Daniel H. Wilson

Jetpack Dreams Mac Montandon,2008-10-28 Jetpack Dreams chronicles the colorful pop history and science of that most amazing and mysterious of machines: the jetpack. Fueled by a fascination and lifelong obsession with the power of flight, journalist Mac Montandon goes on a vastly entertaining search of the elusive invention. He examines the jetpack's inspiration from the first shoulder-mounted wings to Bill Suitor's 1984 Olympic flight, even uncovering a gruesome jetpack-related murder in Houston. From the earliest days of the 'pack to its enduring role in popular culture—with Buck Rogers, James Bond, Boba Fett—Montandon seeks to answer two simple questions: Where is the jetpack that was promised to him, and to all of us, years ago? And if it's out there, can he catch a ride?

The Great American Jet Pack Steve Lehto,2013-05-01 Tracing the remarkable history of a certain kind of flying machine—from the rocket belt to the jet belt to the flying platform and all the way to Yves Rossy's 21st-century free flights using a jet-powered wing—this historical account delves into the technology that made these devices possible and the reasons why they never became commercial successes on a mass scale. These individual lift devices, as they were blandly labeled by the government men who financed much of their development, answered man's desire to simply step outside and take flight. No runways, no wings, no pilot's license were required. But the history of the jet pack did not follow its expected trajectory and the devices that were thought to become as commonplace as cars have instead become one of the most overpromised technologies of all time. This fascinating account profiles the inventors and pilots, the hucksters and cheats, and the businessmen and soldiers who were involved with the machines, and it tells a great American story of a technology whose promise may yet, one day, come to fruition.

Where's My Jetpack? Daniel H. Wilson,2018-03-27 It's the twenty-first century and let's be honest—things are a little disappointing. Despite every World's Fair prediction, every futuristic ride at Disneyland, and the advertisements on the last page of every comic book, we are not living the future we were promised. By now, life was supposed to be a fully automated, atomic-powered, germ-free Utopia, a place where a grown man could wear a velvet spandex unitard and not be laughed at. Where are the ray guns, the flying cars, and the hoverboards that we expected? What happened to our promised moon colonies? Our servant robots? In *Where's My Jetpack?*, roboticist Daniel H. Wilson takes a hilarious look at the future we always imagined for ourselves. He exposes technology, spotlights existing prototypes, and reveals drawing-board plans. You will learn which technologies are already available, who made them, and where to find them. If the technology is not public, you will learn how to build, buy, or steal it. And if doesn't yet exist, you will learn what stands in the way of making it real. With thirty entries spanning everything from teleportation to self-contained skyscraper cities, and superbly illustrated by Richard Horne (101 Things to Do Before You Die), *Where's My Jetpack?* is an endlessly entertaining, one-of-a-kind look at the world that we always wanted. Daniel H. Wilson, Ph.D, has a degree in Robotics from Carnegie-Mellon. He is the author of *How to Survive a Robot Uprising*. He lives in Portland, Oregon.

18-Tom Swift and His Thermo-Ion Jetpack (HB) Victor Appleton II,2016-09-16 The 18th book of the series. Like many people, Tom Swift-and his father, Damon-have dreamed of the days when the personal jet backpacks we've heard about since the 1940s become reality. When a movie director from Hollywood comes to Tom to create the real thing-he demands reality in his science fiction films with special effects-it intrigues the young inventor enough to see what he might create. It's a lot harder than it first appears! He must convince the director that his plans to have a 1940's period piece with leather jackets and bullet-nosed SCUBA tank-shaped rockets has to be updated to match what he believes might be deliverable as a real device. The suit is hijacked by the stuntman and ends up shooting him into space making necessary a search and rescue mission. In the end, it is up to Bud Barclay to save the day and fly the suit for the film. But, a sudden attack might be sending him on a collision course with death. Can Tom rescue his best friend and save the movie?

Pseudo-City D. Harlan Wilson,2005 In Pseudofolliculitis City nothing is as it seems and everything is as it should be. Today's forecast calls for extreme confrontation, with sandwich flurries and the threat of handlebar mustaches to the west. By turns absurd and surreal, dark and challenging, Pseudo-City exposes what waits in the bathroom stall, under the manhole cover and in the corporate boardroom, all in a way that can only be described as mind-bogglingly unreal.
