A Brief History of Islam in Europe Maurits S. Berger,2014 This book gives an overall presentation and discussion of the interaction between Europe and Islam ever since Islam appeared on the European stage thirteen centuries ago. The events and stories presented are to serve the understanding of present debates on, and notions of, Islam and Muslims in Europe. 0The leading questions in discussing the role of Islam in Europe are: how and in what ways did Europeans and Muslims interact and, for those Europeans who had never met a Muslim, what was their image of Islam, and how did they study the Muslim? Notions of religion, (in)tolerance and Othering are guiding themes.0This book shows that in the course of thirteen centuries the Muslim as well as Islam has undergone many metamorphoses. The Muslim in Europe has been a conqueror, antichrist, scholar, benign ruler, corsair, tradesman and fellow citizen. The image of Islam has meandered accordingly, as a religion that was feared as an enemy or embraced as a partner against heretic Christians, despised as an abomination or admired as a civilization, and studied for missionary, academic, colonial or security purposes.0.

The Bauhaus Mateo Kries,Jolanthe Kugler,2015 The Bauhaus was one of the 20th century's most influential cultural movements, yet at the same time it is regarded as the epitome of the Modernist design cliché: geometric, industrial, minimalistic. The publication »The Bauhaus #itsalldesign« disproves this cliché and takes a new, up-to-date look at the design of the Bauhaus. The book offers the very first comprehensive overview of the extended concept of design which was initiated at the Bauhaus showing the great interest of Bauhaus designers in social interconnections, experiments and

processes. Alongside rare exhibits from design, architecture, art, film, and photography, the book documents the development processes as well as the socio-political concepts behind the Bauhaus. To underline their relevance for today's creative practise, these ideas are contrasted to current themes in design such as the digital revolution, and the works of numerous present-day artists and designers. Among others, Olaf Nicolai, Adrian Sauer, Wilfried Kühn and Joseph Grima created artistic works on the topic especially for the exhibition and the publication. The lavishly illustrated publication features essays by renowned authors, a glossary of key terms related to all aspects of the Bauhaus, as well as a detailed catalogue section.

Systematic Reviews in the Social Sciences Mark Petticrew,Helen Roberts,2008-04-15 Such diverse thinkers as Lao-Tze, Confucius, and U.S. Defense Secretary Donald Rumsfeld have all pointed out that we need to be able to tell the difference between real and assumed knowledge. The systematic review is a scientific tool that can help with this difficult task. It can help, for example, with appraising, summarising, and communicating the results and implications of otherwise unmanageable quantities of data. This book, written by two highly-respected social scientists, provides an overview of systematic literature review methods: Outlining the rationale and methods of systematic reviews; Giving worked examples from social science and other fields; Applying the practice to all social science disciplines; It requires no previous knowledge, but takes the reader through the process stage by stage; Drawing on examples from such diverse fields as psychology, criminology, education,

transport, social welfare, public health, and housing and urban policy, among others. Including detailed sections on assessing the quality of both quantitative, and qualitative research; searching for evidence in the social sciences; meta-analytic and other methods of evidence synthesis; publication bias; heterogeneity; and approaches to dissemination.
