**Radom Regional Railway** Tomasz Gęsiak, The outline of the Radom Regional Railway was created in response to the question whether the railway in Radom could be used as an urban railway. Ultimately, it turned out that its potential was much wider than just the city area, encompassing existing regional connections. That is why the RRR Concept was created, which assumes the development of regional connections with the center of the region, i.e. Radom. The publication is divided into seven parts so that the reader can better understand the railway infrastructure in Radom. The first three chapters contain information collected by the author as starting material for further analyzes and assumptions. Chapter four presents current solutions used in suburban railways around the world, including in Poland, especially in larger provincial centers. Chapters five and seven present the main assumptions of the Radom Commuter Railway as a project ready for implementation. The fifth part focuses on the role of the city of Radom as the natural center of the region.

Informacje finansowe i niefinansowe w ocenie działalności banku Kinga Bauer, Stanisław Hońko, Teresa Orzeszko, Arleta Szadzińska, 2020-09-23 Zagadnienia poruszone w monografii oceniam jako bardzo ważne i aktualne, zarówno ze względu na przedmiot, jak i podmiot rozważań. Autorzy w ramach czterech rozdziałów zaprezentowali znaczenie sprawozdania finansowego jako źródła informacji do oceny sytuacji majątkowej i kondycji finansowej banku, w tym również do oceny zagrożenia kontynuacji działalności banku, omówili zasady wyceny aktywów i zobowiązań banku, w szczególności wyceny ekspozycji kredytowych oraz podjęli rozważania na temat znaczenia informacji niefinansowych w ocenie działalności banku. Na pozytywną ocenę zasługuje przegląd literatury i prezentacja dotychczasowego dorobku naukowego oraz wyników badań odnoszących się do możliwości wykorzystania informacji finansowych i niefinansowych w ocenie działalności banku. Ponadto należy docenić fakt przeprowadzenia badań empirycznych przez Autorów, których wyniki zostały zaprezentowane w recenzowanym opracowaniu. Do mocnych stron monografii zaliczam również jej stronę redakcyjną i szatę graficzną. Zarówno język, jak i zamieszczone tabele i rysunki powodują, że tekst czyta się z przyjemnością, a treść poruszanych zagadnień jest zrozumiała dla czytelnika. prof. dr hab. Marzena Remlein

Risk Management in the Polish Financial System Marian Noga, Konrad Raczkowski, Jarosław Klepacki, 2015-10-21 With globalisation comes an increase in the threat from systemic risk. As national economies become more globally entwined many argue that insufficient attention is being given to systemic risk; a principal contributor to recent economic crises. Focusing on the Polish financial system, this book addresses this critical issue within a global economic context. It advocates that accurate risk management practices and appropriate micro and macroeconomic policies can be created and maintained in order to manage systemic risk at both a national and international level. The book reviews current systemic risk management practices, analysing stability and existing micro- and

macroprudential policies, before examining the current risks involved in investing in financial instruments and those associated with investing in stock exchanges. It offers suggestions for the effective implementation of a well-designed public policy, through well managed fiscal and monetary policies, and reflects the roles of households and companies in planning, organizing, and controlling socio-economic activity to control risk. Risk Management in the Polish Financial System aims to redefine the taxonomy of systemic risk, offering practical and regulatory socio-economic processes which can be applied to current risk management practices, as well as provide a risk map for the years to come.

**European Strategic Autonomy and Small States' Security** Giedrius Česnakas, Justinas Juozaitis, 2022-12-26 This book analyses whether the EU's drift towards European strategic autonomy presents a challenge or a window of opportunity for its small member states to advance their security interests. The volume presents small states' perceptions of European strategic autonomy, highlighting their expectations and concerns. The chapters focus on the depth and breadth of European strategic autonomy, national security considerations, assessment of the impact on transatlantic relations, the expected outputs, and its potential impact on the EU's institutional structure. It also shows how systemic circumstances and the interests of powerful states, either belonging to the EU (France, Germany, and Poland) or having a significant say in European security architecture (the US), establish opportunities and constraints for the small states to shape European strategic autonomy. In particular, the study focuses on the diverging interests of the Baltic states (Estonia, Latvia, and Lithuania), Belgium, Denmark, Greece, Hungary, and the Netherlands. It demonstrates that, in most cases, European strategic autonomy is perceived not as an alternative to NATO but as a supplementary element that could facilitate the development of national military capabilities, indigenous defence industries and resilience to non-military threats. Ultimately, the book suggests that national approaches towards European strategic autonomy mainly stem from pragmatic national security and foreign policy considerations, while largely ignoring grand strategic ideas. This book will be of much interest to students of European politics, security studies, and international relations. *Software Services for e-World* Wojciech Cellary, Elsa Estevez, 2010-09-21 The I3E 2010 marked the 10 anniversary of the IFIP Conference on e-Business, e-Services, and e-Society, continuing a tradition that was invented in 1998 during the International Conference on Trends in Electronic Commerce, TrEC 1998, in Hamburg (Germany). Three years later the inaugural I3E 2001 conference was held in Zurich (Switzerland). Since then I3E has made its journey through the world: 2002 Lisbon (Portugal), 2003 Sao Paulo (Brazil), 2004 Toulouse (France), 2005 Poznan (Poland), 2006 Turku (Finland), 2007 Wuhan (China), 2008 Tokyo (Japan), and 2009 Nancy (France). I3E 2010 took place in Buenos Aires (Argentina) November 3–5, 2010. Known as “The Pearl” of South America, Buenos Aires is a cosmopolitan, colorful, and vibrant city, surprising its visitors with a vast variety of cultural and artistic performances, European architecture, and the passion for tango, coffee places, and football discussions. A cultural reference in Latin America, the city hosts 140 museums, 300 theaters, and 27 public libraries including the National Library. It is also the main educational center in Argentina and home of renowned universities including the University of Buenos Aires, created in 1821. Besides location, the timing of I3E 2010 is also significant—it coincided with the 200 anniversary celebration of the first local government in Argentina.

**Polish Independent Publications, 1976-1990** Hoover Institution Archives, Maciej Siekierski, 1999 Lists some 2,428 serial titles of independent anticommunist publications from Poland, where the output of illegal anticommunist literature was several times greater than in that of other Soviet- dominated Eastern European countries. The publications, holdings of the Hoover Institution at Stanford U., are merely listed by title, issue number, and date, where available; their content is not discussed. Thus, the book has minimal use other than as a research aide to scholars investigating this particular collection, though the sheer volume of the listings is itself a testament to the energy of the Polish Solidarity movement.
