*Web Reasoning and Rule Systems* Pascal Hitzler,2010-09-20 The Semantic Web aims at allowing knowledge to be freely accessed and - changed by software. It is now widely recognized that if the Semantic Web is to contain deep knowledge, the need for new representation and reasoning techniques is critical. These techniques need to find the right trade-off between expressiveness, scalability, and robustness to deal with the inherently incomplete, contradictory, and uncertain nature of knowledge on the Web. The annual International Conference on Web Reasoning and Rule Systems (RR) addresses these needs and has grown into a major international forum for the discussion and dissemination of new results concerning Web Reasoning and Rule Systems. The first three International Conferences on Web Reasoning and Rule Systems (see <http://www.rr-conference.org>), held in Innsbruck, Austria (2007), Karlsruhe, Germany (2008), and Chantilly, Virginia, USA (2009), received enthusiastic support from the Web Reasoning community. This volume contains the papers presented at the Fourth International Conference on Web Reasoning and Rule Systems (RR 2010), which was held in Bressanone/Brixen, Italy, September 22-24, 2010, and which continued the excellence of the RR series. It contains nine full papers, six short papers, four poster/position papers, one PhD paper, and two system descriptions, which were selected out of 31 submissions following a rigorous reviewing process, where each submission was reviewed by at least three program committee members. The volume also contains extended abstracts of the three invited talks/tutorials.

**Semantic Search over the Web** Roberto De Virgilio, Francesco Guerra, Yannis Velegrakis,2012-08-04 The Web has become the world's largest database, with search being the main tool that allows organizations and individuals to exploit its huge amount of information. Search on the Web has been traditionally based on textual and structural similarities, ignoring to a large degree the semantic dimension, i.e., understanding the meaning of the query and of the document content. Combining search and semantics gives birth to the idea of semantic search. Traditional search engines have already advertised some semantic dimensions. Some of them, for instance, can enhance their generated result sets with documents that are semantically related to the query terms even though they may not include these terms. Nevertheless, the exploitation of the semantic search has not yet reached its full potential. In this book, Roberto De Virgilio, Francesco Guerra and Yannis Velegrakis present an extensive overview of the work done in Semantic Search and other related areas. They explore different technologies and solutions in depth, making their collection a valuable and stimulating reading for both academic and industrial researchers. The book is divided into three parts. The first introduces the readers to the basic notions of the Web of Data. It describes the different kinds of data that exist, their topology, and their storing and indexing techniques. The second part is dedicated to Web Search. It presents different types of search, like the exploratory or the path-oriented, alongside methods for their efficient and effective implementation. Other related topics included in this part are the use of uncertainty in query answering, the exploitation of ontologies, and the use of semantics in mashup design and operation. The focus of the third part is on linked data, and more specifically, on applying ideas originating in recommender systems on linked data management, and on techniques for the efficiently querying answering on linked data.

CRC World Dictionary of Medicinal and Poisonous Plants Umberto Quattrocchi,2016-04-19 Following on the successes of two previous dictionary projects, the CRC World Dictionary of Plant Names and the CRC World Dictionary of the Grasses, Umberto Quattrocchi has undertaken this dictionary of economically important plants.... He has done for these plants what was so admirably done in his other works—brought the vast and scattered literature on plant names, and in this case, too, their uses, into coherent order so that the inquisitive scholar can get a foothold. —From the Foreword, Donald H. Pfister, Harvard University and Harvard University Herbaria, Cambridge, Massachusetts The CRC World Dictionary of Medicinal and Poisonous Plants: Common Names, Scientific Names, Eponyms, Synonyms, and Etymology provides the starting point for better access to data on plants used around the world in medicine, food, and cultural practices. The material found in the five volumes has been painstakingly gathered from papers of general interest, reports and records, taxonomic revisions, field studies, herbaria and herbarium collections, notes, monographs, pamphlets, botanical literature, and literature tout court. It includes sources available at various natural history libraries, floras and standard flora works, local floras and local histories, nomenclatural histories, and the International Code of Botanical Nomenclature. Much more than a dictionary, the book provides the names of thousands of genera and species of economically important plants, concise summaries of plant properties, and appropriate observations about medicinal uses. Drawing from a tremendous range of primary and secondary sources, it is an indispensable time-saving guide for all those involved with botany, herbal medicine, pharmacognosy, toxicology, medicinal and natural product chemistry, and agriculture.

**Food on Film** Tom Hertweck,2014-10-30 This collection addresses the relative scarcity of work relating to food-film studies, showcasing innovative viewpoints about a popular, yet understudied, subject in film. The volume asks provocative questions about food and its relationship with work, urban life, sexual orientation, the family, race, morality, and a wide range of “appetites.”

**The Search for Better Educational Standards** Martin Thrupp,2017-08-22 This book deals with the development of New Zealand's standards system for primary school achievement, ‘Kiwi Standards’, which took effect from 2010 onwards and is becoming increasingly embedded over time. The approach, where teachers make ‘Overall Teacher Judgements’ based on a range of assessment tools and their own observations rather than using any particular national test, has created predictable problems with moderation within and across schools. It has been claimed that this ‘bold’ Kiwi Standards approach avoids the narrowed curriculum and mediocre outcomes of high-stakes assessment in other countries. Yet this book suggests it just produces another variant of the same problems and demonstrates that even a relatively weak high-stakes assessment approach still produces performative effects. The book provides a blow by blow account of the development of a policy including the continuous repositioning of New Zealand's Government as it has sought to justify the policy in the face of opposition from educators. Indeed the Kiwi Standards tale provides a world-class example of teachers fighting back against policy, with the help of academics. There is an indigenous Māori aspect to the story as well. Finally, this book also provides comparative international perspectives including responses from well-known US, English and Australian academics.

*The Plot to Seize Russia* Martin Armstrong,2023-06-23 “Take care of Russia,” Boris Yeltsin said as he departed his presidency in August 1999. These words were directed at current Russian president, Vladimir Putin. Yeltsin specifically picked Putin as his predecessor to prevent the takeover of Russia. So, who was Yeltsin warning against? Newly declassified documents from the Clinton Administration prove that there was a plot to rig the Russian

election of 2000. These never-before-seen documents confirm numerous attempts to implement pro-Western policies using the Russian oligarchy headed by Boris Berezovsky. On the other side were the communists who desired a return to the glory days of the Soviet Union. As one of the largest international hedge fund managers, author Martin Armstrong found himself in the middle of perhaps the greatest espionage, or attempt at a regime change for Russia, in modern history. The Plot to Seize Russia pulls back the curtain to expose the most extraordinary attempt to seize power in modern history, but with the pen rather than armies. These declassified documents reveal a plot that has altered our thinking about the relations between the United States and Russia. The thirst for power comes seething through every line of these papers that alter our perception of reality, change the course of history, and now threaten us with World War III.

*Noah's Ravens* James O. Farlow,2018-10-08 How can the tracks of dinosaurs best be interpreted and used to reconstruct them? In many Mesozoic sedimentary rock formations, fossilized footprints of bipedal, three-toed (tridactyl) dinosaurs are preserved in huge numbers, often with few or no skeletons. Such tracks sometimes provide the only clues to the former presence of dinosaurs, but their interpretation can be challenging: How different in size and shape can footprints be and yet have been made by the same kind of dinosaur? How similar can they be and yet have been made by different kinds of dinosaurs? To what extent can tridactyl dinosaur footprints serve as proxies for the biodiversity of their makers? Profusely illustrated and meticulously researched, Noah's Ravens quantitatively explores a variety of approaches to interpreting the tracks, carefully examining within-species and across-species variability in foot and footprint shape in nonavian dinosaurs and their close living relatives. The results help decipher one of the world's most important assemblages of fossil dinosaur tracks, found in sedimentary rocks deposited in ancient rift valleys of eastern North America. Those often beautifully preserved tracks were among the first studied by paleontologists, and they were initially interpreted as having been made by big birds—one of which was jokingly identified as Noah's legendary raven.

*e-Pedia: Captain America: Civil War* Contributors, Wikipedia,2017-02-11 This carefully crafted ebook is formatted for your eReader with a functional and detailed table of contents. Captain America: Civil War is a 2016 American superhero film based on the Marvel Comics character Captain America, produced by Marvel Studios and distributed by Walt Disney Studios Motion Pictures. It is the sequel to 2011's Captain America: The First Avenger and 2014's Captain America: The Winter Soldier, and the thirteenth film of the Marvel Cinematic Universe (MCU). The film is directed by Anthony and Joe Russo, with a screenplay by Christopher Markus & Stephen McFeely, and features an ensemble cast, including Chris Evans, Robert Downey Jr., Scarlett Johansson, Sebastian Stan, Anthony Mackie, Don Cheadle, Jeremy Renner, Chadwick Boseman, Paul Bettany, Elizabeth Olsen, Paul Rudd, Emily VanCamp, Tom Holland, Frank Grillo, William Hurt, and Daniel Brühl. In Captain America: Civil War, disagreement over international oversight of the Avengers fractures them into opposing factions—one led by Steve Rogers and the other by Tony Stark. Constructing Iron Europe Irene Anastasiadou,2011-12-01 Conventional histories portray the development of railway infrastructures as a tool to build empires and nation states. Recent scholarship however, has stressed the importance of a transnational perspective beyond an exclusive focus on the nation state. The new perspective enriches both the history of modern Europe and European integration. Constructing Iron Europe demonstrates how during the interwar years key players saw railroads as instruments for building a transnational European community. Based on new archival research, Anastasiadou not only sheds light on patterns of internationalization of railways, but also explores the co-construction of the national and the European in the case of the Greek railways in the Interbellum period. **e-Pedia: Game of Thrones (season 6)** Wikipedia Contributors,2017-02-22 This carefully crafted ebook is formatted for your eReader with a functional and detailed table of contents. The sixth season of the fantasy drama television series Game of Thrones premiered on HBO on April 24, 2016, and concluded on June 26, 2016. It consists of ten episodes, each of approximately 50–60 minutes, largely of original content not found in George R. R. Martin's A Song of Ice and Fire series. Some material is adapted from the upcoming sixth novel The Winds of Winter and the fourth and fifth novels, A Feast for Crows and A Dance with Dragons. The series was adapted for television by David Benioff and D. B. Weiss. HBO ordered the season on April 8, 2014, together with the fifth season, which began filming in July 2015 primarily in Northern Ireland, Spain, Croatia, Iceland and Canada. Each episode cost over \$10 million. **Gangster's Paradise** Jared Savage,2023-10-01 The much anticipated follow-up to the bestseller that exposed the escalation of organised crime in New Zealand. Gangster's Paradise is about drugs, guns, gangs and money. Lots of money. A gang which took over a small rural town. A police officer shot and killed in a routine traffic stop. A port-worker who helped a gang whisk a shipping container off a wharf in the middle of the night. A crew of corrupt baggage handlers smuggling meth into the country during Covid lockdowns. A shooting inside a 5-star hotel in broad daylight. Turf wars, retaliation, and retribution: new gangs like the Mongols and Comancheros have brought with them better connections with international syndicates, challenging the established gangs like the Head Hunters - so dominant for many years - who have had to up their game in response. Jared Savage's bestselling book Gangland was about the evolution of gangs in New Zealand. Gangster's Paradise is about the deadly escalation.

**Narratives of Migrant and Refugee Discrimination in New Zealand** Angela McCarthy,2022-08-31 This book explores the question of whether the conceptualisation of New Zealand as a welcoming nation is accurate. Examining historical and contemporary narratives of migrant and refugee discrimination, it considers the economic, social, political, cultural and historical contexts from which discrimination emerges and its repercussions. Alert to race and ethnicity, gender, age, class, religion and inter-ethnic migrant conflict, this volume traverses an array of discriminatory practices – including xenophobia, racism and sectarianism – and responses to them. With rich evidence,

fascinating new insights and engagement comparatively and transnationally with global themes of exploitation, exclusion and inequalities, Narratives of Migrant and Refuge Discrimination in New Zealand will appeal to scholars across the humanities and social sciences with interests in migration and diaspora studies, race and ethnicity and refugee studies.
