Partial Differential and Integral Equations Heinrich Begehr, R.P. Gilbert, Wen-Chung Guo, 2013-12-01

This volume of the Proceedings of the congress ISAAC '97 collects the contributions of the four sections 1. Function theoretic and functional analytic methods for pde, 2. Applications of function theory of several complex variables to pde, 3. Integral equations and boundary value problems, 4. Partial differential equations. Most but not all of the authors have participated in the congress. Unfortunately some from Eastern Europe and Asia have not managed to come because of lack of financial support. Nevertheless their manuscripts of the proposed talks are included in this volume. The majority of the papers deal with complex methods. Among them boundary value problems in particular the Riemann-Hilbert, the Riemann (Hilbert) and related problems are treated. Boundary behaviour of vector-valued functions are studied too. The Riemann-Hilbert problem is solved for elliptic complex equations, for mixed complex equations, and for several complex variables. It is considered in a general topological setting for mappings into \mathbb{C}^n and related to Toeplitz operators. Convolution operators are investigated for nilpotent Lie groups leading to some consequences for the null space of the tangential Cauchy Riemann operator. Some boundary value problems for overdetermined systems in balls of \mathbb{C}^n are solved explicitly. A survey is given for the Gauss-Manin connection associated with deformations of curve singularities. Several papers deal with generalizations of analytic functions with various applications to mathematical physics. Singular integrals in quaternionic analysis are studied which are applied to the time-harmonic Maxwell equations.

International Review of Industrial and Organizational Psychology 2006 Gerard P. Hodgkinson, J. Kevin Ford, 2006-05-01 This is the twenty-first in the most prestigious series of annual volumes in the field of industrial and organizational psychology. The series provides authoritative and integrative reviews of the key literature of industrial psychology and organizational behaviour. The chapters are written by established experts and topics are carefully chosen to reflect the major concerns in both the research literature and in current practice. Reflecting the ethos of the series as a whole, this twenty-first volume provides scholarly, state-of-the-art overviews of developments across a diverse range of areas, including: attribution theory, performance appraisal, women at work, international management, task analysis, and qualitative research methods. Each chapter offers a comprehensive and critical survey of the chosen topic, and each is supported by a valuable bibliography. For advanced students, academics and researchers, as well as professional psychologists and managers, this remains the most authoritative and current guide to new developments and established knowledge in the field of industrial and organizational psychology.

Attitudes and Decisions J Richard Eiser, Joop van der Pligt, 2015-08-20 The concept of attitude has long been a central part of social psychological theories. It is important in other disciplines too, such as economics, business studies, politics and sociology. Originally published in 1988, the authors of this text show how attitudes and motives are crucial in human decision-making, and explore the relationship between them. They look closely at the real context of people's attitudes and behaviour, pointing out that attitudes are both a social product and an intrinsic part of social action. The authors show that theories of judgment, attitudes,

attribution and decision-making can make important contributions to social issues such as the employment of nuclear energy, the storage of nuclear waste, health behaviour and medical decision-making. They emphasize that social psychology is relevant to a wide variety of social issues, deriving from the theoretical and distinctive methods that social psychology has developed.

Foundations of Personality P.J. Hettema, Ian J. Deary, 2013-11-11 Differences between people are a fascinating and long-standing area of psychological inquiry. However, previous research has largely been confined to studies at the descriptive level. This book tries to explain individual difference, rather than merely describe them. Explanations are derived from two major competing frameworks: the biological and social approaches to individuality. The book is based on the contributions of specialists from Europe and North America invited to represent the biological and social points of view. Thus, a direct confrontation is obtained of two approaches that, hitherto, have proceeded with virtually no reference to each other. Attention is paid to behavior genetics, psychophysiology and temperament, as well as to social learning, behavioral strategies and person-environment interactions. Differences and commonalities between the biological and social approaches are scrutinized and a common framework is outlined to stimulate future research. Due to its innovative character, the book is particularly relevant for investigators in the field. In addition, it may be fruitfully used in advanced graduate level courses in personality psychology.

Symposium on Probability Methods in Analysis Jean-Michel Morel, Bernard Teissier, 2006-11-15

Corporatism Or Competition? Coen Teulings, Joop Hartog, 1998-09-17 The authors present important research showing that corporatist institutions generate smaller non-competitive wage differentials than a decentralized system. A theoretical explanation is developed based on the hold-up problem in investments, arguing that corporatist institutions solve the problem by specifying ex ante nominal contracts that remove the necessity of ex post bargaining over the surplus of an employment relationship. The authors also argue that such institutions allow sufficient flexibility to accommodate aggregate shocks, even more so than decentralized systems. *Corporatism or Competition?* is the first book to bring together the mass of research on comparative wage differences, wage movements and employment behaviour in different countries with different institutional frameworks, in an organized and coherent fashion.

The Psychology of Radicalization and Terrorism Willem Koomen, Joop Van Der Pligt, 2015-11-19

Terrorism and radicalization have a long history, but in recent years their prominence has been a particularly conspicuous and influential feature of the global political landscape. This important book presents an overview of the processes involved in radicalization and terrorism, and introduces a systematic framework which captures the most crucial individual and social factors involved in determining these processes. The authors begin by considering the possible role of prejudice, economic deprivation, and discrimination, and the cognitive responses and emotions they can trigger. Such responses tend in turn to increase the importance of group membership, and promote intergroup differentiation and polarization, a process which is often accompanied by more pronounced and more extreme religious and ideological beliefs. The book also describes the role of cultural values and social climate in processes of radicalization, as well as the role of personality factors and demographics such as age and marital status. As for violent terrorist action itself, this final most radical stage is elicited by a number of group factors such as groupthink, isolation, and leadership. Certain cognitive mechanisms – for example, dehumanizing the target and attributing responsibility elsewhere – can also provide excuses for violence. The book explores why some groups turn to violence and others don't, and it addresses processes of disengagement, deradicalization programs, and other methods used to inhibit the spread of radicalization and terrorism. *The Psychology of Radicalization and Terrorism* takes a unique and systematic approach to a vital topic, integrating knowledge

from diverse literatures, and using social psychology as a basis for comprehending human behaviour. It will be essential reading for students and researchers from all disciplines seeking a greater understanding of terrorism and violent political conflict in all its forms.

Oscillation, Nonoscillation, Stability and Asymptotic Properties for Second and Higher Order Functional Differential Equations Leonid Berezansky,Alexander Domoshnitsky,Roman Koplatadze,2020-05-18

Asymptotic properties of solutions such as stability/ instability,oscillation/ nonoscillation, existence of solutions with specific asymptotics, maximum principles present a classical part in the theory of higher order functional differential equations. The use of these equations in applications is one of the main reasons for the developments in this field. The control in the mechanical processes leads to mathematical models with second order delay differential equations. Stability and stabilization of second order delay equations are one of the main goals of this book. The book is based on the authors' results in the last decade. Features: Stability, oscillatory and asymptotic properties of solutions are studied in correlation with each other. The first systematic description of stability methods based on the Bohl-Perron theorem. Simple and explicit exponential stability tests. In this book, various types of functional differential equations are considered: second and higher orders delay differential equations with measurable coefficients and delays, integro-differential equations, neutral equations, and operator equations. Oscillation/nonoscillation, existence of unbounded solutions, instability, special asymptotic behavior, positivity, exponential stability and stabilization of functional differential equations are studied. New methods for the study of exponential stability are proposed. Noted among them include the W-transform (right regularization), a priori estimation of solutions, maximum principles, differential and integral inequalities, matrix inequality method, and reduction to a system of equations. The book can be used by applied mathematicians and as a basis for a course on stability of functional differential equations for graduate students.

Kun sutten joukkohon joutuu, niin ulvua täytyy Risto Rekola,2020-11-27 E-kirjaversio tarkoitus on tarjota suomenkielinen sananlasku tilanteeseen kuin tilanteeseen jollain murteella - jokaiseen kännykkään ja tietokoneeseen. Tätä ennen sananparret olivat hajallaan kymmenissä painetuissa teoksissa. Suluissa oleva paikka- tai maakunta ei tarkoita että sananlasku olisi siellä syntynyt, vaan mistä se on kerätty talteen. Eniten niitä on (kuntaliitoksineen) Nokialta (yli 3500), Hollolasta (2300), Ähtäristä (1600) ja Säkkijärveltä (noin 1000). Useimmissa kirjoissa sananlaskut on esitelty aihepiireittäin, mutta mielestäni aakkosjärjestyksen avulla löytää nopeammin haluamansa.
