**Dynamics in Logistics** Hans-Jörg Kreowski,Bernd Scholz-Reiter,Klaus-Dieter Thoben,2013-03-28 The volume comprises the proceedings of the third International Conference on Dynamics in Logistics LDIC 2012. The scope of the conference targeted the identification, analysis, and description of the dynamics of logistic processes and networks. The spectrum ranged from the modeling and planning of processes and innovative methods like autonomous control and knowledge management to the new technologies provided by radio frequency identification, mobile communication, and networking. The growing dynamics in the area of logistics poses completely new challenges: Logistic processes and networks must rapidly and flexibly adapt to continuously changing conditions. LDIC 2012 provided a venue for researchers from academia and industry interested in the technical advances in dynamics in logistics. The conference addressed research in logistics from a wide range of fields, e.g. engineering, computer science and operations research. The volume consists of two invited papers and of 49 contributed papers divided into various subjects including transport logistics, routing in dynamic logistic networks, modeling, simulation, optimization and collaboration in logistics, identification technologies, mathematical modeling in transport and production logistics, information, communication, risk and failure in logistic systems, autonomous control in logistic processes, global supply chains and industrial applications, and the Internet of Things in the context of logistics.

**Strategic Planning, Execution, and Measurement (SPEM)** Girish P. Jakhotiya,2013-05-13 Although there are countless books available on strategic management, there are few, if any, that supply practical coverage of strategic planning, execution, and measurement—until now. Considering the entire value chain, this book covers the complete process of strategic planning, execution, and measurement. Based on three decades of field-tested experience, Strategic Planning, Execution, and Measurement (SPEM): A Powerful Tool for CEOs provides both a consultant's view and an entrepreneurial approach to strategic planning, execution, and measurement. Walking you through the process, it begins by defining world-class status, visions, missions, business models, and value chains. Next, it discusses the two most important prerequisites of strategic planning and includes a questionnaire to help you evaluate operations, systems, and structure in your organization. The book provides a matrix of 25 parameters for assessing the status of your organization that can help to pinpoint the perceptual gaps between top executives and owners. It includes a strategy bank with 150 generic strategies in the five performance areas of business and identifies methods for monitoring strategy execution that provide early warning signals. It also introduces the Entrepreneurial Score Card, a tool for improving the impact of strategic planning and execution in your organization. Detailing the structure and preparation process for the strategic plan, the book illustrates the financial impact of strategy execution and explains the various financial monitoring parameters used in the performance cards of individual employees. It concludes by describing an entrepreneurial approach to strategic planning and with a comprehensive case study that illustrates the entire strategy formulation process and its conversion into an annual budget. This book is ideal for CEOs, CFOs, COOs, business owners, heads of business verticals, heads of corporate planning or strategy, functional heads, teachers, students, and practicing consultants in the area of strategic planning.

**Psychopathy** D.J. Cooke,Adelle E. Forth,Robert D. Hare,2012-12-06 Psychopathy is a very important concept for those working in the field of criminal justice - investigators, prosecutors, and those who have to evaluate, manage and treat offenders. In Psychopathy: Theory, Research and Implications for Society, detailed, empirically based contributions by the world's leading researchers describe the relevance of the construct to practical and policy issues, examining its relevance to such topics as treatment, risk management and recidivism. The use of the concept in a range of populations is discussed, including juveniles, children, and the mentally disordered, as well as across cultures. The major strength of the volume is that the validity of the psychopathy construct is enhanced by the extensive empirical support: contributors explore topics including the genetic, biological, affective, interpersonal and information processing models that underpin the disorder. Audience: All those dealing with offenders - psychologists, psychiatrists, lawyers, judges, prison administrators and those who formulate policy in the criminal justice system.
