Mattering the Invisible Diana Espírito Santo, Jack Hunter, 2021-05-14 Exploring how technological apparatuses “capture” invisible worlds, this book looks at how spirits, UFOs, discarnate entities, spectral energies, atmospheric forces and particles are mattered into existence by human minds. Technological and scientific discourse has always been central to the nineteenth- and early twentieth-century spiritualist quest for legitimacy, but as this book shows, machines, people, and invisible beings are much more ontologically entangled in their definitions and constitution than we would expect. The book shows this entanglement through a series of contemporary case studies where the realm of the invisible arises through technological engagement, and where the paranormal intertwines with modern technology.

**Wonders of the Invisible World** Patricia A. McKillip, 2012-10-01 Pass through fairy tales into the magic of invisible worlds in these opulent stories by a beloved fantasy icon and author of the classic Riddlemaster trilogy. Patricia McKillip has inspired generations of dedicated readers with enchanting tales that are as romantic as they are unexpected. Her lush, mesmerizing narratives are as deliciously bittersweet as the finest chocolate and as intoxicating as the finest wine. The

bewitching wonders offered here include princesses dancing with dead suitors, a knight in love with an official of exotic lineage, and fortune's fool stealing into the present instead of the future. You'll discover a ravishing undine and her mortal bridegroom who is more infatuated with politics than pleasure, a time-traveling angel forbidden to intervene in Cotton Mather's religious ravings, a wizard seduced in his youth by the Faerie Queen returning with a treasure that is rightfully hers, and an overachieving teenage mage tricked into discovering her true name very close to home.

*Invisible Veterans* Kate Hendricks Thomas, Kyleanne Hunter, 2019-07-19 Spotlights the challenges faced by our increasing cadre of military women when their service ends and they become civilians. Combining research with narrative, this book exposes common threads of lived experience and reviews the latest data on military women and their healthy reintegration into civilian society. Female veterans share their stories of seeking to be seen in a culture where they don't quite fit and their struggles to find community and friendship. Some fought during the Iraq and Afghanistan wars, as the first women in combat in American history. How and where, for example, does a female combat Marine find her tribe once she leaves the service? Through the stories of these courageous yet entirely human women, readers learn about the experiences of a new and often forgotten generation of veterans; about the challenges surrounding family and career choices that millions of American women face; and ultimately, about sacrifice, resiliency, loss, and love. This book will inform readers with an interest in female veterans and women's health and mental health issues, as well as researchers, students, and professionals working in fields encompassing women's psychology, health, and social work.

*Woman the Hunter* Mary Zeiss Stange, 1998-07-01 Over two million American women hunt. By

taking up weapons for the explicit purpose of killing, they are shattering one of Western culture's oldest and most firmly entrenched taboos. The image of a woman 'armed and dangerous' is profoundly threatening to our collective psyche--and it is rejected by macho males and radical feminists alike. *Woman the Hunter* juxtaposes unsettlingly beautiful accounts of the author's own experiences hunting deer, antelope, and elk with an argument that builds on the work of thinkers from Aldo Leopold to Clarissa Pinkola Estes. Exploring how women and men relate to nature and violence, Mary Zeiss Stange demonstrates how false assumptions about women and about hunting permeate contemporary thought. Her book is a profound critique of our society's evasion of issues that make us uncomfortable, and it culminates in a surprising claim: that only by appreciating the value of hunting can we come to understand what it means to be human. Controversial and original, defying easy stereotypes, *Woman the Hunter* is sure to provoke strong reactions in almost every reader.

*Understanding Economic Change* Ulrich Witt, Andreas Chai, 2018-11-29 Shows how thinking in evolutionary terms enhances our understanding of the economic and social change taking place at all levels.

Human-Animal Relationships in San and Hunter-Gatherer Cosmology, Volume I Mathias Guenther, 2019-08-21 Exploring a hitherto unexamined aspect of San cosmology, Mathias Guenther's two volumes on human-animal relations in San cosmology link "new Animism" with Khoisan Studies, providing valuable insights for Khoisan Studies and San culture, but also for anthropological theory, relational ontology, folklorists, historians, literary critics and art historians. In Volume I, therianthropes and transformations, two manifestations of ontological mutability that are conceptually and phenomenologically linked, are contextualized in broader San myth. Guenther explores the pervasiveness of human-animal hybridity and transformation in San expressive culture (myth, stories and storytelling, ludic dancing and art, ancestral rock art and contemporary easel art), ritual (trance dance curing, female and male rites of passage) and hunting. Transformation is shown to be experienced by humans, particularly via rituals and dancing that evoke animal identity mergers, but also by hunters who may engage with their prey animals in terms of sympathy and inter-subjectivity, particularly through the use of "hunting medicines."

The Invisible Universe Matthew Bothwell, 2021-11-11 From the discovery of entirely new kinds of

galaxies to a window into cosmic 'prehistory', Bothwell shows us the Universe as we've never seen it before – literally. Since the dawn of our species, people all over the world have gazed in awe at the night sky. But for all the beauty and wonder of the stars, when we look with just our eyes we are seeing and appreciating only a tiny fraction of the Universe. What does the cosmos have in store for us beyond the phenomena we can see, from black holes to supernovas? How different does the invisible Universe look from the home we thought we knew? Dr Matt Bothwell takes us on a journey through the full spectrum of light and beyond, revealing what we have learned about the mysteries of the Universe. This book is a guide to the ninety-nine per cent of cosmic reality we can't see – the Universe that is hidden, right in front of our eyes. It is also the endpoint of a scientific detective story thousands of years in the telling. It is a tour through our Invisible Universe.
