Jetpack Dreams Mac Montandon,2008-10-28 Jetpack Dreams chronicles the colorful pop history and science of that most amazing and mysterious of machines: the jetpack. Fueled by a fascination and lifelong obsession with the power of flight, journalist Mac Montandon goes on a vastly entertaining search of the elusive invention. He examines the jetpack's inspiration from the first shoulder-mounted wings to Bill Suitor's 1984 Olympic flight, even uncovering a gruesome jetpack-related murder in Houston. From the earliest days of the 'pack to its enduring role in popular culture—with Buck Rogers, James Bond, Boba Fett—Montandon seeks to answer two simple questions: Where is the jetpack that was promised to him, and to all of us, years ago? And if it's out there, can he catch a ride?

Jet Pack Fouad Sabry,2022-10-25 What Is Jet Pack The equipment known as a jet pack, rocket belt, or rocket pack is worn on the back and employs jets of gas or liquid to propel the user through the air. Other names for this kind of gadget are rocket pack and rocket belt. The idea has been a staple in the genre of science fiction for almost to a century, but it didn't start gaining traction until the 1960s. Real jet packs have been developed using a variety of different mechanisms, but their applications are significantly more restricted than those of their fictional counterparts due to the difficulties presented by the Earth's atmosphere, gravity, the low energy density of usable fuels, and the fact that the human body is not suited to flight. Real jet packs are primarily used for stunts. As a result of the apparent lack of gravity and the absence of an environment that generates friction, the jet pack has found a useful use in extra-vehicular exercises performed by astronauts in space. A system that enhances a person's maneuverability and includes a jet pack as well as accompanying jets that are mounted to the arms is referred to as a jet suit. The Great American Jet Pack Steve Lehto,2013-05-01 Tracing the remarkable history of a certain kind of flying machine—from the rocket belt to the jet belt to the flying platform and all the way to Yves Rossy's 21st-century free flights using a jet-powered wing—this historical account delves into the technology that made these devices possible and the reasons why they never became commercial successes on a mass scale. These individual lift devices, as they were blandly labeled by the government men who financed much of their development, answered man's desire to simply step outside and take flight. No runways, no wings, no pilot's license were required. But the history of the jet pack did not follow its expected trajectory and the devices that were thought to become as commonplace as cars have instead become one of the most overpromised technologies of all time. This fascinating account profiles the inventors and pilots, the hucksters and cheats, and the businessmen and soldiers who were involved with the machines, and it tells a great American story of a technology whose promise may yet, one day, come to fruition.

Where's My Jetpack? Daniel H. Wilson,2018-03-27 It's the twenty-first century and let's be honest-things are a little disappointing. Despite every World's Fair prediction, every futuristic ride at Disneyland, and the advertisements on the last page of every comic book, we are not living the future we were promised. By now, life was supposed to be a fully automated, atomic-powered, germ-free Utopia, a place where a grown man could wear a velvet spandex unitard and not be laughed at. Where are the ray guns, the flying cars, and the hoverboards that we expected? What happened to our promised moon colonies? Our servant robots? In *Where's My Jetpack?*, roboticist Daniel H. Wilson takes a hilarious look at the future we always imagined for ourselves. He exposes technology, spotlights existing prototypes, and reveals drawing-board plans. You will learn which technologies are already available, who made them, and where to find them. If the technology is not public, you will learn how to build, buy, or steal it. And if doesn't yet exist, you will learn what stands in the way of making it real. With thirty entries spanning everything from teleportation to self-contained skyscraper cities, and superbly illustrated by Richard Horne (101 Things to Do Before You Die), *Where's My Jetpack?* is an endlessly entertaining, one-of-a-kind look at the world that we always wanted. Daniel H. Wilson, Ph.D, has a degree in Robotics from Carnegie-Mellon. He is the author of *How to Survive a Robot Uprising*. He lives in Portland, Oregon.

The Skylark of Space E. E. "Doc" Smith, Lee Hawkins Garby,2024-01-01 This epic space opera from the father of the genre is an “adventure of an unprecedented kind . . . The first great ‘classic’ of American science fiction” (Isaac Asimov). From Science Fiction– and Fantasy Hall of Fame–inductee E. E. Smith, *The Skylark of Space* chronicles the groundbreaking adventures of scientist Richard Seaton. After stumbling upon the secrets of atomic energy during a laboratory accident, Seaton partners with wealthy engineer Martin Crane, eager to share his discovery with the world by creating space travel. But this life-changing invention brings grave danger as greedy competitors want to exploit Seaton’s secret for their own means, including the unscrupulous Dr. Marc “Blackie” DuQuesne. But DuQuesne’s attempt to destroy Seaton and Crane sends the three men out into deep space, where their struggle to persevere leads to an epic tale of intergalactic space battles. “With the exception of the works of H. G. Wells, possibly those of Jules Verne—and almost no other writer—[*The Skylark of Space*] has . . . done more to change the nature of all the science fiction written after it than almost any other single work.” —Frederik Pohl, Hugo and Nebula Award–winning author

18-Tom Swift and His Thermo-Ion Jetpack (HB) Victor Appleton II,2016-09-16 The 18th book of the series. Like many people, Tom Swift-and his father, Damon-have dreamed of the days when the personal jet backpacks we've heard about since the 1940s become reality. When a movie director from Hollywood comes to Tom to create the real thing-he demands reality in his science fiction films with special effects-it intrigues the young inventor enough to see what he might create. It's a lot harder than it first appears! He must convince the director that his plans to have a 1940's period piece with leather jackets and bullet-nosed SCUBA tank-shaped rockets has to be updated to match what he believes might be deliverable as a real device. The suit is hijacked by the stuntman and ends up shooting him into space making necessary a search and rescue mission. In the end, it is up to Bud Barclay to save the day and fly the suit for the film. But, a sudden attack might be sending him on a collision course with death. Can Tom rescue his best friend and save the movie?
