Desert Malaria B.K. Tyagi, 2023-02-17 This book comprehensively reviews the

disease dynamics, distribution, surveillance, epidemiology, diagnosis, control strategies, and management of the desert malaria. It highlights the potential risks of unstable but often exacerbated malaria conflagration as epidemics in the middle of duned desert, a desert oasis, and desert-fringe regions. Further, it reveals the factors inveigled into desert environments due to extensive anthropogenic activities such as canalized irrigation projects, high-yielding new agriculture practices, human concentration, and increased trade. It addresses the impact of irrigation on the malarial dynamics and its coupling to the climate forcing. The book also offers a model for desert transformation into malaria heaven under the changed climatic conditions including high rainfall, humidity, and depletion in temperature. Lastly, it offers insight into malaria epidemiology and disease control in the desert's arid environments. This book is an essential resource for medical entomologists, parasitologists, epidemiologists, and public health researchers.

Love Across the Salt Desert Keki N. Daruwalla, 2011 The iconic title story of this collection narrates how Najab defies his father, the international border between India and Pakistan and the hostile salt desert of the Rann of Kutch for Fatimah. In 'When Gandhi Came to Gorakhpur' Shadilal, a small-time lawyer, dithers over giving up his profession and joining the freedom struggle until his mind is made up for him. And when Sultan Mahmud of Ghazni stints on a few silver coins for the poet Abul Qasim, he is visited by terrible nightmares in 'Of Abul Qasim'. Love across the Salt Desert, which brings together a selection of Keki Daruwalla's best-received short fiction, presents thematic variety and stunning breadth of vision. His prose is witty,

precise and shot through with a unique poetic sensibility. These stories establish Daruwalla, one of India's best-known poets, as a daring and gifted practitioner of short fiction. Son, have you brought anything? he asked, an edge of iron deliberately introduced into his voice. Yes, replied Najab, as he ushered Fatimah in. The rain stormed down and swept away three years of drought.

In this book, an attempt has been made to give basic concepts of ecology, environmental science and various aspects of natural resource conservation. The topics covered primarily deal with environmental factors affecting organisms, adaptations, biogeography, ecology of species populations and species interactions, biotic communities and ecosystems, environmental pollution, stresses caused by toxics, global environmental change, exotic species invasion, conservation of biodiversity, ecological restoration, impact assessment, application of remote sensing and geographical information system for analysis and management of natural resources, and approaches of
