Twitter Power Joel Comm,2009-03-03 Get the business leader's guide to using Twitter to gain competitive advantage. Since 2006, forward-thinking companies like Apple, JetBlue, Whole Foods, and GM have discovered the instant benefits of leveraging the social media phenomenon known as Twitter to reach consumers directly, build their brand, and increase sales. Twitter is at the leading edge of the social media movement, allowing members to connect with one another in real time via short text messages?called tweets?that can be received either via the Twitter site or by e-mail, instant messenger, or cell phone. Many companies have started building entire teams within their organization dedicated solely to responding to tweets from consumers about their

brand. And this is just the beginning. In *Twitter Power*, Internet marketing and Web innovation expert Joel Comm shows businesses and marketers how to integrate Twitter into their existing marketing strategies to build a loyal following among Twitter members, expand awareness for their product or service, and even handle negative publicity due to angry or disappointed consumers. The book also presents case studies of companies on the forefront of the Twitter movement, to help you develop your own social networking strategies. *Twitter Power* is the result of extensive testing and participation in the social networking community and is a must-have for any business that wants to keep up with the social media movement. *Twitter Power* features a foreword by Tony Robbins.

CEO Branding Marc Fetscherin, 2015-06-19
CEO Branding advances our understanding of the importance and impact that CEOs have on companies. In recent years, there has been a growing body of interdisciplinary literature on this powerful aspect of branding, and Fetscherin has invited a leading panel of international scholars and practitioners to contribute original chapters in their area of expertise. The book introduces the concept of the CEO as a brand, and outlines the 4Ps of this branding mix – the CEO (person), personality, prestige (reputation), and performance. It discusses the CEO branding process, and demonstrates the many ways in which this ‘human brand’ affects the company in financial terms (such as performance, profit, and stock returns), as well as non-financial terms (reputation, trust, and firm strategy). The book

also includes 'lessons learned' and many examples that illustrate how companies can measure and manage the CEO brand. This comprehensive, authoritative volume will give students, researchers, marketing and communication managers, and CEOs themselves a thorough understanding of all aspects of the CEO brand. A must read for any CEO who is serious about developing, managing and measuring their own brand. For more information, visit www.ceobranding.org

Women Making Meaning Lana F. Rakow, 2015-10-23
Originally published in 1992. This book captures the dynamic confluence of feminist and communication scholarship by setting out some of the provocative questions that mark this intersection. Several of the essays in the book are theoretical in nature, and consider the changing complexion of the field in view of this cross-fertilization; other contributors tackle those individual forms of communication that pose certain challenges for women such as verbal harassment and pornography. The final section of the book, more ethnographic in nature, presents a number of case studies, written primarily by women of colour, which recount the various ways that communication forms such as television, journalism and spoken discourse construct and perpetuate racist and sexist stereotypes.

Exploiting the Limits of Law Åsa Gunnarsson, Eva-Maria Svensson, 2016-04-22
Moving beyond the question of whether an area of scholarly investigation can truly be characterized as 'legal', *Exploiting the Limits of Law* combats the often unhelpful constraints of law's subject-

matter and formal processes. Through a process of reflection on the limits of law and repeated efforts to redraw them, this book challenges the general sense of pessimism among feminists and others about the usefulness of law as an instrument of change. The work combines theoretical analysis of the law's boundaries with investigation of the practical settings for changing legal and policy environments. Both the empirical focus of this volume, and its underlying theoretical concern with the limits of the law and its gender implications, render it of interest to legal scholars throughout the world, whether of EU law, feminism, social policy or philosophy.

Academic Writing Lennart Bjork,Christine Raisanen,1997 This book offers a guided process-writing course in the most common expository text types and genres, including research papers, that students need at university and in their future professional careers.

The Myth of Wu Tao-tzu Sven Lindqvist,2012-08-02 'During the Tang dynasty, the Chinese artist Wu Tao-tzu was one day standing looking at a mural he had just completed. Suddenly, he clapped his hands and the temple gate opened. He went into his work and the gates closed behind him.' Thus begins Sven Lindqvist's profound meditation on art and its relationship with life, first published in 1967, and a classic in his home country - it has never been out of print. As a young man, Sven Lindqvist was fascinated by the myth of Wu Tao-tzu, and by the possibility of entering a work of art and making it a way of life. He was drawn to artists and writers who shared this vision, especially

Hermann Hesse, in his novel *Glass Bead Game*. Partly inspired by Hesse's work, Lindqvist lived in China for two years, learning classical calligraphy from a master teacher. There he was drawn deeper into the idea of a life of artistic perfectionism and retreat from the world. But when he left China for India and then Afghanistan, and saw the grotesque effects of poverty and extreme inequality, Lindqvist suffered a crisis of confidence and started to question his ideas about complete immersion in art at the expense of a proper engagement with life. *The Myth of Wu Tao-tzu* takes us on a fascinating journey through a young man's moral awakening and his grappling with profound questions of aesthetics. It contains the bracing moral anger, and poetic, intensely atmospheric travel writing Lindqvist's readers have come to love.

Dying for Time Martin Hägglund, 2012-10-30 Novels by Proust, Woolf, and Nabokov have been read as expressions of a desire to transcend time. Hägglund gives them another reading entirely: fear of time and death is generated by investment in temporal life. Engaging with Freud and Lacan, he opens a new way of reading the dramas of desire as they are staged in both philosophy and literature.

Working with Affect in Feminist Readings Marianne Liljeström, Susanna Paasonen, 2010-03-08 Affect has become something of a buzzword in cultural and feminist theory during the past decade. References to affect, emotions and intensities abound, their implications in terms of research practices have often remained less manifest. *Working with Affect in Feminist*

Readings: *Disturbing Differences* explores the place and function of affect in feminist knowledge production in general and in textual methodology in particular. With an international group of contributors from studies of history, media, philosophy, culture, ethnology, art, literature and religion, the volume investigates affect as the dynamics of reading, as carnal encounters and as possibilities for the production of knowledge. *Working with Affect in Feminist Readings* asks what exactly are we doing when working with affect, and what kinds of ethical, epistemological and ontological issues this involves. Not limiting itself to descriptive accounts, the volume takes part in establishing new ways of understanding feminist methodology.

Cyberfeminism in Northern Lights Malin Sveningsson Elm, Jenny Sundén, 2009-03-26 What does it mean to study supposedly global media phenomena from a Nordic perspective? In which ways could a Nordic feminist perspective on digital media make a difference in relation to dominant research traditions? What would be particular and unique about Nordic cyberfeminism – compared to the “unmarked” version of cyberfeminism dominating the field today? These are some of the questions that this book sets out to answer. *Cyberfeminism in Northern Lights: Digital Media and Gender in a Nordic Context* pushes the boundaries of contemporary cyberfeminism significantly. Against the background of an expanding body of research in the field of digital media and gender – which to this date has primarily been carried out from an Anglo-American perspective – the book argues that

feminist studies of digital media need to become more inclusive and aware of their own geographical and cultural biases and limits. The book takes as its point of departure the knowledge and experiences from the Nordic countries: Norway, Sweden, Finland, Iceland and Denmark. Although often grouped together under the assumed homogeneity of Scandinavia, there are important differences between the countries – but also certain qualities and aspects that run across national borders, which make for an intriguing foundation of this book. 'Highlighting the work of several of Scandinavia's best internet researchers, this collection shows how our understanding of the intersection of gender and computer technology is both universal and cultural. It's fascinating reading for anyone interested in questions of gender, culture, or social aspects of the internet and serves as a useful corrective for those who assume these issues can be understood without considering them from multiple cultural positions.' Nancy Baym, Associate professor of Communication Studies, University of Kansas. 'This is a very illuminating, unconventional and agenda-setting collection of essays by a new generation of scholars. Very Nordic in its pragmatic approach, egalitarian spirit and scholarly excellence, it manages to strike a global note. The range, depth and scope of the theoretical concerns, coupled with the originality of the themes discussed casts a new light on a number of crucial issues in feminist cultural studies of science and technology. A delight to read!' Rosi Braidotti,

Distinguished professor in the Humanities, Utrecht University.

Digital Bodies Susan Broadhurst, Sara Price, 2017-10-12 □ This book explores technologies related to bodily interaction and creativity from a multi-disciplinary perspective. By taking such an approach, the collection offers a comprehensive view of digital technology research that both extends our notions of the body and creativity through a digital lens, and informs of the role of technology in practices central to the arts and humanities. Crucially, *Digital Bodies* foregrounds creativity, the interrogation of technologies and the notion of embodiment within the various disciplines of art, design, performance and social science. In doing so, it explores a potential or virtual new sense of the embodied self. This book

will appeal to academics, practitioners and those with an interest in not only how digital technologies affect the body, but also how they can enhance human creativity.

Imagined Identities Gönül Pultar, 2014-04-14 How are identities being forged during the age of globalization? This collection of essays, by scholars from various disciplines and regions of the world, discusses both the construction and deconstruction of identity in its engagement with culture, ethnicity, and nationhood. The authors explore the tension resulting from the desire to create a new cultural space for identities that are at once national, regional, linguistic, and religious. Among the wide-ranging approaches, Tanja Stampfl looks at the elusiveness of cultural identity in Khaled Hosseini's *The Kite Runner*; Dawn Morais investigates issues of ethnicity and nationality in Malaysia's tourism advertising; and Cathy Waegner explores ethnic identities as globalized market commodities. Throughout the volume, identity is approached from a variety of sites—fiction, news analysis, film, theme parks, and field work—to contribute new insight and perspective to the well-worn debate over what identity signifies in societies where the existence of minorities, both indigenous and immigrant, challenges the dominant group.

Children of Their City Per Anders Fogelström, 2008

Ethnic Minorities and the Media Simon Cottle, 2000-12-16 * What are the latest developments in the production, representation and reception of media output, produced by, for or

about ethnic minorities? * What informs the questions media researchers ask and pursue when examining the mass media and ethnic minorities? * What are the principal forces of change currently shaping the field? There are few media issues more pressing, or potentially more consequential, than the representation of ethnic minorities. This authoritative text therefore brings together leading international researchers who have examined some of the latest processes of change (and continuity) informing the field of ethnic minorities and the media. Numerous studies of 'race', racism and the mass media have been conducted in the past. However, both the media landscape and the cultural field of ethnic minorities are fast changing, and this book addresses the recent developments which have threatened to outpace our ability to map, understand and intervene in processes of change. Presented in an accessible style, this book provides the reader with an overview of the very latest research findings and informed discussion. It opens with an introductory essay which maps recent approaches to the field, followed by substantive chapters which are structured thematically to address key processes of change such as media representations, media production, and cultures of identity.
