Atlas of a Lost World Craig Childs,2019-04-09 The first people in the New World were few, their encampments fleeting. On a side of the planet no human had ever seen, different groups arrived from different directions, and not all at the same time. The land they reached was fully inhabited by megafauna—mastodons, giant bears, mammoths, saber-toothed cats, enormous bison, and sloths that stood one story tall. These Ice Age explorers,

hunters, and families were wildly outnumbered and many would themselves have been prey to the much larger animals. In *Atlas of a Lost World*, Craig Childs blends science and personal narrative to upend our notions of where these people came from and who they were. How they got here, persevered, and ultimately thrived is a story that resonates from the Pleistocene to our modern era, and reveals how much has changed since the time of mammoth hunters, and how little. Through it, readers will see the Ice Age, and their own age, in a whole new light.

Dinosaurs: New Visions of a Lost World Michael J. Benton, 2021-11-23 The world's leading paleontologist takes us on a visual tour of the latest dinosaur science, illustrated with accurate and stunning paleoart. Dinosaurs are not what you thought they were—or at least, they didn't look like you thought they did. Here, world-leading paleontologist Michael J. Benton brings us a new visual guide to the world of the dinosaurs, showing how rapid advances in technology and amazing new fossil finds have changed the way we see these extinct beasts forever. Stunning, brand-new illustrations by paleoartist Bob Nicholls display the latest and most exciting scientific discoveries in vibrant color. From *Sinosauropelta*, the first dinosaur to have its color patterns identified—a ginger-and-white striped tail and a “bandit mask”—by Benton’s team at the University of Bristol to recent research on the surprising mixed feathers and scales of *Kulindadromeus*, this is one of the first books to include cutting-edge scientific research in paleontology. Each chapter focuses on a particular extinct species, featuring a specially commissioned illustration by Bob Nicholls that brings to life the latest scientific breakthroughs, with accompanying text exploring how paleontologists have determined new details, such as the patterns on skin and the colors of feathers of animals that lived millions of years ago. This visual compendium surprises and challenges everything you thought you knew about what dinosaurs looked like and how they lived.

The Making of the Lost World, Jurassic Park Jody Duncan, 1997 Hollywood hit-maker Steven Spielberg wowed the world with his Oscar-winning film version of Michael Crichton's bestseller *Jurassic Park*. This fascinating book slips behind the cameras and into the studios and workshops and goes on location to provide a look at how the mega-movie sequel was made. Color photos throughout.

Giants of the Lost World Donald R. Prothero, 2016-10-04 More than a hundred years ago, Sir Arthur Conan Doyle wrote a novel called *The Lost World* with the exciting premise that dinosaurs and other prehistoric beasts still ruled in South America. Little did Conan Doyle know, there were

terrifying monsters in South America--they just happened to be extinct. In fact, South America has an incredible history as a land where many strange creatures evolved and died out. In his book *Giants of the Lost World: Dinosaurs and Other Extinct Monsters of South America*, Donald R. Prothero uncovers the real science and history behind this fascinating story. The largest animal ever discovered was the huge sauropod dinosaur *Argentinosaurus*, which was about 130 feet long and weighed up to 100 tons. The carnivorous predator *Giganotosaurus* weighed in at more than 8 tons and measured more than 47 feet long, dwarfing the *T. rex* in comparison. Gigantic anacondas broke reptile records; possums evolved into huge saber-toothed predators; and ground sloths grew larger than elephants in this strange, unknown land. Prothero presents the scientific details about each of these prehistoric beasts, provides a picture of the ancient landscapes they once roamed, and includes the stories of the individuals who first discovered their fossils for a captivating account of a lost world that is stranger than fiction.

Having been ridiculed for years, he invites Malone on a trip to prove his story, along with Professor Summerlee, another scientist qualified to examine any evidence, and Lord John Roxton, an adventurer who knows the Amazon and several years prior to the events of the book helped end slavery by robber barons in South America. They reach the plateau with the aid of Indian guides, who are

superstitiously scared of the area.

Darwin's Lost World Martin Brasier, 2010-03-11 Darwin made a powerful argument for evolution in the *Origin of Species*, based on all the evidence available to him. But a few things puzzled him. One was how inheritance works - he did not know about genes. This book concerns another of Darwin's Dilemmas, and the efforts of modern palaeontologists to solve it. What puzzled Darwin is that the most very ancient rocks, before the Cambrian, seemed to be barren, when he would expect them to be teeming with life. Darwin speculated that this was probably because the fossils had not been found yet. Decades of work by modern palaeontologists have indeed brought us amazing fossils from far beyond the Cambrian, from the depths of the Precambrian, so life was certainly around. Yet the fossils are enigmatic, and something does seem to happen around the Cambrian to speed up evolution drastically and produce many of the early forms of animals we know today. In this book, Martin Brasier, a leading palaeontologist working on early life, takes us into the deep, dark ages of the Precambrian to explore Darwin's Lost World. Decoding the evidence in these ancient rocks, piecing together the puzzle of what happened over 540 million years ago to drive what is known as the Cambrian Explosion, is very difficult. The world was vastly different then from the one we know now, and we are in terrain with few familiar landmarks. Brasier is a master storyteller, and combines the

account of what we now know of the strange creatures of these ancient times with engaging and amusing anecdotes from his expeditions to Siberia, Outer Mongolia, Barbuda, and other places, giving a vivid impression of the people, places, and challenges involved in such work. He ends by presenting his own take on the Cambrian Explosion, based on the picture emerging from this very active field of research. A vital clue involves worms - burrowing worms are one of the key signs of the start of the Cambrian. This is fitting: Darwin was inordinately fond of worms.

The Lost World of Fossil Lake Lance Grande,2013-06-14 The landscape of southwestern Wyoming around the ghost town of Fossil is beautiful but harsh; a dry, high mountain desert with cool nights and long, cold winters inhabited by a sparse mountain desert community. But during the early Eocene, more than fifty million years ago, it was a subtropical lake, surrounded by volcanoes and forests and teeming with life. Buried within the sun-baked limestone is spectacular evidence of the lush vegetation and plentiful fauna of the ancient past, a transitional ecosystem giving us clues to how North America recovered from a great extinction event that wiped out dinosaurs and the majority of all species on the planet. Paleontologists have been conducting excavations at Fossil Butte for more than 150 years, and with The Lost World of Fossil Lake, one of the world's leading experts on the fossils from this spectacular locality takes readers on a fascinating journey through the history of the discovery and exploration of the site. Deftly mixing incredible color photographs of the remarkable fossils uncovered at the site with an explanation of their evolutionary significance, Grande presents an unprecedented, comprehensive portrait of the site, its treasures, and what we've learned from them. Grande presents a broad range of fossilized organisms from Fossil Lake—from single-celled algae to palm trees to crocodiles—and together they make this long-extinct community come to life in all its diversity and splendor. A field guide and atlas round out the book, enabling readers to identify and classify the majority of the known fossils from the site. Lavishly produced in full color, The Lost World of Fossil Lake is a stunning reminder of the intellectual and physical beauty of scientific investigation—and a breathtaking window onto our planet's long-lost past.

The Lost World of Scripture John H. Walton,Brent Sandy,2013-11-01 Readers' Choice Awards Honorable Mention Preaching's Preacher's Guide to the Best Bible Reference From John H. Walton, author of the bestselling Lost World of Genesis One, and D. Brent Sandy, author of Plowshares and Pruning Hooks, comes a detailed look at the origins of scriptural authority in ancient oral cultures and how they inform our understanding of the Old and New Testaments today. Stemming from questions about scriptural inerrancy, inspiration and oral transmission of ideas, *The Lost World of Scripture* examines the process by which the Bible has come to be what it is today. From the reasons why specific words were used to convey certain ideas to how oral tradition impacted the transmission of biblical texts, the authors seek to uncover how these issues might affect our current doctrine on the authority of Scripture. In this book we are exploring ways God chose to reveal his word in light of discoveries about ancient literary culture, write Walton and Sandy. Our specific objective is to understand better how both the Old and New Testaments were spoken, written and passed on, especially with an eye to possible implications for the Bible's inspiration and authority. The books in the Lost World Series follow the pattern set by Bible scholar John H. Walton, bringing a fresh, close reading of the Hebrew text and knowledge of ancient Near Eastern literature to an accessible discussion of the biblical topic at hand using a series of logic-based propositions.

The Lost World of the Flood Tremper Longman III,John H. Walton,2018-04-03 The flood continued forty days on the earth; and the waters increased, and bore up the ark, and it rose high above the earth . . . and the ark floated on the face of the waters (Gen 6:17-18 NRSV). In modern times the Genesis flood account has been probed and analyzed for answers to scientific, apologetic, and historical questions. It is a text that has called forth flood geology, fueled searches for remnants of the ark on Mount Ararat, and inspired a full-size replica of Noah's ark in a theme park. Some claim that the very veracity of Scripture hinges on a particular reading of the flood narrative. But do we understand what we are reading? Longman and Walton urge us to ask what the biblical author might have been saying to his ancient audience. Our quest to rediscover the biblical flood requires that we set aside our own cultural and interpretive assumptions and visit the distant world of the ancient Near East. Responsible interpretation calls for the patient

examination of the text within its ancient context of language, literature, and thought. And as we return from that lost world to our own, we will need to ask whether geological science supports the notion of flood geology. To read Longman and Walton is to put our feet on firmer interpretive ground. Without attempting to answer all of our questions, they lift the fog of modernity and allow the sunlight to reveal the true contours of the text. As with other books in the Lost World series, The Lost World of the Flood is an informative and enlightening journey toward a more responsible reading of a timeless biblical narrative. The books in the Lost World Series follow the pattern set by Bible scholar John H. Walton, bringing a fresh, close reading of the Hebrew text and knowledge of ancient Near Eastern literature to an accessible discussion of the biblical topic at hand using a series of logic-based propositions.
