Flowing Tides Gearóid Ó hAllmhuráin,2016 Whether carried by emigrants and exiles, or distributed by commercial networks, Irish traditional music is one of the most popular world music genres. Clare, at the western edge of Europe on Ireland's Atlantic seaboard, enjoys unrivalled status as a home of the music, a magnet for tourists and aficionados eager to enjoy the authentic sounds of Ireland.

On Celtic Tides Chris Duff,2007-04-01 A sea kayak battles the freezing Irish waters as the morning sun rises out of the countryside. On the western horizon is the pinnacle of Skellig Michael-700 feet of vertical rock rising out of exploding seas. Somewhere on the isolated island are sixth-century monastic ruins where the light of civilization was kept burning during the Dark Ages by early Christian Irish monks. Puffins surface a few yards from the boat, as hundreds of gannets wheel overhead on six foot wing spans. The ocean rises violently and tosses paddler and boat as if they were discarded flotsam. This is just one day of Chris Duff's incredible three month journey.

The Tide Between Us Olive Collins,2018-12-27 1821: After the landlord of Lugdale Estate in Kerry is assassinated, young Art O'Neill's innocent father is hanged and Art is deported to the cane fields of Jamaica as an indentured servant. On Mangrove Plantation he gradually acclimates to the exotic country and unfamiliar customs of the African slaves, and achieves a kind of contentment. Then the new plantation heirs arrive. His new owner is Colonel Stratford-Rice from Lugdale Estate, the man who hanged his father. Art must overcome his hatred to survive the harsh life of a slave and live to see the eventual emancipation which liberates his coloured children. Eventually he is promised seven gold coins when he finishes his service, but doubts his master will part with the coins.--back cover.

Waterford Harbour Andrew Doherty,2020-09-30 Waterford harbour has centuries of tradition based on its extensive fishery and maritime trade. Steeped in history, customs and an enviable spirit, it was there that Andrew Doherty was

born and raised amongst a treasure chest of stories spun by the fishermen, sailors and their families. As an adult he began to research these accounts and, to his surprise, found many were based on fact. In this book, Doherty will take you on a fascinating journey along the harbour, introduce you to some of its most important sites and people, the area's history, and some of its most fantastic tales. Dreaded press gangs who raided whole communities for crew, the search for buried gold and a ship seized by pirates, the horror of a German bombing of the rural idyll during the Second World War – on every page of this incredible account you will learn something of the maritime community of Waterford Harbour.

Tides of History Michael S. Reidy, 2009-10-15 In the first half of the nineteenth century, the British sought to master the physical properties of the oceans; in the second half, they lorded over large portions of the oceans' outer rim. The dominance of Her Majesty's navy was due in no small part to collaboration between the British Admiralty, the maritime community, and the scientific elite. Together, they transformed the vast emptiness of the ocean into an ordered and bounded grid. In the process, the modern scientist emerged. Science itself expanded from a limited and local undertaking receiving parsimonious state support to worldwide and relatively well financed research involving a hierarchy of practitioners. Analyzing the economic, political, social, and scientific changes on which the British sailed to power, *Tides of History* shows how the British Admiralty collaborated closely not only with scholars, such as William Whewell, but also with the maritime community –sailors, local tide table makers, dockyard officials, and harbor masters–in order to systematize knowledge of the world's oceans, coasts, ports, and estuaries. As Michael S. Reidy points out, Britain's security and prosperity as a maritime nation depended on its ability to maneuver through the oceans and dominate coasts and channels. The practice of science and the rise of the scientist became inextricably linked to the process of European expansion.
