Becoming Wild Carl Safina,2020-04-14 A NEW YORK

TIMES NOTABLE BOOK OF 2020 In this superbly articulate cri de coeur, Safina gives us a new way of looking at the natural world that is radically different.—The

Washington Post New York Times bestselling author Carl Safina brings readers close to three non-human cultures—what they do, why they do it, and how life is for them. A New York Times Notable Books of 2020 Some believe that culture is strictly a human phenomenon. But this book reveals cultures of other-than-human beings in some of Earth's remaining wild places. It shows how if you're a sperm whale, a scarlet macaw, or a chimpanzee, you too come to understand yourself as an individual within a particular community that does things in specific ways, that has traditions. Alongside genes, culture is a second form of inheritance, passed through generations as pools of learned knowledge. As situations change, social learning—culture—allows behaviors to adjust much faster than genes can adapt. *Becoming Wild* brings readers into intimate proximity with various nonhuman individuals in their free-living communities. It presents a revelatory account of how animals function beyond our usual view. Safina shows that for non-humans and humans alike, culture comprises the answers to the question, "How do we live here?" It unites individuals within a group identity. But cultural groups often seek to avoid, or even be hostile toward, other factions. By showing that this is true across species, Safina illuminates why human cultural tensions remain maddeningly intractable despite the arbitrariness of many of our differences. *Becoming Wild* takes readers behind the curtain of life on Earth, to witness from a new vantage point the most world-saving of perceptions: how we are all connected.

Annie and the Wild Animals Jan Brett, 2012-10-11 A lively tale sure to be loved by fans of *The Mitten* Originally published in 1985, *Annie and the Wild Animals* is back in a large hardcover format with a striking new jacket that makes this new edition the perfect gift for young readers.

Annie's cat, Taffy, disappears and she is lonely. She looks for a friendly, furry pet near the woods, but a giant moose, a grumpy bear and others show up to eat her corn cakes until they are all gone. They leave, and to Annie's surprise, out of the woods comes Taffy with her three new kittens.

Sounds of Nature: World of Forests ,2019-02-05

Travel the world with the Sounds of Nature series – press the note in each of the 10 forest habitats to hear vivid recordings of over 60 different animal sounds. The Sounds of Nature series brings the natural world to life with the sounds of real animals recorded in the wild. Captivating edge-to-edge illustrations show animals in action in their habitats around the globe. The animals are numbered in the order they can be heard, with fascinating facts and descriptions of the sounds they make, so you can listen out for each one. A speaker set into the back cover plays a sound clip when you press firmly on the note in each illustration. The battery is already installed, so simply open and explore. In World of Forests, discover these amazing habitats: evergreen forest of Germany; redwood forest of California, USA; deciduous forest of England, UK; Amazon rainforest of South America; cloud forest of the Virunga mountains, Africa; desert forest of Socotra Island, Yemen; beech forest in Brussels, Belgium; mangrove forest in the Sundarbans, India; and boreal forest of Alaska, USA. Listen to these wooded places come to life as you hear the: Low-pitched growls of the Eurasian lynx (evergreen forest) Flute-like sound of the varied thrush (redwood forest) Neighing and snorting of a wild pony (deciduous forest) Raucous howls and grunts of the red howler monkey (rainforest) Scratchy sound of a blue-baboon spider moving to find an insect meal (desert forest) Chewing and snapping sounds of a giant panda having a meal (bamboo forest) Step under the trees, where 80 percent of the

world's land species make their home, to take in the glorious sights and sounds!

Voices of the Wild Bernie Krause, 2015-08-25 Since 1968, Bernie Krause has traveled the world recording the sounds of remote landscapes, endangered habitats, and rare animal species. Through his organization, Wild Sanctuary, he has collected the soundscapes of more than 2,000 different habitat types, marine and terrestrial. With powerful illustrations and compelling stories, Krause provides a manifesto for the appreciation and protection of natural soundscapes. In his previous book, *The Great Animal Orchestra*, Krause drew readers' attention to what Jane Goodall described as "the harmonies of nature . . . [that are being] one by one by one, snuffed out by human actions." He now explains that the secrets hidden in the natural world's shrinking sonic environment must be preserved, not only for our scientific understanding, but for our cultural heritage and humanity's physical and spiritual welfare. Krause's narrative—supplemented by exclusive access to field recordings from the wild—draws on a compelling range of personal anecdotes, histories, and examples to document his early exploration of this field and to lay the groundwork for future generations.

Wild Symphony Dan Brown, 2023-09-19 #1 New York Times bestselling author Dan Brown makes his picture book debut with this mindful, humorous, musical, and uniquely entertaining book! The author will be donating all US royalties due to him to support music education for children worldwide, through the New Hampshire Charitable foundation. Travel through the trees and across the seas with Maestro Mouse and his musical friends! Young readers will meet a big blue whale and speedy cheetahs, tiny beetles and graceful swans. Each has a special secret to share. Along the way, you might spot the

surprises Maestro Mouse has left for you- a hiding buzzy bee, jumbled letters that spell out clues, and even a coded message to solve! Children and adults can enjoy this timeless picture book as a traditional read-along, or can choose to listen to original musical compositions as they read--one for each animal--with a free interactive smartphone app, which uses augmented reality to play the appropriate song for each page when a phone's camera is held over it.
