**Webcam** Daniel Miller,Jolynna Sinanan,2014-03-12 The use of webcam, especially through Skype, has recently become established as one more standard media technology, but so far there has been no attempt to assess its fundamental nature and consequences. Yet webcam has profound implications for many facets of human life, from self-consciousness and intimacy to the sustaining of long-distance relationships and the place of the visual within social communications. Based on research in London and Trinidad, this book shows how 'always-on' webcam is becoming an entirely different phenomenon from the initial use of webcam as a videophone. Webcam is examined within the framework of 'polymedia' - that is, the new environments created by the simultaneous presence of a multiplicity of communication technologies - and used to exemplify a theory of attainment that accepts media technologies as aspects of, rather than detracting from, our basic humanity.

Webcam Savvy for Telemedicine Clarence Jones,2020-05-15 Telemedicine is a rapidly expanding

technology to deliver medical exams and treatment to patients over the Internet. In remote areas of the world it is reaching patients who have no other way to receive medical care. In the U.S., the Telemedicine industry till total \$2 billion in 2018 and is predicted to grow another \$1 billion per year for the foreseeable future. The doctor or nurse can have a conversation with the patient through software similar to Skype or Face Time, in real time. Today's technology is truly astounding. This book shows both doctor and patient how to use webcams so the experience closely parallels an in-person visit to a clinic or a doctor's office. Telemedicine's primary advantages are cost and convenience. There is no need for an appointment, no need for transportation, no delay in diagnosis and treatment. Once they're comfortable with it, patients tend to check in more frequently and ask more questions. Doctors and nurses can do a better job of follow-up care with Telemedicine. And it can sharply reduce the cost and patient overload in hospital emergency rooms. Author Clarence Jones is a former prize-winning TV reporter who currently has eight other books in print. He is a master story teller and teacher.

**Sweetie 2.0** Simone van der Hof, Ilina Georgieva, Bart Schermer, Bert-Jaap Koops, 2019-07-06 This book centres on Webcam Child Sex Tourism and the Sweetie Project initiated by the children's rights organization Terre des Hommes in 2013 in response to the exponential increase of online child abuse. Webcam child sex tourism is a growing international problem, which not only encourages the abuse and sexual exploitation of children and provides easy access to child-abuse images, but which is also a crime involving a relatively low risk for offenders as live-streamed webcam performances leave few traces that law enforcement can use. Moreover, webcam child sex tourism often has a cross-border character, which

leads to jurisdictional conflicts and makes it even harder to obtain evidence, launch investigations or prosecute suspects. Terre des Hommes set out to actively tackle webcam child sex tourism by employing a virtual 10-year old Philippine girl named Sweetie, a so-called chatbot, to identify offenders in chatrooms. Sweetie 1.0 could be deployed only if police officers participated in chats, and thus was limited in dealing with the large number of offenders. With this in mind, a more pro-active and preventive approach was adopted to tackle the issue. Sweetie 2.0 was developed with an automated chat function to track, identify and deter individuals using the internet to sexually abuse children. Using chatbots allows the monitoring of larger parts of the internet to locate and identify (potential) offenders, and to send them messages to warn of the legal consequences should they proceed further. But using artificial intelligence raises serious legal questions. For instance, is sexually interacting with a virtual child actually a criminal offence? How do rules of criminal procedure apply to Sweetie as investigative software? Does using Sweetie 2.0 constitute entrapment? This book, the outcome of a comparative law research initiative by Leiden University's Center for Law and Digital Technologies (eLaw) and the Tilburg Institute for Law, Technology, and Society (TILT), addresses the application of substantive criminal law and criminal procedure to Sweetie 2.0 within various jurisdictions around the world. This book is especially relevant for legislators and policy-makers, legal practitioners in criminal law, and all lawyers and academics interested in internet-related sexual offences and in Artificial Intelligence and law. Professor Simone van der Hof is General Director of Research at the Center for Law and Digital Technologies (eLaw) of the Leiden Law School at Leiden University, The Netherlands. Ilina Georgieva, LL.M., is a PhD researcher at the Faculty of Governance and

Global Affairs at Leiden University, Bart Schermer is an associate professor at the Center for Law and Digital Technologies (eLaw) of the Leiden Law School, and Professor Bert-Jaap Koops is Professor of Regulation and Technology at the Tilburg Institute for Law, Technology, and Society (TILT), Tilburg University, The Netherlands./div

**Perceptions of Climate Change from North India** Aase J. Kvanneid,2021-03-07 Perceptions of Climate Change from North India: An Ethnographic Account explores local perceptions of climate change through

ethnographic encounters with the men and women who live at the front line of climate change in the lower Himalayas. From data collected over the course of a year in a small village in an eco-sensitive zone in North India, this book presents an ethnographic account of local responses to climate change, resource management and indigenous environmental knowledge. Aase Kvanneid's observations cast light on the precarious reality of climate change in this region and bring to the fore issues such as access to water, NGO intervention and climate information for farmers. In doing so, she also explores classic topics in the study of rural India including ritual, gender, social hierarchy and political economy. Overall, this book shows how the cause and effect of climate change is perceived by those who have the most to lose and explores how the impact of climate change is being dealt with on a local and global scale. This book will be of great interest to students and scholars of the anthropology of climate change, environmental sociology and rural development.
