An Introduction to News Product Management Damon Kiesow, 2023-12-01 Drawing on innovations in the business of journalism, this book offers a comprehensive guide to using the human-centred design methods of product management to serve readers and bolster digital success in news organizations. An Introduction to News Product Management sets out how “product thinking” should be used in news organizations and practiced in accordance with journalistic ethics and customs. Beginning by looking at the history and theory behind the profession, this book builds a foundational understanding of what product management is and why news is a unique product. In the second unit, the author discusses how the human-centred design philosophy of product management aligns with the mission and ethics of journalism, and how that influences the view of audiences and frames strategies. The third unit of the book focuses on the daily use of product management in news organizations, providing students with a guide to its use in researching, prioritizing, and building sustainable projects that deliver news to readers and viewers. Written in an accessible style, this book features input from industry experts and draws on global examples to provide practical guidance. This is an ideal text for advanced undergraduates and graduates studying entrepreneurial journalism, media innovation, and digital media economics, as well as media professionals keen to learn more about product management and human-centred design methods.

Dead Astronauts Jeff VanderMeer, 2019-12-03 A 2020 LOCUS AWARD FINALIST Jeff VanderMeer's *Dead Astronauts* presents a City with no name of its own where, in the shadow of the all-powerful Company, lives human and otherwise converge in terrifying and miraculous ways. At stake: the fate of the future, the fate of Earth—all the Earths. A messianic blue fox who slips through warrens of time and space on a mysterious mission. A homeless woman haunted by a demon who finds the key to all things in a strange journal. A giant leviathan of a fish, centuries old, who hides a secret, remembering a past that may not be its own. Three ragtag rebels waging an endless war for the fate of the world against an all-powerful corporation. A raving madman who wanders the desert lost in the past, haunted by his own creation: an invisible monster whose name he has forgotten and whose purpose remains hidden.

The NeWS Book James Gosling, David S.H. Rosenthal, Michelle J. Arden, 2012-12-06 This book is an introduction to NeWS: the Networked, Extensible, Window System from Sun Microsystems. It is oriented towards people who have a basic knowledge of programming and window systems who would like to understand more about window systems in general and NeWS in particular. A significant portion of the book is devoted to an overview and history of window systems. While there is enough detail here to allow readers to write simple NeWS applications, the NeWS Reference Manual [SUN87a] should be consulted for a more complete treatment. This book was written to refer to the NeWS 1. 1 product, available from Sun and also available from several non-Sun suppliers. Shortly after this book is published, Sun will be releasing the next version of NeW- the X11/NeWS merged window system. Chapter 10 is dedicated to an overview of that product, but X11/NeWS deserves a book of its own. All the code examples in this book have been tested on both NeWS and the X11/NeWS merge. Should there be another edition of this book, we will discuss some of the new development

being done in the user interface tool kit area on NeWS. Significantly, the NeWS Development Environment (NDE) is now being developed at Sun; NDE promises to eclipse existing user interface toolkit designs and window programming environments.
