International Governance and Regimes Peter Kien-hong Yu,2012 This book examines China's involvement in international governance, international regimes, and globalization. Peter Kien-hong Yu offers a new framework with which to understand 'international regimes' and applies it to important Chinese case studies such as arms control, disarmament, and non-proliferation; the counter-piracy regime and the environmental issue. Whilst internationally important matters related to such systems are identified, Yu's discussions attempt to find out whether any particular system works better in relation to China, and asks if not, why not? After examining eight different cases, the author concludes that these regimes are working but there is ample room for improvement and that the Chinese (Communists) for one have to enhance their understanding of international governance and try to export their experience to other parts of the world. *International Governance and Regimes* will be appeal to anyone interested in International Politics, Chinese Studies, Political theory and International Relations.

The Development of the Chinese Legal System Guanghua Yu,2010-11-17 In recent years the Chinese legal system has undergone many reforms and this book brings the literature up to date, offering a contemporary account of the law and administration in China. This book is the result of collective efforts in analysing the political, economic and social factors which affect the development of Chinese law. The volume contains contributions from a number of experts and scholars of Chinese law who examine some of the most important areas of Chinese law. The book covers constitutional law, criminal law, property law, mortgage law, intellectual property law, corporate law, securities regulation, banking regulation, civil procedural law, arbitration law, environmental law, and the regulation of telecommunications services. Whilst the book addresses a number of diverse legal areas all the contributions look to explain the factors which led to the development of the law and the consequences of such developments, as well as the progress made by

developing legal institutions and the possible obstacles to future development.

China's Diplomacy in Eastern and Southern Africa Seifudein Adem, 2016-05-23 In contemporary discourse on China-Africa relations, there are, on the one hand, the Sino-pessimists who see China as a giant vacuum-cleaner, sucking up Africa's resources in order to fuel its own rapid industrialization, and destroying Africa's development potential in the process. On the other hand, the Sino-optimists see China as the ultimate savior of Africa, capable of or willing to 'develop' the continent. Between the two divergent schools of thought are those sitting on the fence for the time being, the Sino-pragmatists, who are less sanguine for sure about what Africa would gain from China-Africa relations, but are nevertheless willing to reserve judgment until the dust settles. This book is innovative in two ways: it introduces a regional approach to the study of China-Africa relations by focusing on Eastern and Southern Africa; and it puts forward a disciplinary framework-disciplinary in both senses of that term- for interrogating the burgeoning literature about China-Africa relations by conceptualizing the three schools of thought mentioned above.

A Resurgent China S. D. Muni, Tan Tai Yong, 2013-11-12 Bringing together a range of South Asian perspectives on rising China in a comparative framework, an attempt has been made, for the first time, to identify and examine the political, economic and socio-cultural stakeholders and constituencies that influence the respective policy of individual South Asian countries towards China. The Universalism of Human Rights Rainer Arnold, 2012-08-21 Is there universalism of human rights? If so, what are its scope and limits? This book is a doctrinal attempt to define universalism of human rights, as well as its scope and limits. The book presents tests of universalism on international, regional and national constitutional levels. It is maintained that universalism of human rights is both a 'concept' and a 'normative reality'. The normative character of human rights is scrutinized through the study of international and regional agreements as well as national constitutions. As a consequence, limitations of normativity are identified, usually on the international level, and take the form of exceptions, reservations, and interpretations. The book is based on the General and National Reports which were originally presented at the 18th International Congress of the International Academy of Comparative Law in Washington D.C. 2010.

Power in the Changing Global Order Martin A. Smith, 2013-04-26 Power has been compared to the weather: people discuss it all the time, but very few really understand it. This book seeks to demystify this complex concept by providing students with an incisive and engaging introduction to the shifting configurations of power in the contemporary global order. Drawing on the work of leading international relations scholars, philosophers and sociologists, the analysis goes beyond simplistic views of power as material capability, focusing also on its neglected social dimensions. These are developed and explored through a detailed examination of the changing international role, status and capacities of the United States, Russia and China since the end of the Cold War. Far from achieving multipolarity, the book concludes that the contemporary world remains essentially unipolar; America having moved to correct the mistakes of George W. Bush's first term in office, while China and Russia have, in different ways, limited their own abilities to challenge American primacy. This book will be essential reading for students of international relations and politics, as well as anyone with an interest in the shifting balance of power in the global system.
