Power Supplies for LED Driving Steve Winder, 2016-12-28 Power Supplies for LED Driving, Second Edition explores the wide use of light-emitting diodes due to their efficient use of power. The applications for power LEDs include traffic lights, street lamps, automotive lighting, architectural lights, theatre lighting, household light replacements, signage lighting (replacing neon strip lights and fluorescent tubes), LCD display backlighting, and many more. Powering (driving) these LED's is not always simple. Linear driving is inefficient and generates far too much heat. With a switching supply, the main issues are EMI, efficiency, and of course cost. This book covers the design trade-offs involved in LED driving applications, from low-power, to UB-LEDs and beyond. Provides a practical, hands-on approach to power supply design for LED drivers Contains detailed examples of what works throughout the design process Presents commentary on how the calculated component value compares with the actual value used, including a description of why the choice was made

Reading for Understanding Cynthia Greenleaf, Ruth Schoenbach, Linda Friedrich, Lynn Murphy, Nika Hogan, 2023-04-04 Improve student outcomes in reading and literacy with the latest edition of this bestselling text The newly revised Third Edition of Reading for Understanding: How Reading Apprenticeship Improves Disciplinary Learning in Secondary and College Classrooms is the latest iteration of the best-selling, landmark book in the field of adolescent literacy. The authors teach a clear and concise instructional framework for students at all learning levels, from those with special learning needs to those taking honors and Advanced Placement courses. The book also includes: A direct correlation to disciplinary literacy, making the book an even more valuable resource in a wide range of classrooms Explanation of the social and personal dimensions for building a foundation for engaged learning Discussions of the value of setting aside dedicated class time for independent, silent reading With collaboration tips that go beyond the classroom and advice on building a cognitive "reading toolbox," Reading for Understanding is an indispensable resource for teachers at the Grade 6 and up, literacy coaches, reading teachers, community college instructors, and other school leaders.

Day in Mamre, Night in Sodom Letellier, 2021-11-15 Recent developments in Pentateuchal studies – from both diachronic (historical) and synchronic (literary-textual) perspectives – have made it possible to read Genesis 18 and 19, the evocative story of Abraham and Lot, in a new light. This work uses both types of approach to examine the text, (1) considered in its own terms – its structural and linguistic features, in a detailed close reading of each verse – and (2) considered in terms of its symbolism and imagery in relation to those found in comparable cultures of the ancient Middle East. The end product is an integrated reading of the Abraham and Lot story as a sustained literary unit, and the reading process demonstrates the value of a range of exegetical methods – structuralist, linguistic, literary, historical and anthropological – in the continuing exploration of this well-known biblical narrative.

The Trouble with Textbooks Gary A. Tobin, Dennis R. Ybarra, 2008-07-31 Our elementary, middle, and high school teaching about Jews, Judaism, and Israel is driven by textbook misstatements about Jewish theology, social structure, and the history of Israel that comprise an unsavory picture of Jews and Israel. This book will be an extremely valuable reference tool for educators and members of the public interested in religion and the Middle East.

The Elephant's Leg Craig Hight, ed., Mario Minichiello, ed., 2021-07-23 This book is a response to the question asked by incoming students of the Creative Industries sector: 'what can I do in the Creative Industries'. This volume is designed to provide a source of inspiration to readers in imagining their own futures within fields such as musical performance, media production, drawing and illustration, journalism, public relations, filmmaking, design, documentary, dramatic performance, virtual reality and others covered in these chapters. Presented here are pathways through the lived experience of the Creative Industries, from practitioners and theorists, educators and researchers at the University of Newcastle, Australia. Each chapter offers a partly autobiographical account of the author's journey through their field, engaging with their overall philosophy or the key ideas, the challenges and opportunities that have inspired them in their research and creative practice. Some chapters focus on a singular, pivotal moment or project, while others draw upon the breadth of an entire career. Collectively, these accounts bring to life the career possibilities within a rapidly expanding global sector of creativity and innovation with immense cultural, social, political and economic impact.

Kentucky in the Nation's History Robert McNutt McElroy, 1909 In the preparation of the present volume, I have studied the local collections from the point of view of one primarily interested in the nation. Such local events as have had a distinctly national influence, as well as such national events as have particularly affected local conditions, have been my concern. A typical example of the first is presented in the Kentucky Resolutions of 1798, and, of the second, in the purchase of Louisiana.

Gospel Interpretation and Christian Life Francis J Moloney, 2017-11-01 The voice of Francis J Moloney, SDB, has been heard in New Testament studies for many decades. Internationally famous for his work on the Gospel of John, this volume gathers studies that demonstrate the breadth and richness of his interests, beyond that well-established enterprise. The first part of the boom is dedicated to Gospel studies, with the majority of essays focussing upon the Gospel of Mark. They reflect his long interest and his major commentary on that Gospel (2012). Studies on Matthew, Luke and John complete these reflections.

With this practical guide, you'll go behind the scenes to see how and why manufacturers are now designing LED devices to light everything from homes and offices to streets and warehouses. Author Sal Cangeloso shows you the working parts of a "simple" LED bulb and explains the challenges electronics companies face as they push LED lighting into the mainstream. You'll learn how you can use LEDs now, and why solid state lighting will bring dramatic changes in the near future. Explore the drivers, phosphors, and integrated circuits in a typical LED bulb. Understand the challenges in producing LED bulbs with acceptable brightness, color temperature, and power consumption. Learn about non-bulb LED applications, including lamps, street lights, and signage. Discover the market forces driving—and impeding—the adoption of LED lighting. Compare LEDs to compact fluorescent lamps (CFLs) and electron-stimulated luminescence (ESL) bulbs. Gaze into the future of intelligent lighting, including networked lighting systems.

Acts of Literature Jacques Derrida, 2017-09-25 First published in 1992. *Acts of Literature*, compiled in close association with Derrida, brings together for the first time a number of Derrida's writings on literary texts on the question of literature. The essays discuss literary figures such as Rousseau, Mallarme, Joyce, Shakespeare and Kafka. Comprising pieces spanning Derrida's career, the collection includes a substantial new interview with him on questions of literature, deconstruction, politics, feminism and history. Derek Attridge provides an introductory essay on deconstruction and the question of literature, and offers suggestions for further reading. These essays examine the place and function of literature in Western culture. They highlight Derrida's interest in literature as a significant cultural institution and as a peculiarly challenging form of writing, with inescapable consequences for our thinking about philosophy, politics and ethics. This book should be of interest to undergraduates and academics in the field of literary theory and criticism and continental philosophy.
