Collected Ancient Greek Novels B. P. Reardon, 2019-05-07 Prose fiction, although not always associated with classical antiquity, flourished in the early Roman Empire, not only in realistic Latin novels but also and indeed principally in the Greek ideal romance of love and adventure. Enormously popular in the Renaissance, these stories have been less familiar in later centuries. Translations of the Greek stories were not readily available in English before B.P. Reardon's first appeared in 1989. Nine complete stories are included here as well as ten others, encompassing the whole range of classical themes: romance, travel, adventure, historical fiction, and comic parody. A foreword by J.R. Morgan examines the enormous impact this groundbreaking collection has had on our understanding of classical thought and our concept of the novel.

An Ode to Muses to Kleio Apollo's Vagabond, 2023-10-21 This poetry collection explores love, lust, betrayal, and a dash of rage. Bonus points if you're a Greek mythology fan! Written from a female perspective, it goes through the motions of complicated relationships, cheating, longing, and moments of passion. Sprinkled in with references from your favorite myths, it's an ideal journey for anyone feeling intense romantic emotions.

The Inter-Processual Self Kleio Akrivou, German Scalzo, José Víctor Orón Semper, 2019-01-17 How should we understand the self, as well as personal, relational and systemic growth? This volume proposes a radical new way of answering this question. It rests on a non-representational theory of knowledge on how to approach and understand the self and action more broadly. Although it has never been lost, the Aristotelian emphasis on excellence in moral character and practical reason as preconditions for achieving happiness has gradually been degraded. This book suggests that this has happened thanks to a split between knowledge and action that can be traced back to the origins of modernity. Modern academic disciplines in general, and psychology in particular, are based on the idealisation of theoretical, hypothetical and abstract reason, suggesting that this morally neutral ideal must guide human action. This volume systematically integrates those domains in a more profound and meaningful proposal, relevant for current times and challenges. Based on previous research bridging philosophy, psychology and neuroscience, the contributors here identify two alternative paradigms for conceiving of the self and human development: the so-called "autonomous self" (AS) and the "inter-processual self" (IPS). The book considers the person as an ethical being and as the foundational cornerstone of a new theory of self, action and knowing that achieves decisive distance from modern theory's limitations. To keep on-going dialogue on human development open, the authors introduce a new theoretical model (IPS) which can be scientifically measured and tested; they also suggest its further application in concrete, practical realms, thus touching on how the adoption of the IPS paradigm inspires a renewed view of human cognition, education, governance, and business management.

Surfing the Past Olivier Nyirubugara, 2012 This book discusses one of the most

frequently discussed subjects in history education during the last two decades, namely how secondary school pupils use the World Wide Web for their learning activities. Based on two case studies in two Dutch schools, the book shows some ways in which the use of the Web has changed history education in at least three respects: first, the findings of the two case studies show that the Web has a huge potential to turn the history class - previously described as boring and too abstract - into a livelier and more attractive environment, where concepts, events, phenomena and processes of the past almost always have textual and/or [audio]visual representations; second, strong indications were observed showing that the Web fosters historical understanding, not only by triggering thinking processes that take pupils beyond the shown contents, but also by prompting them to evaluate sources and sample relevant fragments for their assignments; third, the Web has brought into history education sources that were previously excluded, including those described as unconventional. This book shows, among other things, that convergence is underway on both the user side - since pupils use both conventional and unconventional online sources - and the content-production side, where heritage institutions are increasingly getting involved in unconventional platforms like Wikipedia. The latter emerged from the two case studies as the most popular source of historical information, while the websites of heritage institutions tended to appear at the bottom of the list of references. Unlike personal sites, which also scored better, heritage sites face some obstacles, including the still dominant desire to preserve institutions' identity and uniqueness, conservatism - which often prevents the redefinition of collection management tasks -, and the tax-payers' dilemma. For that reason, collections are not hyperlinked and, therefore, remain invisible and not easy to find online.

How to Make a Database in Historical Studies Tiago Luís Gil, 2021-07-27 This book is a greatly supplemented translation from Portuguese, originally published in 2015. It discusses the most appropriate ways to create databases for research on history and other humanities, including an extensive debate about the usages that historians have made of computing since the 1950s. It has four chapters: the first is dedicated to theoretical and methodical questions about the usage of databases in history; the second is about technical issues; the third presents the concept of research engineering (how to improve research in groups); the last is about the construction of databases. The author states that the use of technology in research in history and humanities should be preceded and mediated by theories and methods which deal with these disciplines and not by technical issues. The historian must know how to think "correctly" in order to use the technological tools in an autonomous way. The book provides a background, demonstrating how theory, methodology, and technique are always articulated in historical research, and will appeal to history students and researchers.

The Valkyrie Protocol David Weber, Jacob Holo, 2020-10-06 UNTANGLE THE PAST TO SAVE THE FUTURE. A NEW NOVEL IN THE WORLD OF THE BEST-SELLING THE GORDIAN PROTOCOL TIME IS RUNNING OUT Agent Raibert Kaminski and the crew of the Transtemporal Vehicle Kleio have stumbled across a temporal implosion that has claimed two whole universes, and neither Raibert nor his crew can—figure out what caused this calamity, or how to stop its spread. Meanwhile, old colleagues of Raibert's from the Antiquities Rescue Trust, together with a version of Samuel Pepys transplanted from the 17th century into the 30th, have proposed an expedition into the past. The goal? To branch the timeline by preventing the Plague of Justinian, one of the worst pandemics in human history. And on a multidimensional level, governmental entity SysGov's multiverse neighbor, the xenophobic Admin, is stirring. While their ambassadors put on a friendly show, the Admin is amassing a fleet of advanced, heavily armed time machines—with SysGov firmly in the crosshairs. In the midst of the temporal turmoil, time is running out for Raibert and his team to save the rest of the known universes from ceasing to exist.

Navigating the paradoxes of time can be a killer task—especially when dogged by those who seek your destruction at every turn. But the crew of the Kleio won't go down without a fight, no matter where—or when—the threat to their home comes from. Russia's Foreign Trade and Economic Expansion in the Seventeenth Century J. T. Kotilaine, 2005-01-01 This work is the first comprehensive assessment of Russia's foreign trade flows and economic growth in the seventeenth century. By demonstrating the growing openness of the economy, it reveals a key element in Russia's rise to great power status.

The Challenges of Capitalism for Virtue Ethics and the Common Good Kleio

Akrivou,Alejo José G. Sison,2016-08-26 The evolution of modern capitalist society is increasingly being marked by an undeniable and consistent tension between pure economic and ethical ways of valuing and acting. This book is a collaborative and cross-disciplinary contribution that challenges the assumptions of capitalist business and society. It ultimately reflects on how to restore benevolence, collaboration, wisdom and various forms of virtuous deliberation amongst all those who take part in the common good, drawing inspiration from European history and continental philosophical traditions on virtue.

On-line Virtual Museums: an application of on-line VR Museum for the Parthenon Marbles. Internet: a means of cultural repatriation Kleio

Tzanaki,2004-12-16 Among the most debated archaeological problems is the repatriation of cultural objects that have been removed from the country of origin and then dispersed in Museums around the world. The need for the return of cultural objects to their homelands is not only derived from the people they belong to, but also from those they appreciate their value and have archaeological interest in them. However, there are a number of problems revolved around most cases, which prohibit the cultural repatriation to be achieved. The case of the Parthenon Marbles is one of the best-known claims for the repatriation of cultural property, as its sculptures, which constitute an integral part of it, have been removed from the temple and are stored in different Museums. Towards the problem of cultural repatriation, Parthenon Marbles case study is used to research to what extent the Internet can be introduced as a means of providing a form of cultural repatriation through the idea of a Virtual Museum. The argument is supported by the conception, design and construction of a Virtual Museum for the Parthenon Marbles. The web site is a pilot application implementing some sides of the temple, while providing guidelines and techniques for completion of the rest. The development of the web site also provided an opportunity for evaluating tools and techniques used in virtual museums. Finally, the VR Museum concept as a means of repatriation is evaluated, discussing the areas where such an application would be beneficial and also the level of information that can provide for the specified repatriated object(s) according to specific user groups and needs.

Echoing Events Tina van der Vlies,2022-12-12 “Echoing Events” questions the perpetuation, actualization, and canonization of national narratives in English and Dutch history textbooks, wide-reaching media that tendentially inspire a sense of meaning, memory, and thus also identity. The longitudinal study begins in the 1920s, when the League of Nations launched several initiatives to reduce strong nationalistic visions in textbooks, and ends in the new millennium with the revival of national narratives in both countries. The analysis shows how and why textbook authors have narrated different histories – which vary in terms of context, epoch, and place – as ‘echoing events’ by using recurring plots and the same combinations of historical analogies. This innovative and original study thus investigates from a new angle the resistance of national narratives to change.
