Informatics in Economy Gheorghe Cosmin Silaghi,Robert Andrei Buchmann,Catalin Boja,2017-12-27 This book constitutes revised selected papers from the 15th International Conference on Informatics in Economy, IE 2016, held in Cluj-Napoca, Romania, in June 2016. The 10 full papers and 4 short papers presented in this volume were carefully reviewed and selected from 31 extended paper submissions for this book. They are organized in sections on Distributed Systems, Information Systems Adoption, Knowledge Representation and Processing, Domain-specific Data Analysis, and Computational Models. The volume also contains one invited keynote paper in full-paper length.

Foundations in Sound Design for Embedded Media Michael Filimowicz,2019-06-25 This volume provides a comprehensive introduction to foundational topics in sound design for embedded media, such as physical computing; interaction design; auditory displays and data sonification; speech synthesis; wearables; smart objects and instruments; user experience; toys and playful tangible objects; and the new sensibilities entailed in expanding the concept of sound design to encompass the totality of our surroundings. The reader will gain a broad understanding of the key concepts and practices that define sound design for its use in computational products and design. The chapters are written by international authors from diverse backgrounds who provide multidisciplinary perspectives on sound in its many embedded forms. The volume is designed as a textbook for students and teachers, as a handbook for researchers in sound, programming and design, and as a survey of key trends and ideas for practitioners interested in exploring the boundaries of their profession.

Warsaw Travel Guide 2024 T Turner, The Warsaw Travel Guide is the most up-to-date, reliable and complete guide to this wonderful city. Travelers will find everything they need for an unforgettable visit presented in a convenient and easy-to-use format. Includes quick information on planning a visit, navigating the city, experiencing Polish culture and exploring the beauty of Warsaw. Also includes a Polish phrasebook to help you communicate with the locals. Warsaw is notable among Europe's capital cities not for its size, its age, or its beauty but for its indestructibility. It is a phoenix that has risen repeatedly from the ashes of war. Having suffered fearful damage during the Swedish and Prussian occupation of 1655-56, it was again assaulted in 1794, when the Russian army massacred the population of the right-bank suburb of Praga.

Speech Synthesis Alistair D N Edwards,1991-01-28 Speech is probably the one most important feature which distinguishes humans from other animals. This book is concerned with giving the power of speech to machines, and thereby giving disabled people the power to communicate, which they would otherwise lack. Synthetic speech is used in two ways by disabled people: as a replacement for natural speech; and as a means of communicating complex information to people who cannot receive it by other means, such as blind computer users. This book covers both forms of use, showing the features they have in common, but separating the differences. It is accessible both to readers with a technical background, and also to those with less such experience, thanks to an ex

SmartHome Hacks Peter A. Henning,2016-05-10 Machen Sie aus Ihrem Haus oder Ihrer Wohnung ein SmartHome! Dieses Buch zeigt den Weg, wie Sie mit Hausautomationssystemen individuelle bedarfsgerechte Lösungen entwickeln. Ob es nun darum geht, fertige SmartHome-Anlagen mit neuen Anwendungen aufzupeppen, neue Sensoren an diese Anlagen anzukoppeln oder gar das SmartHome komplett neu zu planen - hier gibt es Einblicke in die Unterschiede und Vorteile verschiedener Konzepte. Die Anleitungen des Buchs wenden sich dabei auch an Leser ohne tiefgehende Kenntnisse in Elektronik und Netzwerktechnik. In verständlicher Sprache zeigt Peter A. Henning das breite Spektrum der Möglichkeiten eines SmartHome, führt in den Umgang mit Aktoren und Sensoren ein und verbindet diese zu innovativen Vorschlägen. Fertige Lösungen für das SmartHome sind oft sehr teuer, bauen häufig auf nicht ausbaubaren Techniken auf oder decken eben nicht ganz den eigenen Bedarf. SmartHome Hacks hingegen stellt einfache Lösungen vor, die für wenig Geld beispielsweise auf einem Arduino oder einem Raspberry Pi realisiert werden können. Peter A. Henning erläutert in über 60 Hacks, wie Sie mithilfe kleiner Programme oder preiswerter Elektronikbauteile selbst zu einem automatisierten Heim erster Klasse kommen. Dabei zeigt eine Einordnung in vier Schärfegrade, wie anspruchsvoll die Ausführung eines jeden Hacks ist. Dem Heimautomationsprojekt FHEM, dem Schweizer Taschenmesser unter den SmartHome-Systemen, ist ein besonderer Schwerpunkt gewidmet. Darüber hinaus aber geht das Buch auch auf die Standards enOcean, KNX, Z-Wave und ZigBee ein. Ausführlicher werden das HomeMatic-System und die 1-Wire-Technologie diskutiert.

Easily Understood Doris B. Bianchi,1980-12-01

Diverse Voices in Chinese Translation and Interpreting Riccardo Moratto,Martin Woesler,2021-02-02 This book presents a thoughtful and thorough account of diverse studies on Chinese translation and interpreting (TI). It introduces readers to a plurality of scholarly voices focusing on different aspects of Chinese TI from an interdisciplinary and international perspective. The book brings together eighteen essays by scholars at different stages of their careers with different relationships to translation and interpreting studies. Readers will approach Chinese TI studies from different standpoints, namely socio-historical, literary, policy-related, interpreting, and contemporary translation practice. Given its focus, the book benefits researchers and students who are interested in a global scholarly approach to Chinese TI. The book offers a unique window on topical issues in Chinese TI theory and practice. It is hoped that this book encourages a multilateral, dynamic, and international approach in a scholarly discussion where, more often than not, approaches tend to get dichotomized. This book aims at bringing together international leading scholars with the same passion, that is delving into the theoretical and practical aspects of Chinese TI.

Speech and Hearing ,1974-01-01

Statistical Machine Translation Philipp Koehn,2010 The dream of automatic language translation is now closer thanks to recent advances in the techniques that underpin statistical machine translation. This class-tested textbook from an active researcher in the field, provides a clear and careful introduction to the latest methods and explains how to build machine translation systems for any two languages. It introduces the subject's building blocks from linguistics and probability, then covers the major models for machine translation: word-based, phrase-based, and tree-based, as well as machine translation evaluation, language modeling, discriminative training and advanced methods to integrate linguistic annotation. The book also reports the latest research, presents the major outstanding challenges, and enables novices as well as experienced researchers to make novel contributions to this exciting area. Ideal for students at undergraduate and graduate level, or for anyone interested in the latest developments in machine translation.

The Book of Moods Lauren Martin,2020-12-08 The Happiness Project meets So Sad Today in this hilariously witty, unflinchingly honest book from Words of Women founder Lauren Martin, as she contemplates the nature of negative emotions -- and the insights that helped her to take control of her life (Bobbi Brown). Five years ago, Lauren Martin was sure something was wrong with her. She had a good job in New York, an apartment in Brooklyn, a boyfriend, yet every day she wrestled with feelings of inferiority, anxiety and irritability. It wasn't until a chance encounter with a (charming, successful) stranger who revealed that she also felt these things, that Lauren set out to better understand the hold that these moods had on her, how she could change them, and began to blog about the wisdom she uncovered. It quickly exploded into an international online community of women who felt like she did: lost, depressed, moody, and desirous of change. Inspired by her audience to press even deeper, The Book of Moodsshares Lauren's journey to infuse her life with a sense of peace and stability. With observations that will resonate and inspire, she dives into the universal triggers every woman faces -- whether it's a comment from your mother, the relentless grind at your job, days when you wish the mirror had a Valencia filter, or all of the above. Blending cutting-edge science, timeless philosophy, witty anecdotes and effective forms of self-care, Martin has written a powerful, intimate, and incredibly relatable chronicle of transformation, proving that you really can turn your worst moods into your best life.

Japanese Discourse Markers Noriko Onodera,2004-01-01 This book is one of the pioneering historical pragmatic studies of Japanese. It closely illustrates the usage and contributions of some Japanese discourse markers, and reveals their developmental history. The section on Synchronic Analysis explores the previously uninvestigated functions of some discourse markers used in Present Day Japanese. Moment by moment in on-going conversations, where culturally rigidly-defined interactional norms are highly valued, a specific marker is chosen and used by the speakers as their strategy, based on their quite subjective judgment. The section on Diachronic Analysis then demonstrates chronologically how the meanings and

forms of the same markers have come into being. Results include some noticeable changes related to the strengthened intersubjectivity. This multi-dimensional study also discusses the relevance of findings to typological characteristics and productivity. Consideration is further given to why certain expressions (rather than others) become discourse markers and independent forms in Japanese.

CALL communities and culture – short papers from EUROCALL 2016 Salomi Papadima-Sophocleous,Linda Bradley,Sylvie Thouësny,2016-12-18 The 23rd EUROCALL conference was organised by the Cyprus University of Technology Language Centre. The theme of the conference was “CALL communities and Culture”. Between the 24th and 27th August 2016, over 135 presentations were delivered and 27 posters were presented; 84 of these presentations appear in this volume of selected peer-reviewed short papers.

Principles and Practices for Teaching English as an International Language Lubna Alsagoff,Sandra Lee Mckay,Guangwei Hu,Willy A. Renandya,2012-04-23 What general principles should inform a socioculturally sensitive pedagogy for teaching English as an International Language and what practices would be consistent with these principles? This text explores the pedagogical implications of the continuing spread of English and its role as an international language, highlighting the importance of socially sensitive pedagogy in contexts outside inner circle English-speaking countries. It provides comprehensive coverage of topics traditionally included in second language methodology courses (such as the teaching of oral skills and grammar), as well as newer fields (such as corpora in language teaching and multimodality); features balanced treatment of theory and practice; and encourages teachers to apply the pedagogical practices to their own classrooms and to reflect on the effects of such practices. Designed for pre-service and in-service teachers of English around the world, Principles and Practices for Teaching English as an International Language fills a critical need in the field.

English Phonology and Pronunciation Teaching Pamela Rogerson-Revell,2011-03-03 This book aims to provide a clear description of key aspects of English phonology in order to help teachers diagnose and prioritize problem areas in pronunciation. It also aims to develop an awareness of current issues and relevant research in the field to inform teachers decisions, not only about what to teach, but how to teach pronunciation, particularly in EIL contexts. Specifically, it aims to enable readers to: * Understand key terms and concepts in phonology and phonetics * Become aware of current issues and debates in research and apply these to pronunciation teaching, particularly in EIL contexts * Conduct phonological analysis of learner language, including phonemic transcription * Diagnose and assess learner's pronunciation difficulties and needs * Plan a structured pronunciation syllabus The book assumes no prior knowledge and is a key resource for both newcomers and experienced practitioners in the fields of English Language Teaching as well as students of applied linguistics.

The Oxford Handbook of Computational Linguistics Ruslan Mitkov,2004 This handbook of computational linguistics, written for academics, graduate students and researchers, provides a state-of-the-art reference to one of the most active and productive fields in linguistics.

Cultural Urban Heritage Mladen Obad Šćitaroci,Bojana Bojanić Obad Šćitaroci,Ana Mrđa,2019-01-28 This book presents strategies and models for cultural heritage enhancement from a multidisciplinary perspective. It discusses identifying historical, current and possible future models for the revival and enhancement of cultural heritage, taking into consideration three factors – respect for the inherited, contemporary and sustainable future development. The goal of the research is to contribute to the enhancement of past cultural heritage renovation and enhancement methods, improve the methods of spatial protection of heritage and contribute to the development of the local community through the use of cultural, and in particular, architectural heritage. Cultural heritage is perceived primarily through conservation, but that comes with limitations. If heritage is perceived and experienced solely through conservation, it becomes a static object. It needs to be made an active subject, which implies life in heritage as well as new purposes and new life for abandoned heritage. Heritage can be considered as a resource that generates revenue for itself and for the sustainability of the local community. To achieve this, it should be developed in accordance with contemporary needs and technological achievements, but on scientifically based and professional criteria and on sustainable models. The research presented in this book is based on the approach of Heritage Urbanism in a combination of experiments (case studies) and theory.

EIL, ELF, Global English Cesare Gagliardi,Alan Maley,2010 How can you teach the English language to global English speakers? Can English be taught as an international language? Is it worth teaching? Isn't it more proper and profitable to learn a standard variety of English? How realistic and useful is the identification of an EIL/ELF variety? Can an EIL/ELF standard be identified? These are some of the questions the present volume has addressed with the contribution of some of the most qualified scholars in the field of English linguistics. The book is divided into four sections. The first part deals with the definition of English as an international language and English as a lingua franca. Section two takes six different teaching issues into consideration. The third section examines some learning issues and the last part of the volume debates the relationship between teacher and student in an English as a lingua franca environment.

Development of Tourism and the Hospitality Industry in Southeast Asia Purnendu Mandal,John Vong,2015-12-11 This book highlights the state-of-the-art tourism and hospitality industry in Southeast Asian countries, while also presenting future directions for the industry with an emphasis on decision-making models. It first elaborates on the significant role of the tourism and hospitality industry given the rapid socio-economic and cultural changes occurring in Southeast Asia, before providing perspectives on medical tourism, tourism for seniors and several other developments within the tourism and hospitality sector. Development of Tourism and the Hospitality Industry in Southeast Asia presents scholarly perspectives from researchers across the region and is geared towards world-wide readers in academia, as well as experts from the industry.

The Conversational Interface Michael McTear,Zoraida Callejas,David Griol,2016-05-19 This book provides a comprehensive introduction to the conversational interface, which is becoming the main mode of interaction with virtual personal assistants, smart devices, various types of wearable, and social robots. The book consists of four parts. Part I presents the background to conversational interfaces, examining past and present work on spoken language interaction with computers. Part II covers the various technologies that are required to build a conversational interface along with practical chapters and exercises using open source tools. Part III looks at interactions with smart devices, wearables, and robots, and discusses the role of emotion and personality in the conversational interface. Part IV examines methods for evaluating conversational interfaces and discusses future directions.
