circumstances”. While such likeness may be imagined or even perpetuated, the idea of sameness may be socially, politically, culturally, and historically contested to reveal competing pasts and presents. Visually evocative and ideologically representative, flags are recognized symbols fusing color with meaning that prescribe a story of unity. Yet, through semiotic confrontation, there may be different paths leading to different truths and applications of significance. Knowing this and their function, the book investigates these transmitted values over time and space. Indeed, flags may have evolved in key historical periods, but contemporaneously transpire in a variety of ways. The book investigates these transmitted values: Which values are being transmitted? Have their colors evolved through space and time? Is there a shift in cultural and/or collective meaning from one space to another? What are their sources? What is the relationship between law and flags in their visual representations? What is the shared collective and/or cultural memory beyond this visual representation? Considering the complexity and diversity in the building of a common memory with flags, the book interrogates the complex color-coded sign system of particular flags and their meanings attentive to a complex configuration of historical, social and cultural conditions that shift over time. Advance Praise for *Flags, Color, and the Legal Narrative* In an epoch of fragmentation, isolation and resurgent nationalism, the flag is waved but often forgotten. The flag, its colors, narratives, shape and denotations go without saying. The red flag over China, the Star-Spangled Banner, the Tricolore are instantly recognisable and over determined, representing a people, a nation, a culture, languages, legacies, leaders. In

this fabulous volume flags are revealed as concentrated, complex, chromatic assemblages of people, place and power in and through time. It is in bringing a multifocal awareness of the modes and meanings of flag and color in public representations that is particular strength. Editors Anne Wagner and Sarah Marusek have gathered critical thinkers from the North and South, East and West, to help know the essential and central - yet often forgotten and not seen - work of flags and color in narratives of nation, conflict, struggle and law. A kaleidoscopic contribution to the burgeoning field of visual jurisprudence, this volume is essential to comprehending the ocular machinery through which power makes, and is seen to make, the world. Kieran Tranter, Chair of Law, Technology and Future, Faculty of Law, Queensland University of Technology, Australia This comprehensive volume of essays could not be arriving at a more opportune time. The combined forces of climate change, inequality, and pandemic are causing instability and painful recognitions of our collective uncertainties about nationhood and globalism. In the United States, where I am writing these few lines, our traditional red/white/blue flag has been collapsed into two colors: Red and Blue. While these colors have semiotically deep texts, the division of the country into these two colors began with television stations designing how to report the vote count in the 2000 presidential election year creating red and blue parties and states. The colors stuck and have become customary. We Americans are told all the time by pundits that we are a deeply divided nation, as proven by unsubtle colored maps. To a statistician, we are a Purple America, though the color is unequally distributed. White, the color of negotiation and peace is rarely to be found. To begin to approach understanding the problems flagged in my brief account requires the insight of multiple disciplines. That is what Wagner and Marusek, wonderful scholars in their own work, have assembled as editors -- a conversation among scholars at the forefront of thinking about how flags and colors represent those who claim them thus exemplifying how to resist simple explanations and pat answers. The topic is just too important. Christina Spiesel, Senior Research Scholar in Law, Yale Law School; Adjunct Professor of Law, Quinnipiac University School of Law, USA Visuals, such as symbols and images, in addition to conventional textual forms, seem to have a unique potential for the study of a collective identity of a community and its traditions, as well as its narratives, and at the same time, in the expression of one's ideas, impressions, and ideologies in a specific socio-political space. Visual analysis thus has become a well-established domain of investigations focusing on how various forms of text-external semiotic resources, such as culturally specific symbols, including patterns and colors, make it possible for scholars to account for and thus demystify discursive symbols in a wider social and public space. *Flags, Identity, Memory: Critiquing the Public Narrative through Colors*, as an international and interdisciplinary volume, is a unique attempt to demystify the thinking, values, assumptions and ideologies of specific nations and their communities by analyzing their choice of specific patterns and colors represented in a national flag. It offers a comprehensive and insightful range of studies of visual and hidden discursive processes to understand social narratives through patterns of colours in the choice of national flags and in turn to understand their semiotic, philosophical, and legal cultures and traditions. Wagner and Marusek provide an exclusive opportunity to reflect on the functions, roles, and limits of visual and discursive representations. This volume will be a uniquely resourceful addition to the study of semiotics of colours and flags, in particular, how nations and communities represent their relationship between ideology and pragmatism in the repository of identity, knowledge and history. Vijay K Bhatia, Chinese University of Hong Kong, Full Professor, Hong Kong In all societies, colors play a critical function in the realm of symbolism. Nation societies perceive great significance in the colors of flags and national emblems. Colors constitute, in other words, sign systems of national identity. The relation of color codes and their relation to concepts of nationhood and its related narratives is the theme of this marvelous and eye-opening collection of studies. Flags are mini-texts on the inherent values and core concepts that a nation espouses and for this reason the colors that they bear can be read at many levels, from the purely representational to the inherently cultural. Written by experts in various fields this interdisciplinary anthology will be of interest to anyone in the humanities, social sciences, jurisprudence, narratology, political science, and semiotics. It will show how a seemingly decorative aspect of nationhood—the colors on flags—tells a much deeper story about the human condition. Marcel Danesi, University of Toronto, Full Professor of Anthropology, Canada

*Myths and Symbols in Indian Art and Civilization* Heinrich Robert Zimmer, 1990 This book interprets for the Western mind the key motifs of India's legends, myth, and folklore, taken directly from the Sanskrit, and illustrated with seventy plates of Indian art. It is primarily an introduction to image thinking and picture reading in Indian art and thought and it seeks to make the profound Hindu and Buddhist intuitions of the riddles of life and death recognizable not merely as Oriental but as universal elements.
