Australian Native Plants Yasmina Sultanbawa, Fazal Sultanbawa, 2017-12-19 Australian Native Plants: Cultivation and Uses in the Health and Food Industries provides a comprehensive overview of native food crops commercially grown in Australia that possess nutritional and health properties largely unknown on a global basis. These native foods have been consumed traditionally, have a unique flavor diversity, offer significant health promoting effects, and contain useful functional properties. Australian native plant foods have also been identified for their promising antioxidant and antimicrobial properties that have considerable commercial potential. This book is divided into three parts: The first part reviews the cultivation and production of many Australian native plants (ANP), including Anise Myrtle, Bush Tomato, Desert Raisin, Davidson's Plum, Desert Limes, Australian Finger Lime, Kakadu Plum, Lemon Aspen, Lemon Myrtle, Muntries, Native Pepper, Quandong, Riberry, and Wattle Seed. It then examines the food and health applications of ANP and discusses alternative medicines based on aboriginal traditional knowledge and culture, nutritional characteristics, and bioactive compounds in ANP. In addition, it reviews the anti-obesity and anti-inflammatory properties of ANP and discusses food preservation, antimicrobial activity of ANP, and unique flavors from Australian native plants. The third section covers the commercial applications of ANP. It focuses on native Australian plant extracts and cosmetic applications, processing of native plant foods and ingredients, quality changes during packaging, and storage of Australian native herbs. The final few chapters look into the importance of value chains that connect producers and consumers of native plant foods, new market opportunities for Australian indigenous food plants, and the safety of using native foods as ingredients in the health and food sectors.

Green Urbanism Down Under Timothy Beatley, Peter Newman, 2012-09-26 In this immensely practical book, Timothy Beatley sets out to answer a simple question: what can Americans learn from Australians about “greening” city life? Green Urbanism Down Under reports on the current state of “sustainability practice” in Australia and the many lessons that U.S. residents can learn from the best Australian programs and initiatives. Australia is similar to the United States in many ways, especially in its “energy footprint.” For example, Australia's per capita greenhouse gas emissions are second only to those of the United States. A similar percentage of its residents live in cities (85 percent in Australia vs. 80 percent in the United States). And it suffers from parallel problems of air and water pollution, a national dependence on automobiles, and high fossil fuel consumption. Still, after traveling throughout Australia, Beatley finds that there are myriad creative responses to these problems—and that they offer instructive examples for the United States. Green Urbanism Down Under is a very readable collection of solutions. Although many of these innovative solutions are little-known outside Australia, they all present practical possibilities for U.S. cities. Beatley describes “green transport” projects, “city farms,” renewable energy plans, green living programs, and much more. He considers a host of public policy initiatives and scrutinizes regional and state planning efforts for answers. In closing, he shares his impressions about how Australian results might be applied to U.S. problems. This is a unique book: hopeful, constructive, and filled with ideas that have been proven to work. It is a “must read” for anyone who cares about the future of American cities.

'... so interesting that it only stayed on my desk very briefly before it was taken away... invaluable in anyone's kitchen and particularly useful for professional chefs.' - Caroline Waldegrave, Leiths School of Food and Wine

The Oldest Foods on Earth John Newton, 2016-02-01 ‘This is a book about Australian food, not the foods that European Australians cooked from ingredients they brought with them, but the flora and fauna that nourished the Aboriginal peoples for over 50,000 years. It is because European Australians have hardly touched these foods for over 200 years that I am writing it.’ We celebrate cultural and culinary diversity, yet shun foods that grew here before white settlers arrived. We love ‘superfoods’ from exotic locations, yet reject those that grow here. We say we revere sustainable local produce, yet ignore Australian native plants and animals that are better for the land than those European ones. In this, the most important of his books, John Newton boils down these paradoxes by arguing that if you are what you eat, we need to eat different foods: foods that will help to reconcile us with the land and its first inhabitants. But the tide is turning. European Australians are beginning to accept and relish the flavours of Australia, everything from kangaroo to quandongs, from fresh muntries to the latest addition, magpie goose. With recipes from chefs such as Peter Gilmore, Maggie Beer and René Redzepi’s sous chef Beau Clugston, *The Oldest Foods on Earth* will convince you that this is one food revolution that really matters.

Hungry Jeff Gordinier, 2020-07-21 A food critic chronicles four years spent traveling with René Redzepi, the renowned chef of Noma, in search of the most tantalizing flavors the world has to offer. “If you want to understand modern restaurant culture, you need to read this book.”—Ruth Reichl, author of *Save Me the Plums* *Hungry* is a book about not only the hunger for food, but for risk, for reinvention, for creative breakthroughs, and for connection. Feeling stuck in his work and home life, writer Jeff Gordinier happened into a fateful meeting with Danish chef René Redzepi, whose restaurant, Noma, has been called the best in the world. A restless perfectionist, Redzepi was at the top of his game but was looking to tear it all down, to shutter his restaurant and set out for new places, flavors, and recipes. This is the story of the subsequent four years of globe-trotting culinary adventure, with Gordinier joining Redzepi as his Sancho Panza. In the jungle of the Yucatán peninsula, Redzepi and his comrades go off-road in search of the perfect taco. In Sydney, they forage for sea rocket and sandpaper figs in suburban parks and on surf-lashed beaches. On a boat in the Arctic Circle, a lone fisherman guides them to what may or may not be his secret cache of the world’s finest sea urchins. And back in Copenhagen, the quiet canal-lined city where Redzepi started it all, he plans the resurrection of his restaurant on the unlikely site of a garbage-filled lot. Along the way, readers meet Redzepi’s merry band of friends and collaborators, including acclaimed chefs such as Danny Bowien, Kylie Kwong, Rosio Sánchez, David Chang, and Enrique Olvera. *Hungry* is a memoir, a travelogue, a portrait of a chef, and a chronicle of the moment when daredevil cooking became the most exciting and groundbreaking form of artistry. Praise for *Hungry* “In *Hungry*, Gordinier invokes such playful and lush prose that the scents of mole, chiles and even lingonberry juice waft off the page.”—Time “This wonderful book is really about the adventures of two men: a great chef and a great journalist. *Hungry* is a feast for the senses, filled with complex passion and joy, bursting with life. Not only did Jeff Gordinier make me want to jump on the next flight (to Mexico, Copenhagen, Sydney) in search of the perfect meal, but he also reminded me to stop and savor the ride.”—Dani Shapiro, author of *Inheritance*
