The content focuses on basic to advanced sentence structure and the use of language in real-life conversational contexts. We do not believe in learning through memorization of single words, even for younger learners. From the very beginning, we teach the language based on a communicative approach, through the formation and use of sentences in relevant contexts. The theory behind our content is to learn the basic sentence structure first, and then, build on the initial knowledge by applying it to new contexts. The illustrations throughout the books are complementary to the educational content and create a fun visual learning context to help you along your language learning journey! Book 1 teaches you the basic sentence structure in Farsi and elaborates on the use of the be verb in Simple Present to express emotions. Just like English, the be verb is used in Farsi to talk about things like name, occupation, nationality, quality, emotions, time, and place. In this book, you will learn a range of emotion-related vocabulary as well as the basic grammar knowledge you need in order to make simple sentences with the be'' verb in both affirmative and negative forms.
