**Korean War Order of Battle** Gordon L. Rottman,2002-12-30 Using historical files kept by each of the armed services and nations involved in the Korean War, Rottman provides information on unit backgrounds, organization, manning, periods of service, insignia, weapons, casualties, and major commands including the Western, North Korean, Communist Chinese, and USSR forces. The United Nation's first military action and America's first major Cold War action, the Korean War, frequently called the forgotten war, is well documented in studies and reports of specific actions and phases of the war. These sources, however, provide little order of battle information on most of the belligerents, particularly the non-U.S./UN and South Korean forces. Using the historical files kept by each armed service and each nation, Gordon Rottman provides information on combat units and major commands, including both Western forces and North Korean, Communist Chinese, and USSR forces. He has done an invaluable service for scholars and military buffs. Filling a void that would not likely have been filled otherwise, the book provides information on unit backgrounds, organization, manning, periods of service, insignia, weapons, and casualties. The book will be a primary source for anyone, scholar or layman, interested in researching the Korean War.

**The Jet Race and the Second World War** S. Mike Pavelec,2007-02-28 In the 1930s, as nations braced for war, the German military build up caught Britain and the United States off-guard, particularly in aviation technology. The unending quest for speed resulted in the need for radical alternatives to piston engines. In Germany, Dr. Hans von Ohain was the first to complete a flight-worthy turbojet engine for aircraft. It was installed in a Heinkel-designed aircraft, and the Germans began the jet age on August 27, 1939. The Germans led the jet race throughout the war and were the first to produce jet aircraft for combat operations. In England, the doggedly determined Frank Whittle also developed a turbojet engine, but without the support enjoyed by his German counterpart. The British came second in the jet race when Whittle's engine powered the Gloster Pioneer on May 15, 1941. The Whittle-Gloster relationship continued and produced the only Allied combat jet aircraft during the war, the Meteor, which was relegated to Home Defense in Britain. In America, General Electric copied the Whittle designs, and Bell Aircraft contracted to build the first American jet plane. On October 1, 1942, a lackluster performance from the Bell Airacomet, ushered in the American jet age. The Yanks forged ahead, and had numerous engine and airframe programs in development by the end of the war. But, the Germans did it right and did it first, while the Allies lagged throughout the war, only rising to technological prominence on the ashes of the German defeat. Pavelec's analysis of the jet race uncovers all the excitement in the high-stakes race to develop effective jet engines for warfare and transport.

Jane's Fighter Combat in the Jet Age David C. Isby,1997-06-26 Fighter Combat in the Jet Age covers the entire history of jet fighters in action, from the end of World War II to the present. Meticulously detailed, it features 300 photos, line drawings and graphs that reveal how jet fighters and their weapons have developed and improved, utterly changing the face of air combat. It also focuses on the key technological developments of the Cold War, such as the fighters built to intercept nuclear bombers and to dominate European skies in a Third World War. With combat examples from Southeast Asia, the Falklands and the Middle East, Fighter Combat in the Jet Age compares and contrasts the fighter aircraft of different nations and manufacturers. Also included are spreads with sidebars and boxes describing fighter tactics, major air battles, experimental weapons and famous pilots. It's enough to thrill aircraft enthusiasts of all ages.

**VPNavy! USN, USMC, USCG and NATS Patrol Aircraft Lost or Damaged During World War II** Douglas E. Campbell,2018-02-25 Thousands of hours of research have culminated in this First Edition of U.S. Navy, U.S. Marine Corps, U.S. Coast Guard and Naval Air Transport Service patrol aircraft lost or damaged during World War II. Within these 600+ pages can be found more than 2,200 patrol aircraft across nearly 300 squadron designations; the

majority of the aircraft complete with their stories of how they were lost or damaged or simply Struck Off Charge (SOC) and removed from the Navy's inventory. Of interest to the reader may be the alphabetical Index to the 7,600+ names of Officers, aircrewmen and others mentioned in the book.

*Modelling Luftwaffe Jets and Wonder Weapons* Brett Green,2012-11-20 While the Allies largely relied on mass production to help them win World War II, Germany put a great deal of their limited resources into new technologies and wonder weapons. In addition to these tangible assets, which were used with varying degrees of success, the drawing boards of Germany were littered with dozens of advanced designs that never reached the prototype or production stages. Many of these operational and paper projects advanced the pace and influenced the direction of aircraft development in the decades following World War II, with many of the German engineers responsible for these innovations seamlessly continuing their roles in the United States and the USSR. Modellers have had a long fascination for the Luftwaffe's jet arsenal and secret weapons of fact and fiction and this new Osprey Masterclass will explore the Luftwaffe jets and rocket planes that saw service at the end of World War II.
