Remedies of Planets Baldev Bhatia, 2017-06-16 INTRODUCTION All problems in life are caused by the weak, badly placed, or afflicted planets. To help people come out of their problems and afflictions, the astrologer advises appropriate astral remedies to strengthen the functional benefic planets and to reduce the afflictions of the functional malefic planets. Based on the empirical studies of thousands of natal charts, these astrological remedies have been successfully used for warding off the malefic influences and for generating good results in life. When used as a preventive measure, these remedies may save the person from health issues, even if there are strong combinations for such problems indicated in the natal chart. The two fold application of astral remedies (to strengthen the benefices and reduce the afflictions of the malefic) is provided after studying the problematic planetary influences in a chart. An effective set of astral remedies for the various rising signs is offered through AstroView, Inc. There are also a number of effective astral remedies which are good for everyone. See the links below to learn more: First of all this is not 'Graha Shanti'. Shanti is only needed if a planet is in the house of the enemy or looking at the enemy-

What's So Special about Planet Earth? Robert E. Wells,2009-09-01 Move to another planet? Sounds interesting! In our imaginary spaceship, let's check out the planets in our solar system. Mercury is closest, but it has no air, and it's either sizzling hot or bitterly cold. The atmosphere on Venus is

poisonous; plus, human beings would cook there. Mars might work, but you'd always have to be in a protective shelter. And if you got to the outer planets, you couldn't even land as they are mostly made of gas! Our home planet is looking good. Why is Earth so comfortable for plants, animals, and people? As Robert E. Wells explains, it's because of our just-right position from the sun, marvelous atmosphere, and abundant water. Our planet is very special and perfect for us, and that's why we must do all we can to keep Earth healthy.
