Danielle Labbé, André Sorensen

The Media in Latin America Jairo Lugo, 2008-04-16

Able to edit, this volume offers an unusually wide-ranging collection of well-informed chapters by experts from across the region. For those who want to understand the current realities that shape media performance from the Gulf of Mexico to the Tierra del Fuego, here is the ideal starting-point. Professor Philip Schlesinger, University of Glasgow, UK For those of us in the area of Latin American studies, this text comes to fill a gap in the field, both in terms of teaching and research. Charles Jones, Centre of Latin American Studies, University of Cambridge, UK More than an introduction, it provides a comprehensive insight into the modern Latin America media landscape. Ramesh Jaura, Chairman of the Global Cooperation Council and Euro-Mediterranean coordinator of the IPS News Agency The media's role as a mechanism of control throughout Latin America has become increasingly sophisticated. Many repressive elements of the dictatorship periods have remained in place or have mutated into more subtle means of censorship and control. Media owners and political elites are more than keen to use the media's increasingly prominent role in framing politics in the region, in order to pursue their own agenda and interests. This book provides a comprehensive and critical overview of some of the most important media systems in Latin America. Drawing on original and critical essays from some of the most prominent authors in the field, the author approaches the subject with a country-by-country analysis, exploring the most relevant aspects of

the media in each society. The essays cover: Media history Organisation The interrelationship of the media and the state Media regulation and policy and ownership Broadcast media Film, music, advertising and digital media The Media in Latin America is valuable reading for students of media and journalism studies.

History of Terrestrial Mammals in South America

Thomas Defler, 2018-12-19 This book takes a non-technical approach in covering the evolution of South American mammalian fauna throughout geological history, and discusses how South America has changed due to mammalian invasions. Unlike other works on the subject, this book attempts to answer several crucial questions that often go unmentioned together in one cohesive monograph. What was the fauna like before the American interchange? What were the origins of the now-extinct groups when northern species arrived and out-competed them? How did the modern mammalian fauna come into being with such disparate animal groups? This information is given from a historical perspective throughout the book's 15 chapters, and is presented in an easily graspable fashion by mostly avoiding technical language. The book is written for academics, scientists and scholars engaged in paleontology, zoology and evolutionary biology, but may also appeal to a larger audience of general readers interested in mammalian evolution. The book begins with an introduction, describing the tools necessary to interpret the evolutionary history of South American mammals in geological terms and some of the early people who helped found South

American mammalian paleontology. Chapter 2 describes the Mesozoic first mammals of Gondwana and what we are learning about them, dominant before the K/T extinction event. Then chapters 3 through 8 cover the Cenozoic, or Age of Mammals, highlighting the major mammalian groups of South America that replaced the earlier mammals of Gondwana. These groups include the marsupials, native ungulates, the xenarthrans (armadillos, anteaters, sloths), the caviomorphs (rodents), and the platyrrhine monkeys. Chapters 9 and 10 address the Antarctic La Meseta fossils and the Colombian La Venta fossil faunal assemblages. Chapter 11 discusses the neotropical mammals that invaded the Caribbean Islands, and illustrates the influence South America has had on adjacent faunas. Chapter 12 describes the origin of the Amazon River and the role it has played in the evolution of the mammals and other flora and fauna. Chapter 13 tells the story of the Great American Biotic Interchange (GABI), and chapter 14 follows this up with a discussion of the Pleistocene mammal communities and their eventual extinction. Chapter 15 concludes the text by discussing the modern mammals of South America, and how despite the extensive Pleistocene extinctions there is still a lot of mammalian diversity in South America.

Bioprospection of Co-products and Agro-industrial Wastes Joilane Alves Pereira Freire, Stella Regina Arcanjo Medeiros, Jailane de Souza Aquino, Chistiane Mendes Feitosa, Mahendra Rai, 2023-06-30 The proposed book titled as "Bioprospection of Coproducts and Agro-industrial Wastes: A Sustainable Biotechnological Approach",

seeks to offer the importance of the recycling, reuse of food residue, byproducts of fruits and agri-wastes to the academic community and industries. In developing countries facing malnutrition and environmental problems, this book would be very useful. The food waste and the residues resulting from this process are now becoming environmental problems. These mainly include leaves, stems, seeds, bark, and roots that have high nutritional value, many times even greater than the part usually consumed. It is a pressing priority to reuse and recycle the waste which is detrimental to the environment. This book would be an essential reading for students, researchers, and people from the food and pharma industry.

Colombia Canal Juan Andres Moreno, Claudia G Baldwin, Jaime G Gomez, 2020 500 years ago we started talking about this mega project for America: The Colombia Interoceanic Canal in the most treasured corner of South America: El Chocó, Colombia. Five centuries later, the Canal has not been done, and instead, a humanitarian crisis has developed and continues to grow. Children suffer chronic malnutrition in this area, the highest maternal mortality rate in childbirth is reported and there is unemployment and poverty of 60%. The authors have embarked on seven years of research, compiling all existing references on the subject and proposing the plan to build the Canal. The Colombians and the American continent deserve this project, especially when the giant ships of the sea will be the merchant fleet in 2030. We invite you to reflect through these pages, on how to

bless Colombia with a project of this magnitude, how to get Chocó out of the humanitarian crisis and visit the website: www.canatcol.com

Educación superior en Colombia Alberto Roa Varelo, 2014 La educación superior en Colombia está atravesando por un momento interesante: mientras las expectativas sociales en torno a su rol en la sociedad crecen y todavía se debate su financiamiento, la irrupción de la globalización en la educación superior trae nuevos y más complejos retos. Desde el reciente intento fallido de reformar la Ley 30 de 1992, el tema de la reforma educativa ha tomado un nuevo aire en el país. Por esta razón, el Center for International Higher Education (CIHE) de Boston College y la Universidad del Norte se han aliado en el esfuerzo conjunto de este libro para aportar un punto de vista académico y para dar a la discusión un sentido más global. Este libro reúne las visiones de veinte expertos nacionales e internacionales, quienes en capítulos breves y de fácil lectura abordan algunos de los principales temas de esta discusión.

OECD Rural Studies Rural Policy Review of Colombia 2022 OECD, 2022-11-25 Rural regions in Colombia have untapped potential to boost wealth and well-being in the country. Despite remarkable economic growth over the last two decades, Colombia's development policy needs to increase its focus on rurality, as regional inequalities remain high by OECD standards and structural challenges still prevent greater development in rural places.

The Politics of Narcotic Drugs Julia Buxton, 2011-04-06 The Politics of Narcotic Drugs brings together leading experts on the drugs trade to provide an accessible yet detailed analysis of the multiple challenges that the contemporary trade in narcotic drugs and its prohibition pose, from the local to the international community. Through the use of country and regional case studies that include Afghanistan, Mexico, Colombia

and the Middle East, the drivers of the drugs trade and the security and development dilemmas created by the prohibition of narcotic substances are explored. Contributions that assess the international drug control regime, British anti-drug enforcement organizations, 'narcoterrorism' and options for drug policy reform engage readers in current debates and the narrative frameworks that shape discussion of the drugs issue. The book is an invaluable guide to the dynamic and far-reaching issue of narcotic drugs and the impact of their prohibition on our countries and communities. The chapters are followed by an A-Z glossary of key terms, issues and organizations, and a section of maps and statistics.

Amazonia: Landscape and Species Evolution Carina Hoorn, Frank Wesselingh, 2011-09-26 The book focuses on geological history as the critical factor in determining the present biodiversity and landscapes of Amazonia. The different driving mechanisms for landscape evolution are explored by reviewing the history of the Amazonian Craton, the associated sedimentary basins, and the role of mountain uplift and climate change. This book provides an insight into the Meso- and Cenozoic record of Amazonia that was characterized by fluvial and long-lived lake systems and a highly diverse flora and fauna. This fauna includes giants such as the ca. 12 m long caiman *Purussaurus*, but also a varied fish fauna and fragile molluscs, whilst fossil pollen and spores form relics of ancestral swamps and rainforests. Finally, a review the molecular datasets of the modern Amazonian rainforest and aquatic ecosystem,

discussing the possible relations between the origin of Amazonian species diversity and the palaeogeographic, palaeoclimatic and palaeoenvironmental evolution of northern South America. The multidisciplinary approach in evaluating the history of Amazonia has resulted in a comprehensive volume that provides novel insights into the evolution of this region.
