Managing for Happiness Jurgen Appelo,2016-06-02 A practical handbook for making management great again Managing for Happiness offers a complete set of practices for more effective management that makes work fun. Work and fun are not polar opposites; they're two sides of the same coin, and making the workplace a pleasant place to be keeps employees motivated and keeps customers coming back for more. It's not about gimmicks or 'perks' that disrupt productivity; it's about finding the passion that drives your business, and making it contagious. This book provides tools, games, and practices that put joy into work, with practical, real-world guidance for empowering workers and delighting customers. These aren't break time exploits or downtime amusements—they're real solutions for common management problems. Define roles and responsibilities, create meaningful team metrics, and replace performance appraisals with something more useful. An organization's culture rests on the back of management, and this book shows you how to create change for the better. Somewhere along the line, people collectively started thinking that work is work and fun is something you do on the weekends. This book shows you how to transform your organization into a place with enthusiastic Monday mornings. Redefine job titles and career paths Motivate workers and measure team performance Change your organization's culture Make management—and work—fun again Modern organizations expect everyone to be servant leaders and systems thinkers, but nobody explains how. To survive in the 21st century, companies need to dig past the obvious and find what works. What keeps top talent? What inspires customer loyalty? The answer is great management, which inspires great employees, who then provide a great customer experience. Managing for Happiness is a practical handbook for achieving organizational greatness.

Visible Thinking John M. Bryson,Fran Ackermann,Colin Eden,Charles B. Finn,2004-08-20 Causal mapping is a tool that enables you to make sense of challenging situations so that you can get more out of them. A causal map is a word and arrow diagram in which ideas and actions are causally linked with one another through the use of arrows. Typically, only specialists such as physical or social scientists and operations researchers know about causal mapping and the tool is therefore not widely known or its broad applicability understood. Until now there has been no guidance available on how to make use of the tool for more general purposes. This book lets managers understand the theory and practice of causal mapping in layman's terms for use in both individual and group settings. It shows managers how to develop and use action-oriented strategy maps and logic models in business decision making. The authors show how causal mapping can be used as a tool to make sense of challenging situations and develop effective business responses.

Cyber Crisis Management Holger Kaschner,2022-01-04 Cyber attacks and IT breakdowns threaten every organization. The incidents accumulate and often form the prelude to complex, existence-threatening crises. This book helps not only to manage them, but also to prepare for and prevent cyber crises. Structured in a practical manner, it is ideally suited for crisis team members, communicators, security, IT and data protection experts on a day-to-day basis. With numerous illustrations and checklists. This book is a translation of the original German 1st edition Cyber Crisis Management by Holger Kaschner, published by Springer Fachmedien Wiesbaden GmbH, part of Springer Nature in 2020. The translation was done with the help of artificial intelligence (machine translation by the service DeepL.com). A subsequent human revision was done primarily in terms of content, so that the book will read stylistically differently from a conventional translation. Springer Nature works continuously to further the development of tools for the production of books and on the related technologies to support the authors.

Future Telco Peter Krüssel,2018-07-23 This book examines the extensive changes in markets, technologies and value chains that telecommunication companies are currently confronted with. It analyzes the crossroads they have reached and the choices that now need to be made – to be a bit pipe or a trendsetter of digitalization. Based on an analysis of the key challenges for telcos, the book derives future market scenarios and puts forward recommendations for how they can successfully position themselves. It proposes a framework based on seven "levers," which addresses concrete measures in each step of the value chain, ranging from technology, IT and processes, to innovation, marketing and sales issues. The book discusses the current challenges and provides both general recommendations and concrete solutions. Respected experts illustrate innovative strategic and technical trends and provide insights gained in real-life transformation projects. Recent developments in the areas of regulation, product development, competition between over-the-top (OTT) providers and telcos, as well as technical innovations like 5G, SDN/NFV, LEO satellites and MEC are discussed. Accordingly, practitioners, managers and researchers alike will benefit from the book's wealth of examples and up-to-date insights.

The Really Useful #EdTechBook David Hopkins,2015-01-24 Technology has invaded our working and recreational lives to an extent that few envisaged 20 or 30 years ago. We'd be fools to avoid the developments in personal, mobile, and wearable technology. Even if we tried we'd still have to deal with other developments and distractions in classroom and learning technology like smart boards, blogs, video, games, students-led learning, virtual learning environments, social media, etc. More than this, however, is how the advances in technology, the economic and physical miniaturisation of computing devices, have impacted education: the students, the teachers, the classrooms, the spaces, the connections, the aspirations, etc. 'The Really Useful #EdTechBook' is about experiences, reflections, hopes, passions, expectations, and professionalism of those working with, in, and for the use of technology in education. Not only is it an insight into how, or why, we work with these technologies, it's about how we as learning professionals got to where we are and how we go forward with our own development. In this book respected individuals from different education sectors write about many aspects of learning technology; from Higher Education (Sue Beckingham, Peter Reed, Dr David Walker, Sheila MacNeil, Terese Bird, Wayne Barry, Inge de Waard, and Sharon Flynn), Further Education (Rachel Challen), to Museums (Zak Mensah), workplace learning (Julian Stodd, Julie Wedgwood, and Lesley Price) and primary schools / early years education (Mike McSharry). With a foreword written by Catherine Cronin, from the National University Ireland, Galway, the breadth and depth of the experiences here are second to none. The knowledge these leading learning practitioners, researchers, and professionals, share, under the same cover, is a unique opportunity for you to read about the variety of approaches to learning technology, the different perspectives on the same technology, and how technology is impacting our culture and learning infrastructure, from early-age classrooms to leading research Universities and from museums and workplace learning providers. It is about our passion for our work and our desire to make our work better through our own learning and development. Contributory authors: Catherine Cronin: Foreword David Hopkins: Introduction Wayne Barry: ...and what do you do?: Can we explain the unexplainable? Zak Mensah: Why do we do what

we do? Peter Reed: The structure and roles of Learning Technologists within Higher Education Institutions Rachel Challen: Learning Technologists as agents of change? Blending policy and creativity Julie Wedgwood: Developing the skills and knowledge of a Learning Technologist Dr David Walker and Sheila MacNeill: Learning Technologist as Digital Pedagogue Lesley Price: Times they are a changing ...or not? Sue Beckingham: The Blended Professional: Jack-of-all-Trades and Master of Some? Julian Stodd: How gadgets help us learn Terese Bird: Students Leading the Way in Mobile Learning Innovation Inge de Waard: Tech Dandy, or the Art of Leisure Learning Sharon Flynn: Learning Technologists: changing the culture or preaching to the converted? Mike McSharry: This is your five-minute warning!

Informationsintegration in mehrsprachigen Textchats Felix Hoberg, Die vorliegende Arbeit widmet sich der Informationsintegration in maschinell übersetzten, mehrsprachigen Textchats am Beispiel des Skype Translators im Sprachenpaar Katalanisch-Deutsch. Der Untersuchung von Textchats dieser Konfiguration wurde sich bislang nur wenig zugewendet. Deshalb wird der zunächst grundlegend explorativ ausgerichteten Forschungsfrage nachgegangen, wie Personen eine maschinell übersetzte Textchat-Kommunikation wahrnehmen, wenn sie nicht der Sprache des Gegenübers mächtig sind. Damit einher geht auch die Untersuchung der Informationsextraktion und -verarbeitung zwischen Nachrichten, die in der eigenen Sprache verfasst wurden, und der Ausgabe der Maschinellen Übersetzung. Zur Erfassung des Nutzungsverhalten im Umgang mit Skype und dem Skype Translator wurde mit einer deutschlandweit an Studierende gesendeten Online-Umfrage gearbeitet. In einer zweiteiligen, naturalistisch orientierten Pilotstudie unter Einsatz des Eye-Trackers wurde das Kommunikationsverhalten von Studierenden mit deutscher Muttersprache einerseits in maschinell vom Skype Translator übersetzten Chats mit katalanischen Muttersprachler·innen und andererseits, als Referenz, in monolingualen, rein deutschsprachigen Chats ohne Skype Translator untersucht. Bei den Teilnehmer·innen an diesen Studien handelt es sich um zwei unabhängige Gruppen. Beide wurden ebenfalls mit Fragebögen zum Nutzungsverhalten und zu den Eindrücken des Skype Translators erfasst. Das sicher überraschendste Ergebnis der Studie ist, dass die Versuchspersonen einen substanziellen Teil der Chatkommunikation auf der MÜ-Ausgabe in beiden beteiligten Sprachen verbringen. Die Untersuchung der Sakkaden und Regressionen deutet auf einen sprunghaften Wechsel zwischen Originalnachricht und MÜ hin. Der Schwerpunkt der Aufmerksamkeit liegt dabei konsequent auf den neusten Nachrichten. Es ist daher anzunehmen, dass die Versuchspersonen die MÜ-Ausgabe aktiv in die Kommunikation miteinbeziehen und wesentliche Informationen zwischen Original und MÜ abzugleichen versuchen.

Management of Change ,2007-01-01 Problem-Based Learning (PBL) and Project-Based Learning are teaching methods based on principles of student-centred learning, which target an interdisciplinary engineering curriculum. The transition from strictly traditional approaches in engineering education represents significant opportunities for change.

Evidence-Based Practice in Clinical Social Work James W. Drisko,Melissa D. Grady,2019-06-14 The second edition of Evidence-Based Practice in Clinical Social Work continues to bridge the gap between social work research and clinical practice, presenting EBP as both an effective approach to social work and a broader social movement. Building on the models and insights outlined in the first edition, this new edition provides updated research and additional case studies addressing relevant issues such as trauma treatment and opioid dependence. Drawing on their multidisciplinary experience as practitioners, researchers, and educators, the authors guide readers through the steps of the EBP decision-making process in assessment, treatment planning, and evaluation. The book places special emphasis on balancing clinical expertise, research results, and client needs, and analyzes both the strengths and limitations of the EBP model in order to give readers a more complete idea of how the method will shape their own practice. In addition, this practice-building reference: Introduces core principles of EBP and details its processes in social work Features guidelines for engaging clients in EBP and transmitting research findings Offers a range of case examples demonstrating EBP with diverse clients Addresses education and supervision issues and related controversies Includes an expanded glossary and valuable resources for use in evidence-based practice Evidence-Based Practice in Clinical Social Work is a practical resource for clinical social work professionals and educators that broadens the field and expands the healing possibilities for the profession.

The Best Service is No Service Bill Price,David Jaffe,2011-09-14 In this groundbreaking book, Bill Price and David Jaffe offer a new, game-changing approach, showing how managers are taking the wrong path and are using the wrong metrics to measure customer service. Customer service, they assert, is only needed when a company does something wrong—eliminating the need for service is the best way to satisfy customers. To be successful, companies need to treat service as a data point of dysfunction and figure what they need to do to eliminate the demand. The Best Service Is No Service outlines these seven principles to deliver the best service that ultimately leads to no service: Eliminate dumb contacts Create engaging self-service Be proactive Make it easy to contact your company Own the actions across the company Listen and act Deliver great service experiences

Assessment Matters In Higher Education Brown, Sally,Glasner, Angela,1999-02-01 Assessment really does matter in higher education. Internationally, academics - and those who support them - are seeking better ways to assess students, recognizing that diverse methods are available which may solve many of the problems associated with the evaluation of learning. Assessment Matters in Higher Education provides both theoretical perspectives and pragmatic advice on how to conduct effective assessment. It draws clearly on both relevant research and on its contributors' practical first hand experience (warts and all!). It asks, for example: * how can assessment methods best become an integral part of learning? * what strategies can be used to make assessment fairer, more consistent and more efficient? * how effective are innovative approaches to assessment, and in what contexts do they prosper? * to what extent can students become involved in their own assessment? * how can we best assess learning in professional practice contexts? This is an important resource for all academics and academic managers involved in assessing their students.

Code Clone Analysis Katsuro Inoue,Chanchal K. Roy,2021-08-03 This is the first book organized around code clone analysis. To cover the broad studies of code clone analysis, this book selects past research results that are important to the progress of the field and updates them with new results and future directions. The first chapter provides an introduction for readers who are inexperienced in the foundation of code clone analysis, defines clones and related terms, and discusses the classification of clones. The chapters that follow are categorized into three main parts to present 1) major tools for code clone analysis, 2) fundamental topics such as evaluation benchmarks, clone visualization, code clone searches, and code similarities, and 3) applications to actual problems. Each chapter includes a valuable reference list that will help readers to achieve a comprehensive understanding of this diverse field and to catch up with the latest research results. Code clone analysis relies heavily on computer science theories such as pattern matching algorithms, computer language, and software metrics. Consequently, code clone analysis can be applied to a variety of real-world tasks in software development and maintenance such as bug finding and program refactoring. This book will also be useful in designing an effective curriculum that combines theory and application of code clone analysis in university software engineering courses.

Home and Work Christena E. Nippert-Eng,2008-07-22 Do you put family photos on your desk at work? Are your home and work keys on the same chain? Do you keep one all-purpose calendar for listing home and work events? Do you have separate telephone books for colleagues and friends? In Home and Work, Christena Nippert-Eng examines the intricacies and implications of how we draw the line between home and work. Arguing that relationships between the two realms range from those that are highly integrating to those that are highly segmenting, Nippert-Eng examines the ways people sculpt the boundaries between home and work. With remarkable sensitivity to the symbolic value of objects and actions, Nippert-Eng explores the meaning of clothing, wallets, lunches and vacations, and the places and ways in which we engage our family, friends, and co-workers. Commuting habits are also revealing, showing how we make the transition between home and work selves though ritualized behavior like hellos and goodbyes, the consumption of food, the way we dress, our choices of routes to and from work, and our listening, working, and sleeping habits during these journeys. The ways each of us manages time, space, and people not only reflect but reinforce lives that are more integrating or segmenting at any given time. In clarifying what we take for granted, this book will leave you thinking in different ways about your life and work.

New Media - New Teaching Options?! Gabriele Linke,2006 Time and again throughout the second half of the 20th century, technical innovations in communications have promised more efficient ways of foreign language teaching and learning. Time and again, these media have been resisted by some teachers and welcomed enthusiastically by others, until each medium's specific strengths emerged more clearly in the course of classroom use. Contributors to this volume report their experiences, submit proposals and survey the state of affairs with regard to the use of 'new' electronic media in secondary and tertiary education. Some contributions cover more traditional media genres such as film, soap opera and music video clip while others - the majority - deal with the diverse uses of the Internet as a source of information and means of communication. Here, themes range from intercultural learning via Internet and virtual intercultural projects through the description of the development of programmes for information literacy and online courses to classroom uses of electronic newspapers, electronic platforms and scenario presentations with the help of new media.

A Handbook of Business Transformation Management Methodology Axel Uhl,Lars Alexander Gollenia,2016-04-08 This book provides an integrative Business Transformation Management Methodology, the BTM2, with an emphasis on the balance between the rational aspects of transformation and the often underestimated emotional readiness of employees to absorb and accept transformation initiatives. Comprising four phases - Envision, Engage, Transform, and Optimize - the methodology integrates expertise from areas such as strategy, risk, and project management. Covering the formal and informal structures and roles needed for a successful transformation, the authors cover a wide range of theory to help understand the phenomenon of transformation. A '360-degree' view on what business transformation means and how to manage it successfully, this handbook is suitable for business executives dealing with organizational change. A range of illustrative case studies ensure this is also a valuable resource for academics interested in change and transformation management.

Naked Conversations Robert Scoble,Shel Israel,2006-04-12 From the creator of the number one business blog comes a powerful exploration of how, and why, businesses had better be blogging: Naked Conversations. According to experts Robert Scoble and Shel Israel, blogs offer businesses something that has long been lacking in their communication with customers -- meaningful dialogue. Devoid of corporate-speak and empty promises, business blogs can humanize communication, bringing companies and their constituencies together in a way that improves both image and bottom line. The authors use more than 50 case histories to explain why blogging is an efficient and credible method of business communication. You'll find yourself excited about the possibilities blogs present after reading just a few pages. Discover how: Prominent business leaders, including Mark Cuban of the Dallas Mavericks, Bob Lutz from General Motors, and Jonathan Schwartz of Sun Microsystems, are beginning to use blogs to connect with their customers in new ways. Blogging has changed the rules of communication and competition. You can launch an effective blogging strategy and the reasons why you should. Featuring a foreword by Tom Peters, this is a resource you and your business can't do without.

Skilled Visions Cristina Grasseni,2007-01-01 Most arguments for a rediscovery of the body and the senses hinge on a critique of "visualism" in our globalized, technified society. This approach has led to a lack of actual research on the processes of visual "enskillment." Providing a comprehensive spectrum of case studies in relevant contexts, this volume raises the issue of the rehabilitation of vision and contextualizes vision in the contemporary debate on the construction of local knowledge vs. the hegemony of the socio-technical network. By maintaining an ethnographic approach, the book provides practical examples that are both accessible to undergraduate students and informative for an academic audience.
