Mobile Learning Environment (MoLE) Project Jacob Hodges, 2013-01-22

The e;Mobile Learning Environment (MoLE) Project: a global technology initiative;, was a two-year project that included e-Learning and medical professionals from academia, commercial, government and NGO representing 24 countries from five continents. It focused on providing training/education in areas with low-bandwidth and limited internet connectivity and infrastructure. This eBook provides readers with -- a comprehensive education and training app that contains six major content categories (i.e., learning, reference library, standards, networking, mission tools, and mission pack);- access to, and use of, the Mobile Learning Environment (MoLE) Project source code for iOS and Android devices, and the online content catalogue repository to create, share and develop apps;- the data collection and evaluation strategy that incorporated social responsibility, ethical practices, solid research approaches and professional standards;- an in-depth review of the evaluation finding on the accessibility, effectiveness, satisfaction/self-efficacy, utility and usefulness of mobile technologies as a learning medium; and - conclusions on what made the app learner centered (i.e., built on the skills and knowledge of the individual/teams), knowledge centered (i.e., providing educational content that is factually sound), and community centered (i.e., promoted the sharing of knowledge and collaboration). It also provides in-depth information on what is contained in the six major

content categories that were developed (i.e., library, networking, mission packs, mission tools, leaning, and standards), which is also available in both the Apple and Android Markets. This eBook will be of interest to: - Anyone developing mobile applications- Educators and Teachers- E-Learning and m-Learning Professionals- Evaluators- Government and Non-Governmental Organizations (NGO)- Information Technology (IT) Professionals- Quality Management Professionals - Research, Development, Testing & Evaluation (RDT&E) Professionals- Scientist and Technology (S&T) Professionals

Learning Mathematics and Logo Celia

Hoyles, Richard Noss, 1992 These original essays summarize a decade of fruitful research and curriculum development using the LISP-derived language Logo. They discuss a range of issues in the areas of curriculum, learning, and mathematics, illustrating the ways in which Logo continues to provide a rich learning environment, one that allows pupil autonomy within challenging mathematical settings. Essays in the first section discuss the link between Logo and the school mathematics curriculum, focusing on the ways in which pupils' Logo activities relate to and are influenced by the ideas they encounter in the context of school algebra and geometry. In the second section the contributions take up pedagogical styles and strategies. They tackle such cognitive and metacognitive questions as, What range of learning styles can the Logo setting accommodate? How can teachers make sense of pupils' preferred strategies? And how can teachers

help students to reflect on the strategies they are using? Returning to the mathematical structures, essays in the third section consider a variety of mathematical ideas, drawing connections between mathematics and computing and showing the ways in which constructing Logo programs helps or does not help to illuminate the underlying mathematics.

Road & Track Crew's Big & Fast Cars Dan Bova, 2022-03-08 The fastest, funniest page-turner on the planet! This is the ultimate book for kids who love slick supercars, powerful monster trucks, and record-smashing speed machines. Buckle up – the only thing more exciting than reading this book about big and fast cars is sitting behind the wheel of one crossing the finish line at the Indy 500! Inside you'll find amazing color photos, mind-blowing facts, and answers to some very urgent questions, like: Do you know why the van was embarrassed around its friends? Because it had a little gas! Since the invention of the wheel, people have been building machines that go faster and faster and look cooler and cooler. The first cars went about 10 mph, now they easily break 200 mph – and some even drive themselves! Speaking of which, ever wonder whose fault it is if two self-driving cars get in an accident? Pick up this book and find out! Under the hood you'll discover: Incredible auto-related facts like record setting rides (check out the 763 mph ThrustSSC rocket car!) and answers to seriously silly questions (How do race car drivers pee during a race?) Many S.T.E.A.M. learning opportunities such as the science of how cars work and the history of cars

from the Model T to electric cars to a Tesla in space! Behind-the-scenes stories of people with great car-related jobs such as a Hot Wheels designer, the guy who created the Batmobile, a scientist who controls rovers on Mars, and of course, record-setting drivers like Danica Patrick, Alexander Rossi, Dale Earnhardt, Jr. and teen sensation Chloe Chambers. Fun activities such as drawing lessons (create your own car cartoon character!) matching games, quizzes, plus tons of jokes. Sneak peeks inside the garages of your favorite famous car-collection celebs like The Rock, Lady Gaga, Guy Fieri and other car-obsessives! The only thing readers need to drive Road & Track Crew Big & Fast Cars is a license for fun. So turn the key, step on the gas and let's go!

Media in Mind Daniel Reynolds,2018-11-30 Where do you end, and where do media begin? In *Media in Mind*, author Daniel Reynolds draws upon naturalist philosophies of the mind from John Dewey through contemporary theories of embodied and extended cognition to make the case that the lines separating media from the minds of their users are not blurry or variable so much as they never existed to begin with. Through analyses of films and video games from 1900 to the present, *Media in Mind* shows how media forms and technologies challenge dominant models of perception and mental representation, and how they complicate theoretical understanding of concepts like the platform and the interface. In order to do justice to the profound and literally mind-changing power of media, Reynolds argues, we need to think not so much about the relationship between media and the mind as about the roles that media play in our minds. Through this crucial distinction, *Media in Mind* surveys more than a century of media theory to illustrate the ways that scholars of film and digital media have situated and reconsidered a

series of divisions between media, user, and world, and how these conceptual divisions have reflected and inflected their ways of understanding the mind.

Why Kids Can't Spell Roberta Heembrock, 2008 Why Kids Can't Spell is a resource reference book for parents and educators who have an interest in and a concern for children's spelling ability. The purpose of this book is to encourage and foster good spelling practices in the home and at school to reflect modern teaching methods. The design of this book uses a scope and sequence format with each chapter building on the previous one. Every chapter includes a discussion on spelling background knowledge. In this section one finds an analysis of children's writing samples, in accordance with J. Richard Gentry and Jean Wallace Gillet's Model of Spelling Development. This is followed by numerous inquiry-based, project based and generative ideas and activities. The activities in this book are practical and easy to prepare, use readily available materials and are meant to facilitate readers' understanding. All chapters are related and therefore, the reader is encouraged to browse and borrow from any chapter. The activities may be modified in order to appropriately challenge and meet individual needs.

Journey to Literacy: No Worksheets Required

Krista Flemington, Linda Hart-Hewins, Una Villiers, 2011 The play-based learning and individualized strategies in this practical book build on the wide range of literacy skills present in the kindergarten classroom. This resource explores simple ways to use traditional learning

centres to provide children with real and authentic reasons to listen, speak, read, write, and view. Teachers will find a wealth of resources for creating meaningful learning experiences, including: answers to often-asked questions; milestones to inform teaching instruction; activities and games for both individuals and groups, and literacy extensions that involve children with quality literature, authentic artifacts, and recordings This highly readable book will support teachers as they move beyond worksheets and nurture students on their journey to lifelong literacy.--Publisher.

Children, Adolescents, and the Media Victor C. Strasburger,Barbara J. Wilson,Amy B. Jordan,2013-03-14 *Children, Adolescents, and the Media*, Third Edition provides a comprehensive, research-oriented overview of how the media impact the lives of children and adolescents in modern society. The approach is grounded in a developmental perspective, focusing on how young people of different ages and levels of cognitive, emotional, and social development interact with the media. Incorporating the most up-to-date research available, Authors Victor C. Strasburger, Barbara J. Wilson, and Amy B. Jordan target areas most controversial and at the heart of debates about the media and public health—equipping students to approach the media as critical consumers.

Art Of Atari Tim Lapetino,2016-10-26 Atari is one of the most recognized names in the world.

Since its formation in 1972, the company pioneered hundreds of iconic titles including Asteroids, Centipede, and Missile Command. In addition to hundreds of games created for arcades, home video systems, and computers, original artwork was specially commissioned to enhance the Atari experience, further enticing children and adults to embrace and enjoy the new era of electronic entertainment. The Art of Atari is the first official collection of such artwork. Sourced from private collections worldwide, this book spans over 40 years of the company's unique illustrations used in packaging, advertisements, catalogs, and more. Co-written by Robert V. Conte and Tim Lapetino, The Art of Atari includes behind-the-scenes details on how dozens of games featured within were conceived of, illustrated, approved (or rejected), and brought to life! Includes a special Foreword by New York Times bestseller Ernest Cline author of Armada and Ready Player One, soon to be a motion picture directed by Steven Spielberg. Whether you're a fan, collector, enthusiast, or new to the world of Atari, this book offers the most complete collection of Atari artwork ever produced!
